Phone: 1-800-244-9912

Together, Building  
a Better California

"PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation. ©2017 Pacific Gas and Electric Company. All rights reserved. These offerings are funded by California utility customers and administered by PG&E under the auspices of the California Public Utilities Commission.

## Event space

Exclusive to PG&E internal meetings

Our five private meeting rooms are equipped with high quality audio/visual equipment and flexible furniture layouts to accommodate any size event, from a meeting with two people, to groups of 100 people, or entire center events of several hundred. Our computer training room can accommodate up to 36 people and is equipped with 13 networked laptops. The Stockton Energy Training Center is only available for PG&E internal meetings, at this time.

Our skilled event planning team is on call from start to finish, ensuring your event is memorable and seamless. We offer all of the amenities you would expect of a large conference center at a scale more suited to regional business and training needs such as:

- Easy access for equipment set-up
- LED LCD wide screen projectors
- Guided tours of our ZNE House
- Powered conference tables for laptops and accessories

## Easily accessible

The Stockton Energy Training Center at 3136 Boeing Way is conveniently located directly off Highway 99. Ample parking is available at the Center.

## Tech capabilities

We provide state of the art audio/visual solutions for all event types, including live-streaming broadcasts. Our technicians offer exceptional pre-event consultation and day-of resources to put your mind at ease. Both wired internet services, for internal PG&E meetings, and wi-fi services are available.

## ZNE house

We offer hands-on interactive tours of our Zero Net Energy (ZNE) home at the Energy Training Center. PG&E and California's energy companies are leading the drive to reduce the state's carbon emissions through smart energy use. We're working to supply 50 percent of our customers' power from renewable sources by 2030, and we're supporting the state's plan to make all new residential building "zero net energy" by 2020. Learn how practical it can be to build a ZNE home and how to incorporate these features into your projects in our multi-layered, virtual experience.

## Menu choices

We understand the important role that food plays in attendee engagement. Our menus are designed to ease the challenges of meal planning for groups. The culinary creations from Mexico, China, Italy, and the United States are prepared by local caterers and served in our lunchroom. Our menu options are inspired by fresh, locally sourced ingredients, and accommodate today's palate and dietary preferences. Menu options, varied per day, include hearty and health conscious entrees, crisp salads, and freshly baked desserts.
