REMEDIAL ACTION PLAN, FORMER FRESNO-1 MANUFACTURED GAS PLANT  
(MGP) SITE, 211 NORTH THORNE AVENUE, FRESNO, CALIFORNIA

Dear Mr. Lee:

The Department of Toxic Substances Control (DTSC) held a public comment period on the Draft Remedial Action Plan (draft RAP) for the Former PG&E Fresno-1 Manufactured Gas Plant Site from October 9, 2013 to November 7, 2013. A community meeting was conducted on October 23, 2013 to discuss the draft RAP, answer questions and accept public comments. A meeting transcript, prepared by a California-certified court reporter reflects that the meeting was opened and promptly adjourned with no members of the public present, with the exception of one individual who wanted to know more about the project and possibly secure work.

No comments were received on the draft RAP during the public comment period. Therefore, no changes were required in the draft RAP, other than modifying it to reflect its status as the "final" RAP and adding the Responsiveness Summary to the appendices. DTSC has determined that the final RAP, dated December 6, 2013, satisfactorily addresses all applicable state and federal statutes and regulations. DTSC hereby approves the final RAP for implementation.

Please contact Jeff Gymer at (559) 297-3907 or at [jgymer@dtsc.ca.gov](mailto:jgymer@dtsc.ca.gov) if you have any questions.

Sincerely,

Kevin L. Shaddy, P.E.  
Supervising Hazardous Substances Engineer  
Cleanup Program – San Joaquin Branch -Clovis
