REVISED

Advice 3467-E

(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Notice to Terminate the Reliability Cost Balancing Account

Purpose

Pacific Gas and Electric Company (PG&E) hereby submits this advice letter to provide the Commission with notice of its intention to terminate the Reliability Cost Balancing Account, Electric Preliminary Statement Part DO.

Background

On July 8, 2004, the California Public Utilities Commission (CPUC, Commission) issued D.04-07-028 to clarify and modify past Commission orders regarding the principles that utilities shall follow when making resource scheduling and procurement decisions. D.04-07-028 ordered utilities to consider additional categories of California Independent System Operator (CAISO)-related costs in their evaluation of resource scheduling and procurement options incorporating "all known and reasonably anticipated [CAISO]-related costs (including congestion, re-dispatch and must-offer costs)."

On November 9, 2004 in Advice 2584-E, and in accordance with D.04-07-028, PG&E requested cost recovery for any additional reliability-related costs that it incurs as a result of implementing the requirements of D.04-07-028 through its Federal Energy Regulatory Commission (FERC) Reliability Services tariff provisions. The CPUC recognized that utilities may not be able to recover all reliability-related costs through these FERC tariff provisions, and it authorized utilities to seek recovery, for any disallowances by FERC, from the CPUC in the appropriate Energy Resource Recovery Account (ERRA) proceeding.

With the implementation of MRTU and the Commissions' Resource Adequacy (RA) program, the concerns that led the Commission to issue D.04-07-028 are no longer relevant. It is for this reason PG&E requests to terminate the RCBA balancing account.
