

PG&E's 2014 Power Mix

PG&E delivers some of the nation's cleanest electric power. More than half the electricity we provide to our customers comes from sources that are renewable and/or emit no greenhouse gases. In fact, PG&E's electricity creates only one-third as many greenhouse gas emissions per kilowatt-hour compared to the industry average.

PG&E 2014 POWER MIX

*These resources are greenhouse gas-free and/or renewable

Note: Power mix includes all PG&E-owned generation plus PG&E's power purchases.

We are aggressively adding more renewable energy to our power mix under California's renewable portfolio standard and are well on our way toward 33 percent renewables by the end of 2020. We are purchasing a range of clean energy resources, such as solar, wind, geothermal, biomass and small hydro, and are also investing in state-of-the-art, cleaner sources of fossil fuel-based and renewable power to meet demand.

Power Content Label

Actual 2014 electric resources for Pacific Gas and Electric Company (PG&E), as reported to the California Energy Commission.

ENERGY RESOURCES	PG&E 2014 POWER MIX (Actual)	2014 CA POWER MIX* (For Comparison)
Eligible Renewable:	27%	20%
• Biomass and waste	5%	3%
• Geothermal	5%	4%
• Small hydroelectric	1%	1%
• Solar	9%	4%
• Wind	7%	8%
Coal	0%	6%
Large Hydroelectric¹	8%	6%
Natural Gas	24%	45%
Nuclear	21%	9%
Other	0%	0%
Unspecified**	21%	15%
TOTAL	100%	100%

* Percentages are estimated annually by the California Energy Commission based on electricity sold to California consumers during the previous year.

** Beginning in 2010, transactions not specifically traceable to specific generation sources are designated as "unspecified" in accordance with AB 162's revisions to Public Utilities Code section 398.2.

For information about PG&E's power content, contact PG&E at **1-800-743-5000**. For information about California's power mix or for general information about the Power Content Label, contact the California Energy Commission at **1-800-555-7794** or **www.energy.ca.gov/sb1305**.

¹ A significant amount of energy generated by PG&E comes from clean, large hydroelectric power stations which, under California law, do not qualify as an eligible renewable resource.

Note: The figures above may not sum up to 100 percent due to rounding.
