San Francisco, CA 94177

Subject: Notice of proposed Northern Receiving Station 115 kilovolt pole line connection

Dear Ms Smith:

Advice Letter 2441-E is effective December 24, 2003. A copy of the advice letter is returned herewith for your records.

Sincerely,

[Signature]
Paul Clanon, Director
Energy Division
November 14, 2003

Advice 2441-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Notice of Proposed Construction of Facilities Pursuant to General Order 131-D, Northern Receiving Station 115 Kilovolt Pole Line Connection

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

Proposed Project: As part of the City of Santa Clara's Northern Receiving Station Transmission Reinforcement Project, Pacific Gas and Electric Company proposes to construct a 630-foot long power line from the Nortech-Kifer 115 kilovolt (kV) Transmission Line alignment located along the easterly side of Lafayette Street in the City of Santa Clara to the City of Santa Clara’s Northern Receiving Station located north of Gianera Street and west of Lafayette Street. The new line will extend from the Nortech-Kifer 115kV line at a pole on the easterly side of Lafayette Street between Calle De Primavera and Fairway Glen Drive, and will continue into the Northern Receiving Station on two new poles to be constructed westerly of Lafayette Street, with one pole located in the City parking lot westerly of the Union Pacific Railroad tracks and another pole located within the Northern Receiving Station. Construction is scheduled to start January

¹ The Company reserves all legal rights to challenge the decisions or statutes under which it has been required to make this advice filing, and nothing in this advice filing constitutes a waiver of such rights. Also, the Company reserves any additional legal rights to challenge the requirement to make this advice filing by reason of its status as a debtor under Chapter 11 of the Bankruptcy Code, and nothing in this advice filing constitutes a waiver of such rights.
2004, or as soon as possible thereafter, and the power line is expected to be energized by March 1, 2004, or as soon as possible after project completion.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, B, Section 1 (f) states that a Permit to Construct is not required for "power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document (Environmental Impact Report (EIR) or Negative Declaration) finds no significant unavoidable environmental impact caused by the proposed line or substation."

The City of Santa Clara adopted a Negative Declaration for the Northern Receiving Station Transmission Reinforcement Project, finding no significant unavoidable environmental impacts resulting from PG&E's proposed line. (State Clearinghouse #2003092044.)

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs).

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Protests

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by December 4, 2003, at the following address:

Director, Energy Division  
California Public Utilities Commission  
505 Van Ness Avenue, Fourth Floor  
San Francisco, California 94102  
Facsimile: (415) 703-2200

In addition, protests and all other correspondence regarding this advice letter should also be sent by letter and transmitted via facsimile to the attention of:

David T. Kraska  
Attorney, Law Department  
Pacific Gas and Electric Company  
P.O. Box 7442  
San Francisco, California 94120  
Facsimile (415) 973-0516
Persons or groups may protest the proposed construction if they believe that the Company has incorrectly applied for an exemption or that the conditions set out G.O. 131-D, Section III.B.2, exist.

Effective Date

The Company requests that this advice filing become effective on December 24, 2003, which is 40 days after the date of filing. (In accordance with G.O. 131-D, construction will not begin until 45 days after notice is first published.)

Notice

In accordance with G.O. 96-A, Section III, Paragraph G, the Company is electronically and postal mailing copies of this advice letter to the utilities and interested parties shown on the attached list, including the parties listed in G.O. 131-D, Section XI, Paragraphs B.1 and B.2. These parties are identified in the “Notice Distribution List” included in Attachment I. Address change requests should be directed to Sandra Ciach at (415) 973-7572. Advice letter filings can also be accessed electronically at:

NOTICE OF PROPOSED CONSTRUCTION

PROJECT NAME: Northern Receiving Station 115 Kilovolt Pole Line Connection
ADVICE LETTER NUMBER: 2441-E

Proposed Project: As part of the City of Santa Clara’s Northern Receiving Station Transmission Reinforcement Project, Pacific Gas and Electric Company proposes to construct a 630-foot long power line from the Nortech-Kifer 115 kilovolt (kV) Transmission Line alignment located along the easterly side of Lafayette Street in the City of Santa Clara to the City of Santa Clara’s Northern Receiving Station located north of Gianera Street and west of Lafayette Street. The new line will extend from the Nortech-Kifer 115 kV line at a pole on the easterly side of Lafayette Street between Calle De Primavera and Fairway Glen Drive, and will continue into the Northern Receiving Station on two new poles to be constructed westerly of Lafayette Street, with one pole located in the City parking lot westerly of the Union Pacific Railroad tracks and another pole located within the Northern Receiving Station. Construction is scheduled to start January 2004, or as soon as possible thereafter, and the power line is expected to be energized by March 1, 2004, or as soon as possible after project completion.

Electric and Magnetic Fields (EMF): Pacific Gas and Electric Company will employ “no cost” and specified “low cost” measures to reduce public exposure to EMF in accordance with California Public Utilities Commission (CPUC) Decision 93-11-013 and Pacific Gas and Electric Company’s “EMF Design Guidelines of New Electrical Facilities: Transmission, Substation, and Distribution.” The following measure is proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC’s benchmark of 4% or less of the total project cost, no “no cost” or “low cost” measures will be employed.

Exemption from CPUC Authority: CPUC General Order 131-D, Section III, B.1, exempts projects meeting specific conditions from the CPUC’s requirement to file an application requesting authority to construct. Pacific Gas and Electric Company believes this project qualifies for the following exemption:

- “power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document (Environmental Impact Report (EIR) or Negative Declaration) finds no significant unavoidable environmental impacts caused by the proposed line or substation.”

The City of Santa Clara certified a Negative Declaration for the Northern Receiving Station Transmission Reinforcement Project, finding no significant unavoidable environmental impacts resulting from Pacific Gas and Electric Company’s proposed line. (State Clearinghouse # 2003092044.)

Public Review Process: Persons or groups may protest the proposed construction if they believe that Pacific Gas and Electric Company has incorrectly applied for an exemption or that the conditions set out in General Order 131-D, Section III.B.2 exist;

a. There is reasonable possibility that the activity may have an impact on an environmental resource of hazardous or critical concern where designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies; or
b. The cumulative impact of successive projects of the same type in the same place, over time, is significant; or

There is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

Protests should include the following:

1. Your name, mailing address and daytime telephone number.
2. Reference to the CPUC Advice Letter Number and Project Name.
3. A clear description of the reason for the protest.
4. Whether you believe that evidentiary hearings are necessary to resolve factual disputes.

Protests for this project must be filed by December 4, 2003, at the following address:

Director, Energy Division
California Public Utilities Commission
505 Van Ness Avenue, Fourth Floor
San Francisco, California 94102

With a copy mailed to:

David Kraska, Law Department
Pacific Gas and Electric Company
P.O. Box 7442
San Francisco, California 94120

Pacific Gas and Electric Company must respond within five business days of receipt and serve copies of its response on each protestant and the Energy Division. Within 30 days after Pacific Gas and Electric Company has submitted its response, the Executive Director of the CPUC will send you a copy of an Executive Resolution granting or denying the request and stating the reasons for the decision.

Assistance in Filing a Protest: For assistance in filing a protest, contact the CPUC Public Advisor in San Francisco at (415) 703-2074 or 1-866-849-6390 (toll-free) or TTY (415) 703.5258 or public.advisor@cpuc.ca.gov.

Additional Project Information: To obtain further information on the proposed project, please call Pacific Gas and Electric Company’s Project Information Line at (415) 973-5530.
