

WORK NOTICE

**PG&E Former Manufactured Gas Plant Site
Corner of Walker and Pismo Streets
San Luis Obispo, California**

Environmental Investigation Work Scheduled Between March 29 – April 29, 2011

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about the second phase of field work to be performed as part of an environmental site investigation at the Pacific Gas and Electric (PG&E) property located at 1390 Walker Street and 280-290 Pismo Street in San Luis Obispo (referred to as the site.) PG&E and its contractors, under the oversight of DTSC, will be collecting samples of soil, soil gas (the air spaces between particles of soil), and groundwater from various locations both on- and off-site to provide additional information about the extent of old gas plant residues that remain in the soil and groundwater.

The field investigation work will be conducted from March 29 through April 27, 2011 during the hours of 7:00 a.m. to 5:00 p.m., Monday through Friday. An environmental project manager will be on-site daily to monitor the work and site conditions. Work for the site will include:

- Drilling approximately 26 bore-holes through concrete, asphalt paving, and gravel using hand equipment and a truck-mounted drill rig (including a support truck).
- Installing eight groundwater monitoring wells.
- Collection of soil and soil gas samples from a depth of approximately 1 to 40 feet.
- Collection of groundwater samples at depths of approximately 25 and 45 feet.
- Backfilling holes with a concrete mixture and patching the surface with asphalt, concrete, or gravel to match surrounding conditions.
- General site cleanup during and at the end of each work day.

Several borings will be drilled in the alleyway north of the site and within a private parking lot adjacent to the alleyway, in the sidewalk areas adjacent to Walker and Pismo Street, and in Pismo Street, as approved by the City of San Luis Obispo. During these drilling activities, project staff and traffic control signs will direct traffic around the work area for two to three hours. Notices will also be posted to inform the community that local businesses will remain open during these activities. During the sidewalk sampling, pedestrian traffic will be detoured temporarily to the other side of the street in accordance with City requirements.

For More Information: If you have questions about this project please call:

- Kevin Shaddy, DTSC Project Manager, at (559) 297-3929 or by email: kshaddy@dtsc.ca.gov
- Christina Fu, DTSC Public Participation Specialist, at (714) 484-5488 or (866) 495-5651 (Press 4 twice) or by email: cfu@dtsc.ca.gov.

Where to Find Project Documents

DTSC encourages you to review the investigation work plan and other site-related documents which are available at the information repositories listed below:

San Luis Obispo Public Library

995 Palm Street
San Luis Obispo, CA 93403
(805) 781-5989,
Reference Desk

DTSC – File Room

1515 Tollhouse Road
Clovis, CA 93611
(559) 297-3902,
Contact Sarah Toles
