

BEAT THE PEAK

PEAK DAY PRICING EVENT DAY QUICK TIPS FOR BARS AND RESTAURANTS

Conserve Energy. Save Money.
Follow these simple tips to cut your energy costs on Event Days from 2:00pm-6:00pm.

ADJUST FRIDGE

Don't keep your fridge or freezers too cold. Recommended temperatures are 37-40° F for the fresh food compartment and 5° F for the freezer.

UP THE THERMOSTAT

Adjust your thermostat up a couple of degrees on Event Day afternoons. Many indoor spaces can comfortably be kept at 78° F for a few hours at a time.

SWAP LIGHT BULBS

Replace incandescent light bulbs with Energy Star® qualified LEDs whenever appropriate.

CLEAN A/C

Improve efficiency of your A/C unit by performing regular cleaning and maintenance. Even newer units benefit from a cleaning.

TURN OFF LIGHTS IN UNUSED AREAS

Turn off unnecessary lights, such as unoccupied meeting rooms, storage rooms, and supply closets.

SHADE WINDOWS

Close the blinds and shade windows to block direct sunlight during peak hours and give your A/C a break.
