RFP tentative release date: **March 2026**.
Formal RFP responses are due **March 31, 2026, at 3:00 PM PT**

NAICS Code / Size Standard 541690/19

Opportunity Description:

Background:

Pacific Gas and Electric Company, incorporated in California in 1905, is one of the largest utility companies in the United States. Based in Oakland, the company is part of [PG&E Corporation](#).

There are approximately 23,000 employees who carry out Pacific Gas and Electric Company's primary business—the transmission and delivery of energy. The company provides [natural gas](#) and [electric service](#) to approximately 16 million people throughout a 70,000-square-mile service area in northern and central California. PG&E service area stretches from Eureka in the north to Bakersfield in the south, and from the Pacific Ocean in the west to the Sierra Nevada in the east.

Pacific Gas and Electric Company and other energy companies in the state are regulated by the [California Public Utilities Commission](#). The CPUC was created by the state legislature in 1911.

PG&E is focused on rebuilding trust with the customers and hometowns we are privileged to serve and everyone we work with as we deliver on our triple bottom line approach of serving People, the Planet, and California's Prosperity. As we build California's energy future, we will continue our efforts to ensure that businesses have an equitable opportunity to compete for PG&E's business.

Contract Opportunity Description:

Pacific Gas and Electric Company (“PG&E”) will be contracting with a third-party evaluator to review the performance of its existing portfolio of Low Carbon Fuel Standard (LCFS) funded electric vehicle (EV) programs. PG&E generates LCFS credits through the supply of low-carbon transportation fuels (electricity and compressed natural gas (CNG)). LCFS electric credit revenues are used to run the portfolio of programs to be evaluated.

Starting in 2026, the program will move to an annual modification cycle in which new programs may be proposed and existing programs may be modified on a regular cadence. The key goal of the program evaluation is to answer significant questions that support the ongoing evolution of PG&E’s LCFS program portfolio.

Programs to be evaluated include, but are not limited to:

- Pre-Owned EV Rebate (POEV)
- Multifamily and Small Business Direct Install (MSDI)
- Residential Charging Solutions (V1 and expansion)
- Affordable Public Charging (APC)

The evaluation will run for multiple years (2026–2029) with the option to extend depending on future LCFS implementation plans.

Conduct Requirements:

Suppliers, as well as their employees, subcontractors, and sub-suppliers, must adhere to the principles and standards outlined in our Supplier Code of Conduct as they provide goods and services to PG&E. Review Code and understand its obligations here:

<http://www.pgecorp.com/corp/about-us/compliance-ethics/program/third-party-code-conduct.page>

How to Respond:

Suppliers interested in participating in this Contract Opportunity must:

- Express interest by registering for the Wood Mackenzie event, by **February 27, 2026**, at: <https://www.poweradvocate.com/pR.do?okey=239385&pubEvent=true>
- Tentative RFP response due date is **March 31, 2026, by 3:00 PM PST**.

NOTE: This Contract Opportunity Announcement is used to solicit and assess supplier capabilities for this RFI/RFP. Not all respondents will be invited to bid.

Please register to gain access to Wood Mackenzie to submit your questions (see registration link above).
