

BEAT THE PEAK

PEAK DAY PRICING EVENT DAY QUICK TIPS FOR WAREHOUSING

Conserve Energy. Save Money.
Follow these simple tips to cut your energy costs on Event Days from 2:00pm-6:00pm.

UPGRADE LIGHTS

Install reduced-wattage linear fluorescent lamps to save on your energy costs while maintaining the same level of ambient lighting you are used to.

PRE-COOL

Pre-cool your workplace by lowering the thermostat in the morning, then raising it above its usual setting from 2-6 pm on Event Days, when energy rates increase.

TURN IT OFF

Turn off equipment when not in use, such as copiers, printers and computer monitors. Even when idle, electronic equipment draws power.

ADJUST FRIDGE

Don't keep your fridge or freezers too cold. Recommended temperatures are 37-40° F for the fresh food compartment and 5° F for the freezer.

TURN OFF LIGHTS IN UNUSED AREAS

Turn off unnecessary lights, such as unoccupied meeting rooms, storage rooms, and supply closets.

CHARGE AT NIGHT

Pre-charge all electric vehicles and battery-operated equipment overnight, when the electricity rates are lower.
