

Energy Essentials: Simple Ways to Save Energy

PG&E offers a variety of programs, tips and tools that can help you save energy and money.

A great way to get started is with the Home Energy Checkup.

The Home Energy Checkup gives you a breakdown of how you and your home uses energy...and a personalized list of ideas to help you conserve it.

All you have to do is answer a few basic questions about the way you use energy

It's easy, and it takes only 5 minutes.

If you're looking for more ideas to help you save, we can help.

Visit PG&E's energy-saving tips page to find a variety of ideas, ranging from no-cost tips, to longer term investments

Whether it's raising your thermostat slightly in the summer or switching to LED holiday lights in the winter, you can always take steps to save energy and money.

The more steps you take, the more you can save.

Start saving today with Home Energy Checkup and energy-saving tips from PG&E.
