

Together, Building
a Better California

PG&E can help your business find ways to save
with **time-of-use rates**, coming this fall.

pge.com/touintro

As part of a plan by the California Public Utilities Commission to ensure greater power reliability and a better energy future, PG&E's small and medium business customers are continuing to move from flat electric rates to time-of-use rates in November 2016.

Time-of-use rates are slightly higher during summer weekday afternoons when electric demand is higher, typically noon to 6 p.m., May through October. In return, time-of-use rates are lower at all other times. PG&E is committed to helping business customers like you understand your energy use, find ways to conserve electricity, and benefit from time-of-use rates.
