

## CONTRACT OPPORTUNITY ANNOUNCEMENT

### Contract Type:

- Professional Service Contract  
 Construction Contract  
 Service Contract  
 Material Requirement  
 Other

### Opportunity Summary:

Contract Opportunity Title: **RFI # 235291 Customer Battery Infrastructure Program**

Request For: Customer Battery Infrastructure Program

Estimated Contract Value: **To be Determined**

Work Location: PG&E Service Territory

Response Due Date: Register interest no later than September 16th @ 3:00 PM PST  
RFI tentative release date: **August 20, 2025 @ 8:00 AM PST**  
Formal RFI responses are due **September 17, 2025, at 3:00 PM PST**

NAICS Code / Size Standard **335910/1250**

### Opportunity Description:

#### Background:

Pacific Gas and Electric Company, incorporated in California in 1905, is one of the largest utility companies in the United States. Based in Oakland, the company is part of [PG&E Corporation](#).

There are approximately 23,000 employees who carry out Pacific Gas and Electric Company's primary business, the transmission and delivery of energy. The company provides [natural gas](#) and [electric service](#) to approximately 16 million people throughout a 70,000-square-mile service area in northern and central California. PG&E service area stretches from Eureka in the north to Bakersfield in the south, and from the Pacific Ocean in the west to the Sierra Nevada in the east.

Pacific Gas and Electric Company and other energy companies in the state are regulated by the [California Public Utilities Commission](#). The CPUC was created by the state legislature in 1911.

PG&E is focused on rebuilding trust with the customers and hometowns we are privileged to serve and everyone we work with as we deliver on our triple bottom line approach of serving People, the Planet, and California's Prosperity. As we build California's energy future, we will continue our efforts to ensure that businesses have an equitable opportunity to compete for PG&E's business.

---

### **Contract Opportunity Description:**

Since 2020, PG&E has implemented back-up power battery programs to address frequent outages affecting customers as part of the Community Wildfire Safety Program, which includes planned Public Safety Power Shutoff (PSPS) events and unplanned Enhanced Powerline Safety Setting (EPSS) outages. PG&E's programs include both portable and permanent batteries, offering fully subsidized systems and rebate options – in all cases, the customer owns and operates the equipment. These models provide reliability to the impacted customers but make it difficult to harness additional grid benefits that permanent batteries can offer for the benefit of all customers.

PG&E plans to develop a program for utility-owned and operated back-up power equipment, benefiting both impacted customers and non-participants and seeks technical solutions from the market. PG&E discussed this program concept in Chapter 6, Section D of our 2027 General Rate Case (GRC) testimony. Several key areas need to be considered as new technical solutions are integrated. Responses to a list of questions focusing on technologies that can deliver the desired outcomes, strategies for implementation including delivering grid benefits, and program delivery will inform the future program design and an upcoming Request for Proposal, expected to follow in 2026.

### **Conduct Requirements:**

Suppliers, as well as their employees, subcontractors, and sub-suppliers, must adhere to the principles and standards outlined in our Supplier Code of Conduct as they provide goods and services to PG&E. Review Code and understand its obligations here:

### **How to Respond:**

Express interest by registering for the Wood Mackenzie event, by **September 16th, 2025, at 3:00 PM PST** by clicking the link below:

<https://www.poweradvocate.com/pR.do?okey=235291&pubEvent=true>

The Bid Event Coordinator will register you upon notification of your request. Communication is strictly prohibited regarding the bidding event except through the Wood Mackenzie messaging tool. The Bid Event Coordinator reserves the right to delay response(s) to a message received through the messaging portal if the information requested is about the RFI and could provide the requestor with an unfair advantage. All registrants and Bidders receive the same level of fairness for these events. No documentation and/or information will be shared with registrants until the official opening of the RFI bidding schedule as page one (1) of this Announcement.

**NOTE: This Contract Opportunity Announcement is used to solicit and assess supplier capabilities for this RFI. Not all respondents will be invited to any subsequent bids relating to this effort.**

**\*The dates noted above are the anticipated dates for the RFI. However, PGE reserves the right to change the bidding schedule as required. Any revisions to the bidding schedule will be communicated through the Wood Mackenzie messaging application tool to the Registrants in the RFI bidding event.**
