

PG&E Corporation issued the following release entitled:

**Nuclear Regulatory Commission: Diablo Canyon Power Plant Operated Safely in 2022**

*Conclusion Announced During Wednesday Evening Public Meeting in San Luis Obispo*

May 4, 2023

**AVILA BEACH, Calif.**— Pacific Gas and Electric Company (PG&E) received its annual report card on Diablo Canyon Power Plant from the Nuclear Regulatory Commission (NRC) in a public meeting Wednesday evening at the San Luis Obispo County Government Center in San Luis Obispo. The federal oversight agency concluding that (PG&E) operated the facility safely in 2022.

“The NRC’s assessment places Diablo Canyon among the higher performing plants in the U.S. nuclear industry. This reflects the hard work and dedication of our highly skilled coworkers and our commitment to meeting PG&E’s and the NRC’s high performance standards,” Paula Gerfen, PG&E Senior Vice President and Chief Nuclear Officer, said.

During the public meeting, the NRC reviewed how PG&E met a series of established industry-wide safety and performance objectives in 2022.

**Review of License Renewal Process**

PG&E is planning to submit a license renewal application for Diablo Canyon Power Plant by December 2023. PG&E’s actions toward relicensing the plant are consistent with direction of the State of California in Senate Bill 846. During the public meeting, NRC staff provided an overview of the license renewal process, including the safety and environmental reviews that will be performed. There will be additional opportunities for public involvement during the relicensing process.

**About Diablo Canyon Power Plant**

Diablo Canyon Power Plant is a nuclear power facility owned and operated by PG&E. It is California’s largest clean energy producer, and its two units together produce approximately 2,300 net megawatts of carbon-free power.

**About PG&E**

Pacific Gas and Electric Company, a subsidiary of [PG&E Corporation](https://www.pge.com) (NYSE:PCG), is a combined natural gas and electric utility serving more than 16 million people across 70,000 square miles in Northern and Central California.
