

Energy Essentials: Choosing the Right Rate Plan

Every day we make choices about how we use energy.

Did you know you have a choice over your energy rate plan, too?

We're here to help you choose the rate plan that best fits your lifestyle and could save you the most money with the PG&E Electric Rate Plan Comparison tool.

It's easy, just log in or create a PGE.com online account, and click the "Compare Rate Plans" button.

The Electric Rate Plan Comparison tool will then look at your last 12 months of energy use and show you how much you paid on your current rate plan and—if you have options that could save you more—how much you would have paid on the lowest available rate plan.

If you scroll down, you can even see what you would have paid on other rate plans.

With our Rate Simulator, you can learn how to pay even less. Just answer a few questions about lifestyle and energy habits you're willing to adjust, and it will estimate your costs on each rate plan.

You can review your options even further by clicking "Learn More" on each rate plan.

You'll get a detailed plan overview and a month-by-month breakdown of your estimated electric costs for the year.

Switching plans is easy, too. Simply click the "Change Your Rate Plan" button.

Log into your account today to choose the rate plan that's right for you.
