Your Guide to Net Energy Metering and the Billing Process
Overview

Thank you for choosing renewable energy and helping the environment.

This interactive guide will walk you through several topics, including:

**Net Energy Metering Basics:**
The difference in the amount of energy you produce and the energy you consume.

**Net Energy Usage Measurement:**
Net Energy Usage is measured by the SmartMeter™ at your home.

**New Monthly PG&E Statement:**
Helpful information about your monthly and year-to-date net energy usage and associated costs.

**Annual True-Up Statement:**
A reconciliation of your total energy credits and charges for the 12-month billing period, as well as the final balance you will pay.

**Net Surplus Compensation:**
A payment you may be eligible for if you generate more energy than you use in your 12-month billing cycle.
You are enrolled in the Net Energy Metering (NEM) Program. Understanding your energy statement allows you to use the information this program provides as an energy management tool.

All PG&E solar and renewable customers with appropriately sized systems are eligible for NEM. And the idea is simple: Electricity generated by your system - first and foremost - is used to provide energy for your home.

This offsets the amount of electricity that needs to be provided by PG&E, and any electricity that you do not consume is exported to the grid. When your system is not generating energy, for example, at night, or it does not generate enough electricity to meet your energy needs, the shortfall is supplied by PG&E.
How Net Energy Usage is measured

Net energy usage is measured by the SmartMeter™ at your home. Some months, you may use more energy than your system generates, which results in a charge. Other months, your system may produce more energy than you consume and you will receive a credit. Because you are participating in a Time-of-Use rate plan, you may also receive a credit if you are exporting energy to the grid when rates are higher and consuming energy when rates are lower (such as at night).

Finally, NEM customers are normally on a 12-month billing cycle that results in what is known as True-Up. Throughout the year, charges are offset by your credits. At the end of your 12-month billing cycle, all charges and credits are reconciled to determine whether or not you have a remaining balance.
Your new monthly
PG&E Statement

While you will continue to receive a monthly PG&E Energy Statement, as a NEM customer you are not charged for the electricity you use or credited for the electricity you generate until the end of your 12-month billing cycle.

What appears on the monthly bill under **Current Electric Monthly Charges** is the minimum amount that all PG&E customers pay every month. Your new statement will also contain a snapshot of your year-to-date charges and credits based on your energy production and use in the Net Energy Metering Account Summary part of the statement.

This amount is shown for your information only and will not be billed or due until your True-Up Statement is generated at the end of your 12-month billing cycle.
Every 12 months following your system’s interconnection to the PG&E grid, you will get a True-Up Statement - a reconciliation of all electric usage charges and credits. If you have a balance remaining, it will tell you what amount is due and will appear in the Your Account Summary section of your PG&E Energy Statement. If you have a credit remaining, your NEM statement will reset to zero.

Once all your charges, credits, and compensation are reconciled, the process will begin all over again for a new 12-month billing cycle.
Net Surplus Compensation

The amount of electricity you generate, how much you use, and your energy rate all determine if there is a net charge or net credit at the end of your 12-month billing cycle.

If you have a credit balance at your annual True-Up, you may be eligible for payment through Net Surplus Compensation (NSC). The credit for excess energy generated over your entire annual billing period is paid back to you at roughly $0.03 per kilowatt-hour (kWh).

To keep track of your total net energy generation or consumption, just check your PG&E Energy Statement in the “Summary of NEM Charges” table (“Net Usage kWh” column). You are eligible for NSC at True-Up only when your “Net Usage (kWh)” appears as a negative amount.

Additional steps are required to receive payments for any Renewable Energy Credits associated with your NSC. For more information, visit pge.com/NSC.
Monitoring success: Your Net Energy Metering Statement

Your PG&E Net Energy Metering Statement is a useful tool to help you understand your current energy use. It provides what you owe monthly and how you are tracking towards True-Up with a snapshot of your accumulated charges, credits, and total net energy amount.

Service For - Clearly indicates where your charges were incurred. Some customers receive PG&E service at multiple locations, such as a home and rental property.
Monitoring success: Your Net Energy Metering Statement

Your Account Summary - The account summary provides an overview of charges incurred, payments received, and your total amount due. Since you’re a NEM customer, you only pay current gas charges (if you have a gas account) and current electric monthly charges. This is the minimum amount due that you must pay by the due date. It will not include actual charges for electricity until your True-Up month.
Monitoring success: Your **Net Energy** Metering Statement

**At-A-Glance Account Data** - Your account number and due date are at the top of every page. It is good to have this information handy if you need to call us about your energy use.

* Please go to pge.com/energycharges to find the generation component of your Energy Charges.

**Explanation of Calculations**

Your YTD Total NEM Charges represent the balance of your net usage since the start of your True-Up period. Charges are calculated each month but are not billed until the end of the True-Up period.

Your Summary of NEM Charges will be reset to zero at True-Up.

The Minimum Delivery Charge is billed monthly and credited at True-Up if the total NEM Charges Before Taxes or total State Mandated Non-Bypassable Charges are greater than your cumulative Minimum Delivery Charges. Refer to Detail of NEM Charges page for details about the State Mandated Non-Bypassable Charges.

Energy Charges are commodity costs related to energy usage and will be paid (if a positive amount) at True-Up when your NEM Charges Before Taxes are less than the sum of your total Minimum Delivery Charges and Energy Charges.

This is your YTD balance. Your total NEM balance will be reconciled on your True-Up statement (06/00/17).

Total NEM Charges Before Taxes $419.04
Total Electric Minimum Delivery Charges $30.22
Estimated Taxes 22.56
YTD Estimated NEM Charges At True-Up $441.60

Please contact the Solar Customer Service Center at 1-877-743-4112 for questions about your NEM charges.

Visit www.pge.com/mbilling for a detailed explanation of NEM billing.
Monitoring success: Your Net Energy Metering Statement

Electric Charges - All PG&E customers pay the Minimum Delivery Charges monthly to stay connected to the grid. This Minimum Delivery Charge is used to pay for the transportation of the electricity over PG&E’s grid. The Energy Charge is used to pay for the generation of electricity that PG&E provides, and will not affect your monthly bill but may increase the amount owed at True-Up.
Monitoring success: Your Net Energy Metering Statement

Explanation of Calculations

This section explains how your monthly Electric Charges and year-to-date (YTD) NEM charges are calculated and factor into your True-Up bill. If you are eligible for Net Surplus Compensation those calculations will be applied at your annual True-Up.
Monitoring success: Your Net Energy Metering Statement

CLICK THE NUMBER TABS FOR A DETAILED EXPLANATION.

NEM Charts - These charges or credits provide a visual representation of both the monthly NEM charges and cumulative balance of those charges or credits month over month. This visual provides a way to monitor and better gauge what charges or credits will likely be at True-Up.

Charges, credits, and compensation: Your True-Up Statement

Becoming familiar with your True-Up Statement helps provide you with a true end-of-year representation of your net energy usage. This includes a summary of your final balance after all your credits and charges are reconciled, whether there is an amount due, and if you are eligible for compensation based on the total net usage.
Charges, credits, and compensation: Your True-Up Statement

Your Account Summary - A snapshot of your bill in large, easy-to-read type. Although a more detailed breakdown of your charges is available on the following pages, the account summary provides an overview of charges incurred, payments received, and your total amount due. It’s important to note that at the annual anniversary of the start of participation in the NEM program (annual True-Up), customers are responsible for any reconciled NEM charges due.
Charges, credits, and compensation: Your True-Up Statement

Your Net Energy Metering (NEM) Account Summary: True-Up - This section provides notification that this is the annual True-Up statement in which all energy charges, credits and previously billed monthly electric minimum charges are reconciled. If you generated more energy than you used over the True-Up period, this section would also include your Net Surplus Compensation.
Charges, credits, and compensation: Your True-Up Statement

Summary of Your NEM True-Up Period Charges - The chart at right shows how much net energy you generated or consumed each month and the associated charge or credit. The chart provides a summary of the total NEM charges from the start of your annual True-Up period and a monthly snapshot of your net energy use including time periods on your Time-of-Use rate schedule.
Charges, credits, and compensation: Your True-Up Statement

CLICK THE NUMBER TABS FOR A DETAILED EXPLANATION.

Electric Charges - Minimum Delivery Charges are a nominal amount that all PG&E customers pay monthly to stay connected to the grid regardless of whether they have solar or use any electricity. Energy Charges are reconciled on your True-Up statement.

Explanation of Calculations
This is your True-Up statement. You are being billed for your total NEM Charges Before Taxes minus your total electric Minimum Delivery Charges in addition to any applicable charges and taxes.

Since this is your True-Up statement, all electric usage charges and credits are reset to zero starting with your next billing cycle.

The Minimum Delivery Charge is being billed monthly and credited at True-Up if the total NEM Charges before Taxes are greater than your cumulative Minimum Delivery Charges.

Energy Charges are basic commodity costs related to energy usage. These charges will only be billed at True-Up if they are a positive amount and when the total NEM Charges before Taxes are less than the sum of your total Minimum Delivery Charges and Energy Charges.

Based on your Net Usage (kWh), the True-Up calculations are:

<table>
<thead>
<tr>

Charges, credits, and compensation: Your True-Up Statement

NEM Charts - These charges or credits provide a visual representation of both the monthly NEM charges and what the balance of those charges or credits culminate to month over month.

CLICK THE NUMBER TABS FOR A DETAILED EXPLANATION.

Monthly NEM Charges
Monthly NEM Charges represent the cost of the electricity you use each month. You don’t pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance
Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month’s use and generation. You only pay your Cumulative NEM balance at True-Up.

Visit www.pge.com/nembilling for a detailed explanation of NEM billing.
Charges, credits, and compensation: Your True-Up Statement

Details of Electric Monthly Charges - This section covers information about how your Minimum Delivery Charge is calculated. This is the minimum charge you pay each month.

Adding to your solar savvy

Let’s take a look at some key questions other customers have asked.

We strongly recommend enrolling in Your Account at pge.com for easy access to your PG&E bill and Energy Statements. You can review your net usage online and make payments on your regular PG&E bill. Here, you’ll find the information you need to understand and manage your energy use.

- **Can I access my charges and credits online?**
- Why is it important to know whether I generated more energy than I used or vice versa?
- Why is there a small monthly charge from PG&E for having solar?
- Can I pay my Net Energy Metering Charges monthly?
- I have been making monthly payments. Why are my payments not reflected in my Net Energy Metering Account Summary Balance?
- Why is PG&E’s payment for excess energy I generated less than the rate I pay?
- What does having a SmartMeter™ mean for me?

  - Why is PG&E’s payment for excess energy I generated less than the rate I pay?
- What does having a SmartMeter™ mean for me?

PG&E does not currently offer an option to reconcile these charges on a monthly basis, but upon receipt of your monthly statement you can pay ahead, resulting in a credit on your account. PG&E recommends this practice to avoid a large bill at the end of your True-Up period.
