* As reported to the California Energy Commission's Power Source Disclosure Program. PCE & PG&E data is subject to an independent audit and verification that will not be completed until later in 2025. The figures above may not sum up to 100 percent due to rounding.

** Unspecified sources of power refer to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
