

Fresno Grizzlies, PG&E Online Account

Video Script

- Our online account is extremely helpful for us to project the day to day expenses for what we're doing with our energy. The value of seeing our usage history over time is great because we get to sit back, and after the baseball season, and what did we do three years ago, what did we do last year, and really get an accurate budget number together. So that we're not surprised at the end of the year.
- When Shaun and I reviewed the cost and usage trends, we noticed that they were having usage on off peak times.
- We were able to find out why we were using a lot more energy one June from the next. And it turns out we have 15000 more people in the park than we did the previous June, so we were able to find that a lot quicker through the tools PG&E.
- [Jordan Voiceover] I'd suggest all customers go online and view their account. You can look at your usage and maybe even identify some inefficiencies.
- I think the biggest benefit to the online account is just time saving. I used to use an Excel spreadsheet back in the day to keep track of what our electricity was. Now it's all done for me. So it's all online, and I can access it anywhere. Whether your business is big or small, you can make an impact on your bottom line. It's a no brainer.
