California Public Utilities Commission
Mobilehome Park Utility Upgrade Program’s Category Descriptions

Category 1
*Mobilehome Park/Community has been selected for the Program.*

The applicable utility(ies) will be contacting the park/community, and provided that information shown on the FOI is accurate and the park/community is able to meet various conditions, the park/community will be included in the approximately 10% of spaces targeted by the Program and can potentially have its master-meter system(s) replaced with direct utility service.

Category 2
*Mobilehome Park/Community has not yet been selected for the Program, nor included in the initial 10% of spaces targeted by the Program.*

However, parks/communities in Category 2 are part of an approximately 8% zone, specific to each utility, which starts after the initial 10% of respective utility spaces addressed by Category 1.

Parks/communities in Category 2 will be selected and notified as certain parks/communities in Category 1 choose to discontinue participation in the Program or for any other reason are determined as being ineligible and eventually de-selected from the Program. The CPUC and/or utilities will be contacting mobilehome parks/communities in Category 2 to provide further details on what inclusion in Category 2 entails.

Category 3
*Mobilehome Park/Community has not been selected for the Program.*

However, parks/communities in Category 3 are included on a waiting list from which they may be selected should the list of parks/communities placed in Category 1 or Category 2 be exhausted. However, we believe the relatively short time period for the Program, the level of anticipated construction work and related coordination activity, and the potential for the unknowns inherent in any pilot program, will most likely limit the Program’s ability to replace master-meter system(s) to direct utility service in mobilehome parks/communities designated as Category 3.

Questions
If you have questions related to this response, please visit the CPUC’s website at [www.CPUC.ca.gov](http://www.CPUC.ca.gov), send an e-mail at [MHPUtilityUpgradeProgram@cpuc.ca.gov](mailto:MHPUtilityUpgradeProgram@cpuc.ca.gov), or call (800) 755-1447. Mobilehome Parks/Communities placed in Category 1 or 2 may also contact their CPUC regulated utility(ies).
