New effective dates

LED Troffer Deemed Rebate Effective

July 15, 2016

Applications received July 15, 2016 or later
require DLC Premium classification
and will receive new reduced rebate levels.

New Rebate Levels—Effective July 15, 2016

Tier	Measure Code	Incentive level (\$/kl)	kilolumen ¹
110–125 LPW	LT042, LT046, LT050, LT054, LT058, LT062	\$6.00	\$27.00 max
>125 LPW	LT043, LT047, LT051, LT055, LT059, LT063	\$8.00	\$36.00 max

¹Rebate capped at 4.5 kilolumens

Product Qualification Requirements

Find qualifying LED fixtures and integrated retrofit kits for this deemed rebate on **PG&E's LED Qualified Products List**. Look for:

- 1x4, 2x2, and 2x4 Luminaires for Ambient Lighting of Interior Commercial Spaces
- Integrated Retrofit Kits for 1x4, 2x4, and 2x2 Luminaires

DLC premium requirements can be found [here](#).

Additional PG&E performance filters previously required will no longer apply.

The deemed rebate for the LED Troffers and Integrated Troffer Retrofit Kits will be offered on a per-kilolumen¹ basis, rather than the traditional per fixture basis. The rebates are tiered by efficacy².

*Only DesignLights Consortium (DLC) products that meet DLC Premium Classification will be represented.

Note: DLC Premium classified LED troffers and integrated troffer retrofit kits must possess an efficacy of 110 LPW or greater. **Lower tier measure codes for products with efficacies ranging from 85 LPW–110 LPW will no longer be valid.**

¹A lumen is the unit of light output. A kilolumen = 1000 lumens.

²Efficacy is defined by lumens per watt (LPW), or how much light you get out per one watt of energy consumed.
