**Advice 3308-E**

(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Modifications to Existing Agreement with San Francisco Bay Area Rapid Transit District**

Pacific Gas and Electric Company (PG&E) hereby submits, in accordance with General Order (G.O.) 96-B, Energy Industry Rule 8.2.3, a modification to the existing *Agreement between San Francisco Bay Area Rapid Transit District and Pacific Gas and Electric Company for Specified CPUC Jurisdictional Electrical Services* (Agreement). These modifications are necessary to accommodate the San Francisco Bay Area Rapid Transit District's (BART) request to install up to 5 mW of solar photovoltaic and wind generation facilities at their various BART locations.

**Purpose**

The purpose of this filing is to modify the Agreement to accommodate BART's desire to install solar and wind generation facilities at various BART locations. At the time the Agreement was executed, BART and PG&E did not anticipate BART's development of any solar photovoltaic or wind generation installations.

**Background**

BART takes Network Integration Transmission Service (NITS) under PG&E's Federal Energy Regulatory Commission (FERC) jurisdictional Open Access Transmission (OAT) tariff. In conjunction with the NITS, PG&E provides certain services to BART pursuant to the Agreement. The Agreement was the result of Investigation and Suspension (I&S) Case No. 99-06-002. PG&E filed the Agreement on behalf of both BART and PG&E, and the CPUC approved the Agreement in D.00-10-015 dated October 5, 2000.

### **Amendment to the Agreement**

PG&E is requesting that the Agreement be modified to accommodate BART's development and installation of solar photovoltaic and wind generation facilities. PG&E supports BART's proposal as this will add additional sources of renewable resources in California. A First Amendment is proposed to the existing Agreement defining the modifications necessary to allow BART to install up to 5 mW of solar and wind generation facilities. In addition, a new Exhibit "H", titled *Special Interconnection Agreement for BART Solar or Wind Electric Generating Facilities* is proposed to provide additional terms and conditions on how BART may connect and operate a solar photovoltaic or wind generation facility in parallel with PG&E's transmission and distribution systems to serve the electric service accounts that PG&E uses to interconnect to BART's generating facility. PG&E proposes that this pre-approved agreement be executed for each solar or wind facility installed by BART.

In addition, the proposed changes are consistent with the California Public Utilities Code (PUC) Section 701.8, which established unique terms and conditions for service to BART. PG&E will continue to treat and bill BART as though all electricity purchased at the respective voltage levels are a single meter at one location. BART will be responsible for obtaining all the necessary right-of-ways, permits, or entitlements to ensure that BART owns or leases the electrical facilities for this continued treatment.

This filing will not affect any rate or charge, cause the withdrawal of service, or conflict with any rate schedule or rule.

### **Protest Period**

Anyone wishing to protest this filing may do so by sending a letter by **August 20, 2008**, which is **20 days** from the date of this filing. The protest must state the grounds upon which it is based, including such items as financial and service impact, and should be submitted expeditiously. Protests should be mailed to:
