Business Computing Rebate Catalog

Saving energy for a brighter future
Pacific Gas and Electric Company (PG&E) offers financing with 0 percent interest to help you replace inefficient and worn-out equipment. With our Energy Efficiency Financing (EEF), loans range from $5,000 to $100,000, and loan payments are made conveniently through your PG&E energy statement. For more information, eligibility requirements and steps to apply for a loan, visit pge.com/eef.

Carefully read the specifications below to ensure that you are installing qualifying products. All PG&E incentives apply towards the purchase of new or replacement energy-efficient equipment. Used or rebuilt equipment is not eligible. Customers must include proof that the appliances meet all the required energy-efficiency specifications. Please note that funding for these programs is limited and available on a first-come, first-served basis until allocated funds are exhausted or the program ends, whichever comes first. This program may be modified or terminated without prior notice, and additional terms and conditions may apply.

If building type eligibility is not listed, all building types are eligible. Additional requirements may apply.

For the most up-to-date catalogs, visit pge.com/businessrebates.

Plug Load Occupancy Sensors
(Power strip or plug-in outlet cover with built-in occupancy sensor)

The plug load occupancy sensor is installed in an office or cubicle to control the office equipment and task lighting when the space is unoccupied. The sensor, plugs and switches are mounted in a single unit, which can control power to devices such as computers, printers and task lamps.

Requirements:
• Only passive infrared and/or ultrasonic detectors are eligible.
• Plug load sensors must control electricity-using equipment in offices or cubicles, including shared copiers and/or printers.
• Installation address must have a commercial electric account with PG&E.

Network Desktop Computer Power Management Software

Requirements:

- Rebate is for control of power on desktop computers only.
- Customer must install qualifying software, which can be found on the list at pge.com/powermanagementsoftware. Please note that some software is only compatible with specific operating systems.
- Installed software must allow centralized, server-level control of the power management settings (sleep mode and shutdown) of the desktop computers on a distributed network.
- Software must have a reporting feature that allows monitoring and validation of energy savings.
- Customer must agree to keep the software installed and operating for a period of five years from the initial installation date.
- Printed copy (or flash drive for a large number of installations where a printed copy is not feasible) of a report generated directly from the installed network power management software must be included with the rebate application, showing:
  - The location (installation address) of desktop computers that are being controlled by the system
  - The number of desktop computers that are being controlled by the system, grouped and totaled by each location
- Qualifying software must comply with one of the following conditions:
  - A new installation, where none previously existed
  - An upgrade of an operating system or other network support software in which the desktop computer power management function did not previously exist
- To be eligible, customers must allow PG&E onsite access to their sites to verify:
  - The installation of the software
  - The location of the installed control software (at the server level)
  - The number of desktop computers controlled by the system
- Installation address must have a commercial electric account with PG&E.

Exclusions:
Rebate does not apply to software that controls laptops or laptop stations.

More ways for your business to save money

Looking for more information on PG&E’s rebates and incentives for your business? Visit pge.com/businessrebates to access the latest rebate information and catalogs. If you are ready to apply for a rebate, you can download an application at pge.com/businessrebates.

PG&E offers a wide range of tools and resources that can help your business save energy and money while helping the environment:

• Didn’t find a rebate matching the high-efficiency equipment you’d like to install? You may still be eligible for financial support with PG&E’s customized incentives for businesses. To learn more, visit pge.com/cr.

• Sign up for automated benchmarking service at pge.com/benchmarking, which allows you to use the ENERGY STAR® Portfolio Manager to track and compare your facility’s energy performance over time.

• Use PG&E’s audit tools to identify options for saving energy and money at your facility, and get started on developing a comprehensive energy management plan. Visit the Business Energy Checkup at pge.com/waystosave.

• Find a suite of customized incentives for retrofitting outdated, inefficient equipment, as well as incentives to optimize existing equipment through PG&E’s Retrocommissioning (RCx) Program at pge.com/rcx.

• Explore PG&E’s demand response programs, which offer incentives for managing your energy use during times of peak demand at pge.com/demandresponse.

• Check out PG&E’s incentives for solar, wind and fuel cell self-generation equipment, if you are considering generating your own electricity.

You may also learn more about these programs, tools and offers by contacting your local PG&E account representative or by calling our Business Customer Service Center at 1-800-468-4743.

Ready to get started with your next project and need the help of a contractor? Find local vendors who participate in PG&E’s energy-efficiency rebate programs for your business at pge.com/tradeprodirectory.
