

10,000-MILE UNDERGROUNDING PROGRAM

Our wildfire safety efforts, including moving powerlines underground, are making the electric system safer and more resilient for our communities.

We are prioritizing undergrounding in areas where we can have the greatest impact on reducing wildfire risk.

2023 - 2026 Local Undergrounding Maps

To view locations of recently complete or forecast projects for 2023, as well as areas we have identified for potential undergrounding work in 2024-2026, click the county name below:

- | | | |
|----------------|-------------------|------------|
| ■ Alameda | ■ Mariposa | ■ Shasta |
| ■ Amador | ■ Mendocino | ■ Sierra |
| ■ Butte | ■ Monterey | ■ Solano |
| ■ Calaveras | ■ Napa | ■ Sonoma |
| ■ Contra Costa | ■ Nevada | ■ Tehama |
| ■ El Dorado | ■ Placer | ■ Trinity |
| ■ Fresno | ■ Plumas | ■ Tuolumne |
| ■ Glenn | ■ San Luis Obispo | ■ Yuba |
| ■ Kern | ■ San Mateo | |
| ■ Lake | ■ Santa Barbara | |
| ■ Marin | ■ Santa Cruz | |

Maps are for illustrative purposes. Forecasts can change as our risk model evolves to address the greatest wildfire risk. Forecast miles also exceed annual targets. Mileage in a community may increase or decrease due to access, weather, permitting or other constraints. In most cases, if a project is not completed during the year originally identified, it will continue through planning/construction phases during subsequent years.

Undergrounding Map Alameda County

To reduce the risk of wildfires and keep our communities safe, PG&E is undergrounding 350 miles of distribution lines across our service area in 2023. Undergrounding is one of many layers of protection that PG&E uses to keep our customers and hometowns safe. The map below shows the approximate locations of recently complete or forecast projects for 2023, as well as areas we have identified for potential work in 2024-2026. Forecast miles include areas that are in any stage of the planning process and projects are subject to change.

Data as of 6/30/2023. This map is for illustrative purposes. Forecasts can change as our risk model evolves to address the greatest wildfire risk. Forecast miles also exceed annual targets. Mileage in a community may increase or decrease due to access, weather, permitting or other constraints. In most cases, if a project is not completed during the year originally identified, it will continue through planning/construction phases during subsequent years.

Some of the measures included in this document are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.
