Site Name: Mountain House Pipeline Right-of-Way

Location: Near Grant Line Road and Mountain House Parkway
Mountain House, California

Source, Nature, and Approximate Date of Contamination:

PG&E Gas Transmission maintains a right-of-way for two natural gas pipelines which run through the community of Mountain House. A crude oil pipeline owned by Chevron runs within the same right-of-way, parallel to the PG&E natural gas lines.

During the infrastructure development in 2008 for the planned Delta College in Mountain House, the developer discovered soils contaminated with petroleum hydrocarbons in soils within the right-of-way. In October 2008, the developer of the college, PCCP Mountain House, LLC, sent a letter addressed to both PG&E and Chevron requesting that one or both companies take responsibility for the investigation, removal, transportation and disposal of the contaminated soils.

Utility Operations at the Site:

PG&E owns and operates two natural gas pipelines within the Mountain House Pipeline Right-of-Way. Line 401 is the main “backbone” high pressure transmission line from Canada. Line 2 is a high pressure transmission line that branches from Line 401 in Brentwood, California. Both lines supply what is considered “clean, dry” gas, notably free of pipeline liquids.

Environmental Agency Actions:

PG&E has not been contacted by an environmental agency. According to the developer’s on-site representative, remediation activity was being performed per a plan under the jurisdiction of the Delta College Community Services District.

Nature of Costs:

The Mountain House Pipeline Right-of-Way cleanup costs for which PG&E is seeking HSM recovery are not being recovered in base rates or through any other recovery procedure. All cleanup costs to be recorded by PG&E in the HSM memorandum accounts will be hazardous waste cleanup costs found appropriate for recovery in the Hazardous Substance Cleanup Cost Recovery Collaborative Report.
