

**BioRAM RFO Q&A**  
**July 21, 2016**

**Participant Questions:**

- 1. We understand that PG&E will allow early termination of a Standard Offer Four (SO4) PPA subject to successful selection and CPUC approval of a BioRAM offer. How would this be memorialized?**

As stated in PG&E's BioRAM Protocol, PG&E will agree to early termination of existing legacy Standard Offer PPA subject to minimum damage payments specified in the PPA (e.g. Section 2 and Appendix E-11 of the Interim SO4 PPA). Existing contracts must a) expire within 24 months of execution, or b) have been subject to a current or expired fixed pricing amendment. If the holder of a SO4 Agreement is selected, PG&E will execute a termination agreement with Seller and file it for CPUC Approval with the BioRAM PPA. PG&E will provide the agreement to Seller and allow reasonable modifications as necessary.

- 2. For existing plants, are participants required to fill out both the Participant Information and Developer Experience tabs in the Offer Form? If so, how should these be answered to fulfill completion of the Validation tab?**

The Participant Information and Developer Experience tab is required for both existing plants and new facilities. However, the "Developed Projects or Projects Under Construction" section at the bottom of this tab will not apply to existing, operating plants. Please enter "N/A" in the required fields that do not apply.
