NOTE: Readers should exercise caution in interpreting or using the estimated MW values found in this report. Ex Ante forecasts reflect the expected load impacts estimates that would occur between 4 – 9 pm during each DR program's operating season, based on 1-in-2 weather conditions if all DR programs were called simultaneously on the system worst day. The values presented herein are based on the April 1, 2025 (R.13-09-011) Load Impact Report for Demand Response multiplied by the number of currently enrolled service accounts for the reporting month. MW estimates found in the Monthly ILP Report are not used by PG&E for operational reporting, resource planning, cost-effectiveness analysis, or in developing regulatory filings.

November 2025:

- Removed the "Eligible Accounts as of Jan 1, 2025" to remove redundant reporting. Data is also reported in "Program Eligibility and Ex Ante Average Load Impacts" table.
- Removed "Ex Post Estimated MW" to remove conflicting reporting. Data reported in Table I-4 "Year-to-Date Event Summary" is the appropriate Ex Post Estimated MW reporting.

<sup>1</sup> The average ex ante load impacts per customer are based on the load impacts filed on April 1, 2025 (R.13-09-011). Estimated Average Ex Ante Load Impact kW/Customer = Portfolio-Adjusted Average kW/Customer, based on 1-in-2 utility weather conditions, where an event that would occur within Resource Adequacy (RA) availability assessment hours of 5-10 pm for March-May or 4-9 pm for all other months.

<sup>2</sup> Automated Response Technology, BIP, SmartAC, and CBP represent the average of the first four hours of the five-hour RA Window.

<sup>3</sup> PDP and SmartRate represent the full five-hour RA Window, consistent with program event dispatch parameters or peak period definitions.

<sup>4</sup> PG&E does not have access to the technology installed by eligible ART customers. Therefore, the eligible account numbers presented are based on aggregated assumptions and publicly available data and should be interpreted as approximate figures rather than precise counts.

<sup>1</sup>ADR Non-Residential MWs are verified after equipment installation and customers have been paid 60% incentive or 100% for customers >200 kW. Actual performance is measured after the first full year of DR program participation, and the remaining 40% incentive (if applicable) is paid based on performance values. Office and Retail <499 kW are excepted and paid at 100%. Only values for newly paid customers are recorded.

November 2025:

<sup>1</sup> Corrected the "2024-2027 Authorized Funding" values for Categories 1, 6, and 7 to align with the Corrected D-23-12-005 issued December 14, 2023.

<sup>2</sup> Corrected the cumulative 2024 expenditure reflected in "Total Funding Cycle Expenditures to Date."

<sup>3</sup> Updated the "Cost Item" line items to align with the Corrected D-23-12-005: (1) including program incentives, SmartAC Market, and Flex Alert Media Campaign, and (2) aggregating "DR Integration Policy & Planning," "DR Ops," and "DR IT" into "DR Portfolio Support."

<sup>1</sup> Utility Marketing includes all activities to market individual utility programs or rates, demand response concepts, and customer tools, that were approved or directed by Decision 14-05-025, whether or not the marketing budget was approved as a line item in the Decision. For example, PG&E should not include marketing for TOU and PDP because funding was authorized in another proceeding. However, PG&E must document all amounts spent on marketing individual demand response programs even though a specific marketing budget was not approved for the program. This example applies to all of the utilities. The programs and activities listed in item II of the template are meant as examples, and may not be exhaustive. However, the utilities must include all programs or rates that meet this description. The totals for Items II, III and IV should be equal.

Readers should exercise caution in interpreting or using the estimated MW values found in this report. Ex post estimates reflect preliminary estimates for actual event(s) dispatched and actual weather conditions, based on the customers dispatched, which may be a subset of overall program participation. Ex post estimates in this report will vary from estimates filed in PG&E's annual April Compliance Filing pursuant to Decision 08-04-050.
