

Truck Talk - @lamlat – Video Transcript

Jeremy, let me read this to you.

This comes from Lamlat? Lam... Lamlat.

"Hilarious to see we've lowered the bar enough that we've not directly caused any preventable wildfires is a brag line."

I get it. Lammie. Preventing wildfires may seem like a low bar, but with climate change in California, it's not.

We face wildfire conditions way more than our parents did.

We've got hundreds of cameras that use AI to help spot signs of wildfire.

We got eyes everywhere.

And now Lammie, you're safer than you've ever been.
