

Battery Backup Power

To help prevent wildfires and keep customers safe, we may need to turn power off. We know losing power disrupts lives. To reduce the impact, we provide backup power resources, including free batteries, generator and battery rebates, and transfer meters to qualifying customers. Backup power can help keep medications cool, keep critical appliances and pumps running, and power essential medical equipment. Visit [pge.com/backuppowers](https://www.pge.com/backuppowers) to learn about backup power assistance options and to see if you qualify.
