**Advice 3414-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D,
for the Manteca #1 60kV Relocation in the City of Manteca, County of
San Joaquin**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to accommodate the City of Manteca and California Department of Transportation's improvement project at South Union Road/State Route 120 overcrossing and ramps in the City of Manteca, PG&E has been requested by the City of Manteca to relocate approximately 2,050 feet of the existing Manteca #1 60kV power line that parallels Union Road in the City of Manteca. PG&E will relocate the line from its present location on the west side of Union Road to a new location approximately 15' to the west of the present location on Union Road (existing franchise) between State Route 120 and Woodward Avenue. To ensure adequate conductor clearance over proposed city street lights and signal lights and legal ground to conductor clearance, approximately seven wood poles will be replaced with taller wood poles. Five of the poles, which currently range from approximately 56 to 61 feet tall, will be replaced with approximately 10-foot taller wood poles, and two 56- to 65-foot tall wood poles will be replaced with approximately 17-foot taller wood poles. Construction is scheduled to begin in March 2009 or as soon thereafter as possible, with completion in approximately four weeks or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1.g, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting

authority to construct. The Company believes this project qualifies for the following exemption(s),

“Power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.”

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs) in accordance with CPUC Decision 06-01-042 and the "EMF Guidelines for Electrical Facilities." The following measures are proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low-cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
