Mandatory:

• Participants Info.

• Qualified Project Info.

• Additional Resources

Note: A separate Developer Experience Form must be submitted for each Technology Type that is being pre-screened.

Demonstration of Developer Experience

Instructions: Please have the qualified participant and/or the qualified member of a participant's project development team complete the following with their information and demonstration of developer experience.

Developer Experience Defined

The participant and/or a member of the participant's project development team must have completed at least one other project of the selected DER technology(ies) operating together with a total aggregated capacity of at least one MW.

Qualified participant and/or member must have had direct involvement in management and/or development in engineering, construction, or interconnection on referenced project(s).

Roles such as finance, sales, legal or counsel do not qualify as direct participant involvement and therefore do not satisfy this developer experience requirement.

Qualified Developer Experience includes:

- Detailed experience
- Professional background
- Applicable duties and responsibilities
- Professional credentials/certifications
