Subject:  Revisions to Electric Rate Schedules NEM and NEMVNMA in Compliance with Assembly Bill 510 to Increase the Participation Cap to 5% and Add an Inspection Reporting Requirement

Dear Ms. Yura:

Advice Letter 3778-E is effective January 13, 2011.

Sincerely,

Julie A. Fitch, Director  
Energy Division
December 14, 2010

Advice 3778-E
(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Revisions to Electric Rate Schedules NEM and NEMVNMA in Compliance with Assembly Bill 510 to Increase the Participation Cap to 5% and Add an Inspection Reporting Requirement

Pacific Gas and Electric Company (PG&E) hereby submits for filing revisions to its Electric Schedules NEM and NEMVNMA. The affected tariff sheets are listed on the enclosed Attachment I.

Purpose

The purpose of this advice letter is to revise the Electric Rate Schedules NEM and NEMVNMA in accordance with the changes made to Public Utilities (PU) Code Section 2827 by Assembly Bill (AB) 510.

Background

AB 510\(^1\) was signed by the Governor on February 26, 2010, and is effective January 1, 2011. AB 510 raises the Net Energy Metering program cap\(^2\) in Public Utilities Code (PU) Section 2827(c)(1)\(^3\) and (c)(4)\(^4\) from 2.5\(^5\) percent to 5 percent of PG&E’s aggregate peak customer demand.

---

1 http://www.leginfo.ca.gov/pub/09-10/bill/asm/ab_0501-0550/ab_510_bill_20100226_chaptered.html
2 The following past NEM legislation reflect the cap: AB1755 (1998) established the cap at “one-tenth of 1 percent”; AB58 (2002) at “one-half of 1 percent”; SB1 (2006) at “2.5 percent”.  
3 PU Code Section (c)(1) states, “Every electric utility shall develop a standard contract or tariff providing for net energy metering, and shall make this standard contract or tariff available to eligible customer-generators, upon request, on a first-come-first-served basis until the time that the total rated generating capacity used by eligible customer-generators exceeds 5 percent of the electric utility's aggregate customer peak demand.”  
4 PU Code Section (c)(4) states, “An electric utility is not obligated to provide net energy metering to additional eligible customer-generators in its service area when the combined total peak demand of all electricity used by eligible customer-generators served by all the electric utilities in that service area furnishing net energy metering to eligible customer-generators exceeds 5 percent of the aggregate customer peak demand of those electric utilities.”  
5 On November 5, 2009, PG&E took the initiative and submitted Advice 3555-E to raise the cap from 2.5 percent to 3.5 percent for its NEM tariff. This filing was approved December 7, 2009. This same advice letter also detailed how PG&E calculates the current NEM interconnection capacity status.
In addition to increasing the NEM cap, AB 510 included a new provision requiring certain customers to complete an inspection of their existing generators when a new contract for interconnection is issued (e.g., when a customer with a system larger than 30 kW moves and a new customer assumes ownership of the PV system). AB 510 added the following new provision in PU Code Section 2827(c) (2):

An electrical corporation shall include a provision in the net energy metering contract or tariff requiring that any customer with an existing electrical generating facility and meter who enters into a new net energy metering contract shall provide an inspection report to the electrical corporation, unless the electrical generating facility and meter have been installed or inspected within the previous three years. The inspection report shall be prepared by a California licensed contractor who is not the owner or operator of the facility and meter. A California licensed electrician shall perform the inspection of the electrical portion of the facility and meter. [Emphasis added]

PG&E’s current policy is stipulated in Advice 3068-E, which requires only customers with generating facilities with a capacity over 30 kilowatts to complete a new interconnection contract when there is a change of party. This same customer group, consistent with the AB 510, will be required to have an inspection in accordance with the statute.

Currently, customers who modify their existing systems such that a new engineering review by PG&E is required, are already treated the same as new installations. These customers must provide PG&E with a final building permit from the government agency with jurisdiction over the PV system prior to PG&E completing a new interconnection agreement with these customers. PG&E intends to treat these customers as “new” installations and reset the three-year clock on the AB 510 inspection requirement for these projects.

PG&E also has customers who have an existing solar and/or wind system generator that are eligible but do not receive service under Electric Schedule NEM. If these customers subsequently decide to switch to Electric Schedule NEM service without making any system changes, then the customer is required to: 1) send PG&E a new signed agreement to begin service and 2) complete an inspection, regardless of system size.

PG&E has worked extensively with Southern California Edison (SCE) and San Diego Gas and Electric (SDG&E) over the past few months to develop a standard re-inspection form, which allows for differences between the utilities. This should ensure a consistent approach to satisfy the re-inspection requirements of AB510.
Tariff Revisions

- In the Applicability section of Electric Schedules NEM and NEMVNMA tariffs, the existing “three and one half (3.5%) percent” is changed to “five (5%) percent.”  

- A new Special Condition 8 is added to Electric Schedule NEM and a comparable new Special Condition 5 is added to Electric Schedule NEMVNMA based on PU Code 2827(c)(2), which states the following:

  Pursuant to Public Utilities Code Section.2827(c)(2), any customer with an existing electrical generating facility and meter who enters into a new net energy metering contract (for example, form 79-1109 Virtual Net Energy Metering Application and Interconnection Agreement For the Building Owner of Multifamily Affordable Building With a Solar Generating Facility of 1 Megawatt or Less ) shall complete and submit a copy of form 79-1125 – NEM / NEMVNMA Inspection Report to the PG&E, unless the electrical generating facility and meter have been installed or inspected within the previous three years. The NEM Inspection Report shall be prepared by a California licensed contractor who is not the owner or operator of the facility and meter. A California licensed electrician shall perform the inspection of the electrical portion of the facility and meter and sign the NEM / NEMVNMA Inspection Report. If an inspection is required, the customer shall submit the fully completed NEM / NEMVNMA Inspection Report to PG&E within 90 days of the customer becoming the customer of record at this account, or else the customer agrees to disconnect their Generating Facility and inform PG&E it no longer will take service on schedule NEM or NEMVNMA. By signing the interconnection agreement, the NEM / NEMVNMA Inspection Report shall be incorporated into it. [Emphasis added.]

- A new Sample Form 79-1125, NEM / NEMVNMA Inspection Report, is created, which will be: 1) submitted by the customer, 2) signed by an California Licensed Electrical contractor, and 3) provided to PG&E before a new interconnection agreement is approved as required by PU Code 2827(c)(2).

Protests

Anyone wishing to protest this filing may do so by letter sent via U.S. mail, by facsimile or electronically, any of which must be received no later than January 3, 2011, which is 20 days after the date of this filing. Protests should be mailed to:

\[\text{Id. at 5, footnote 5.}\]
Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest also should be sent via U.S. mail (and by facsimile and electronically, if possible) to PG&E at the address shown below on the same date it is mailed or delivered to the Commission:

Jane K. Yura
Vice President, Regulatory Relations
Pacific Gas and Electric Company
77 Beale Street, Mail Code B10B
P.O. Box 770000
San Francisco, California 94177

Facsimile: (415) 973-6520
E-mail: PGETariffs@pge.com

Effective Date

PG&E requests that this advice filing become effective on regular notice, **January 13, 2011**, which is 30 calendar days after the date of filing.

Notice

In accordance with General Order 96-B, Section IV, a copy of this advice letter is being sent electronically and via U.S. mail to parties shown on the attached list. Address changes to the General Order 96-B service list and all electronic approvals should be directed to PGETariffs@pge.com. Advice letter filings can also be accessed electronically at: [http://www.pge.com/tariffs](http://www.pge.com/tariffs).

**Advice Letter (AL) #: 3778-E**

**Subject of AL:** Revisions to Electric Rate Schedules NEM and NEMVNMA in Compliance with Assembly Bill 510 to Increase the Participation Cap to 5% and Add an Inspection Reporting Requirement

**Keywords (choose from CPUC listing):** Net Metering, Compliance

**AL filing type:** ☑ One-Time

**If AL filed in compliance with a Commission order, indicate relevant Decision/Resolution #:** N/A

**Does AL replace a withdrawn or rejected AL?** If so, identify the prior AL: No

**Summarize differences between the AL and the prior withdrawn or rejected AL:** N/A

**Is AL requesting confidential treatment?** If so, what information is the utility seeking confidential treatment for: No

**Confidential information will be made available to those who have executed a nondisclosure agreement:** N/A

**Name(s) and contact information of the person(s) who will provide the nondisclosure agreement and access to the confidential information:** N/A

**Resolution Required?** ☑ Yes  No

**Requested effective date:** January 13, 2011  
**No. of tariff sheets:** 11

**Estimated system annual revenue effect (%):** N/A  
**Estimated system average rate effect (%):** N/A  

When rates are affected by AL, include attachment in AL showing average rate effects on customer classes (residential, small commercial, large C/I, agricultural, lighting). N/A

**Tariff schedules affected:** Electric Schedules NEM and NEMVNMA and new Electric Sample Form 79-1125

**Service affected and changes proposed:** N/A

Protests, dispositions, and all other correspondence regarding this AL are due no later than 20 days after the date of this filing, unless otherwise authorized by the Commission, and shall be sent to:

ELECTRIC SCHEDULE NEM

NET ENERGY METERING SERVICE

APPLICABILITY: This net energy-metering schedule is applicable to a customer who uses a solar or wind turbine electrical generating facility, or a hybrid system of both, with a capacity of not more than 1,000 kilowatts that is located on the customer’s owned, leased, or rented premises, is interconnected and operates in parallel with PG&E’s transmission and distribution systems, including wind energy co-metering customers as defined in California Public Utilities Code Section 2827.8, and is intended primarily to offset part or all of the customer’s own electrical requirements (hereinafter “eligible customer-generator” or “customer”). Certain incremental billing and metering costs set forth in this schedule that are related to net energy metering are applicable to Energy Service Providers (ESPs) serving eligible customer-generators.

This service is not applicable to a Direct Access (DA) or Community Choice Aggregation Service (CCA Service) customer where the customer’s ESP or Community Choice Aggregator (CCA) does not offer a net energy metering tariff. In addition, if an eligible customer-generator participates in direct transactions with an ESP that does not provide distribution service for the direct transactions, the ESP, and not PG&E, is obligated to provide net energy metering to the customer.

This rate schedule is available on a first-come, first-served basis to customers that provide PG&E with: (a) a completed Net Energy Metering Application including all supporting documents and required payments; AND (b) a completed signed Net Energy Metering Interconnection Agreement; AND (c) evidence of the customer’s final inspection clearance from the governmental authority having jurisdiction over the generating facility; until such time as the total rated generating capacity used by eligible customer-generators on Rate Schedule NEM and NEMVNMA exceeds five (5) percent of PG&E’s aggregate customer peak demand.

The total rated generating capacity will be calculated as the sum of all of the following:

1) For each PV generating facility, PG&E will use the California Energy Commission’s (CEC) AC rating; or where the CEC AC rating is not available, PG&E will multiply the inverter AC nameplate rating by 0.86.

2) For wind customer-generators, PG&E will use the AC nameplate rating of the wind generating facility.

PG&E’s aggregate customer peak demand will be based on the highest, published peak demand shown in the Federal Energy Regulatory Commission (FERC) Form 1, Page 401b as reported by PG&E. Once the Cap has been reached, Schedule NEM will be closed to new customers.

Customers seeking generator interconnections in portions of San Francisco and Oakland where PG&E has a network grid must contact PG&E about generation export limitations.
SPECIAL CONDITIONS: (Cont’d.)

3. INTERCONNECTION: Prior to receiving approval for Parallel Operation, the customer-generator must submit a completed PG&E application form and interconnection agreement as follows:

<table>
<thead>
<tr>
<th>Rate Option</th>
<th>Application</th>
<th>Interconnection Agreement</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

(Continued)
3. INTERCONNECTION: (Cont’d.)

   The eligible customer-generator must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the California Public Utilities Commission regarding safety and reliability.

4. EXEMPTIONS FROM CERTAIN CHARGES: Per Section 2827.7 of the California Public Utilities Code, eligible customer-generators who have all local and state permits required to commence construction of their generating facilities on or before December 31, 2002, and have completed construction on or before September 30, 2003, shall not be required to pay non-bypassable charges on Departing Load including Public Purpose Program charges and shall be entitled to the net energy metering terms in effect on the date the local and state permits were acquired, for the life of the generating facility, regardless of any change in customer or ownership of the generating facility.
SPECIAL CONDITIONS:
(Cont’d.)

7. Establishing a True-up Date For Net Surplus Electricity Compensation

Starting January 1, 2011, a NEM customer with “net surplus electricity” (all electricity generated by an eligible customer measured in kilowatt-hours over a 12-month period that exceeds the amount of electricity consumed by that eligible customer), will be provided with options regarding net surplus compensation. In the interim period, NEM customers may choose to:

(a) automatically be eligible to elect to receive any true-up net surplus electricity compensation starting on their account’s regular 2011 true-up and thereafter; or

(b) request that PG&E perform their 2010 true-up on their account (if it has not already been trued-up in 2010), so that the customer may elect to receive any true-up net surplus electricity compensation starting in 2011 on a new, earlier 12-month true-up date. Once PG&E receives a written request for true-up from the customer, PG&E will perform the 2010 true-up setting the new date, but the NEM customer’s surplus electricity, if any surplus exists, will be zeroed out.

(c) not receive any true-up net surplus electricity compensation under this Special Condition by notifying PG&E in writing that they do not want to participate. PG&E will treat any true-up net surplus electricity as described in Special Condition 2(f).

8. Pursuant to Public Utilities Code Section 2827(c)(2), any customer with an existing electrical generating facility and meter who enters into a new net energy metering contract (for example, Sample Form 79-978, Interconnection Agreement for Net Energy Metering of Solar and Wind Electric Generating Facilities of 1,000 Kilowatts or Less, other than Facilities of 30 Kilowatts or Less) shall complete and submit a copy of form 79-1125 – NEM / NEMVNMA Inspection Report to the PG&E, unless the electrical generating facility and meter have been installed or inspected within the previous three years. The NEM Inspection Report shall be prepared by a California licensed contractor who is not the owner or operator of the facility and meter. A California licensed electrician shall perform the inspection of the electrical portion of the facility and meter and sign the NEM / NEMVNMA Inspection Report. If an inspection is required, the customer shall submit the fully completed NEM / NEMVNMA Inspection Report to PG&E within 90 days of the customer becoming the customer of record at this account, or else the customer agrees to disconnect their Generating Facility and inform PG&E it no longer will take service on schedule NEM or NEMVNMA. By signing the interconnection agreement, the NEM / NEMVNMA Inspection Report shall be incorporated into it.
ELECTRIC SCHEDULE NEMVNMA
VIRTUAL NET ENERGY METERING FOR MULTIFAMILY
AFFORDABLE HOUSING (MASH/NSHP) WITH SOLAR GENERATOR(S)

APPLICABILITY: In addition, Applicability options (c.) and (d.) above are available to both new and existing NEMVNMA applicants, as long as they meet all the requirements of (c.) or (d.) and submit an application for multiple Customer Service Delivery Points by no later than December 31, 2011.

An “Eligible Low Income Development” is defined as all of the real property and apparatus employed in a single low income housing enterprise on contiguous parcels of land. These parcels may be divided by a dedicated street, highway or public thoroughfare or railway, so long as they are otherwise contiguous and part of the same single low income housing enterprise, and all under the same ownership.

Each of the four options a. through d. above is referred to in this tariff as a “Eligible Low Income Facility.”

NEMVNMA is available on a first-come, first-served basis to Customers with an Eligible Low Income Facility that provide PG&E with:

a. a completed NEMVNMA application and interconnection agreement as described in Special Condition 3, including all supporting documents and required payments; AND

b. evidence of the final inspection clearance from the governmental authority having jurisdiction over the Solar Generating Facility; until such time as the total rated generating capacity on Rate Schedules NEM and NEMVNMA exceeds five (5) percent of PG&E’s aggregate peak demand (calculated as described in Rate Schedule NEM), until December 31, 2015, or until all funds available for the incentives have been allocated, whichever comes first.

Generator Size - Size the generator(s) no larger than for the energy requirements of all eligible account types of the past year for existing housing and estimated requirements of new housing. Specific size limit details will be determined by the relevant incentive program (MASH or NSHP) handbooks. These generator size limits apply to all Eligible Low Income Developments whether they actually receive MASH or NSHP incentives or not.
### ELECTRIC SCHEDULE NEMVNMA

**VIRTUAL NET ENERGY METERING FOR MULTIFAMILY AFFORDABLE HOUSING (MASH/NSHP) WITH SOLAR GENERATOR(S)**

**SPECIAL CONDITIONS:** (Cont’d.)

3. **INTERCONNECTION:**

   In order to receive approval for Parallel Operation of the Solar Generating Facilities, the Owner must submit a completed PG&E application form and interconnection agreement as follows:

ELECTRIC SCHEDULE NEMVNMA
VIRTUAL NET ENERGY METERING FOR MULTIFAMILY
AFFORDABLE HOUSING (MASH/NSHP) WITH SOLAR GENERATOR(S)

SPECIAL CONDITIONS:
(Cont’d.)

4. ESTABLISHING A TRUE-UP DATE FOR NET SURPLUS ELECTRICITY
COMPENSATION:

Starting January 1, 2011, a NEMVNMA customer with "net surplus electricity" (all
electricity generated by an eligible customer measured in kilowatt-hours over a 12-
month period that exceeds the amount of electricity consumed by that eligible
customer), will be provided with options regarding net surplus compensation. In the
interim period, NEMVNMA customers may choose to:

(a) automatically be eligible to elect to receive any true-up net surplus electricity
compensation starting on their account’s regular 2011 true-up and thereafter; or

(b) request that PG&E perform their 2010 true-up on their account (if it has not already
been true-up in 2010), so that the customer may elect to receive any true-up net
surplus electricity compensation starting in 2011 on a new, earlier 12-month true-up
date. Once PG&E receives a written request for true-up from the customer, PG&E
will perform the 2010 true-up setting the new date, but the NEM customer’s surplus
electricity, if any surplus exists, will be zeroed out.

(c) not receive any true-up net surplus electricity compensation under this Special
Condition by notifying PG&E in writing that they do not want to participate. PG&E
will treat any true-up net surplus electricity as described in Special Condition 2(g).

5. RE-INSPECTION: Pursuant to Public Utilities Code Section.2827(c)(2), any customer
with an existing electrical generating facility and meter who enters into a new net
energy metering contract (for example, form 79-1109 Virtual Net Energy Metering
Application and Interconnection Agreement For the Building Owner of Multifamily
Affordable Building With a Solar Generating Facility of 1 Megawatt or Less ) shall
complete and submit a copy of form 79-1125 – NEM / NEMVNMA Inspection Report to
the PG&E, unless the electrical generating facility and meter have been installed or
inspected within the previous three years. The NEM Inspection Report shall be
prepared by a California licensed contractor who is not the owner or operator of the
facility and meter. A California licensed electrician shall perform the inspection of the
electrical portion of the facility and meter and sign the NEM / NEMVNMA Inspection
Report. If an inspection is required, the customer shall submit the fully completed
NEM / NEMVNMA Inspection Report to PG&E within 90 days of the customer
becoming the customer of record at this account, or else the customer agrees to
disconnect their Generating Facility and inform PG&E it no longer will take service on
schedule NEM or NEMVNMA. By signing the interconnection agreement, the NEM /
NEMVNMA Inspection Report shall be incorporated into it.
Electric Sample Form 79-1125
NEM Inspection Report

Please Refer to Attached
Sample Form
Who needs to complete this Inspection Report?

A customer:

- who becomes a PG&E customer at a home, office or other facility having with an existing solar (PV) or wind electrical generating facility with plans to remain interconnected with PG&E on Rate Schedule NEM and
- who must complete a new net energy metering contract (for example, form no 79-978 NEMEXP Interconnection Agreement) with PG&E for the existing generating facility and
- whose electrical generating facility and meter have not been installed or inspected within the previous three years and
- who must arrange to have their generating facility inspected and the Contractor section of this report completed by a California licensed electrician who is not the owner or operator of the facility and meter.

This NEM / NEMVNMA INSPECTION REPORT ("Report"), pursuant to Public Utilities Code Section 2827c(2), shall be completed and submitted by a PG&E customer who enters into a new net energy metering contract (for example, form 79-978 NEMEXP Interconnection Agreement) for an existing and unmodified NEM eligible electrical generating facility (Generating Facility) and meter. The customer shall submit to PG&E this completed inspection report with the interconnection agreement for the Generating Facility, that passes all the Operational Tests in Part II Section J, unless the Generating Facility and meter have been installed or inspected within the previous three years. Part II of the inspection report shall be prepared by a California licensed contractor who is not the owner or operator of the Generating Facility and meter. A California licensed electrician ("Inspector") shall perform the inspection of the electrical portion of the Generating Facility and meter.

Instructions

1) The Customer shall complete all of Part I and complete Part A of Part II. The Customer information in Part A should match that in Part I.

2) The Customer should arrange to have the Inspector inspect their Generating Facility and complete the reminder of Part II of this form and sign it.

3) The customer shall then submit the fully completed Report to PG&E.

If this form is not submitted within 90 days of the Customer becoming the customer of record for this account, Customer agrees to disconnect their Generating Facility and inform PG&E it no longer will take service on schedule NEM or NEMVNMA.

For the safety of the Customer and PG&E employees, under no circumstances shall the Generating Facility be operated while interconnected with PG&E if it does not pass the Operational Test in Part II, Section J.

1 Automated Document, Preliminary Statement, Part A.

</tr>
</thead>
</table>

☐ This contact person is to be used as PG&E contact and is authorized by Customer to receive confidential Customer information and act on behalf of Customer with respect to this agreement.²

C. Modifications

To your knowledge, has the system been modified in any way? ☐ No ☐ Yes

D. Installation Date

Do you know when this Generating Facility was installed? ☐ No ☐ Yes, Installed on? (__________________) (date)

E. Last Inspection Date

Do you know if this Generating Facility had a prior PG&E inspection? ☐ No ☐ Yes

Date of last inspection? ________________

---

² Customer must utilize the “Authorization to Receive Customer Information or Act on a Customer’s Behalf” form, which may be found at www.pge.com/includes/docs/pdfs/shared/newgenerator/solarwindgenerators/standardenet/customer_behalf_app.pdf.
F. By the Customer signing the attached new NEM Interconnection Agreement form 79-978, or other new NEM or NEMVNMA interconnection agreement as specified form 79-______ __, this NEM / NEMVNMA Inspection Report is hereby incorporated into that interconnection agreement.

A copy of this signed report should be retained with the "Permission to Operate" letter to confirm successful Generating Facility inspection.

Mailing Instructions and Assistance:

When this report has been completed it should be mailed to:

<table>
<thead>
<tr>
<th>PG&amp;E’S P.O. BOX ADDRESS</th>
<th>PG&amp;E’S STREET ADDRESS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pacific Gas and Electric Company</td>
<td>Pacific Gas and Electric Company</td>
</tr>
<tr>
<td>Attention: Generation Interconnection Services</td>
<td>Attention: Generation Interconnection Services</td>
</tr>
<tr>
<td>Mail Code N7L</td>
<td>Mail Code N7L</td>
</tr>
<tr>
<td>P.O. Box 770000</td>
<td>245 Market St.</td>
</tr>
<tr>
<td>San Francisco, California 94177</td>
<td>San Francisco, California 94105</td>
</tr>
</tbody>
</table>

If this Report has been completed electronically, it may be submitted to PG&E via e-mail or U.S. mail. Copies or forms requiring a signature, attachments or any applicable fees described in Part II must be mailed to PG&E at the address noted in Section IV (F), Notices.

Phone calls and questions may be directed to the Generation Interconnection Services hotline at: 415-972-5676 or email gen@pge.com
## Part II – Electrical Inspector Section

### A. Inspection Information
(to be filled in by the Customer – must match information in Part I)

<table>
<thead>
<tr>
<th>Generating Facility PG&amp;E Account Holder Name (Must Match Customer Name on PG&amp;E Blue Bill for generator)</th>
<th>PG&amp;E Account Number for Generating Facility</th>
<th>Meter Number (Meter Badge ID)</th>
<th>Generator Address</th>
</tr>
</thead>
</table>

To be completed by Inspector

### B. Inspector Information

<table>
<thead>
<tr>
<th>California licensed Electrician Name</th>
<th>Company Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Currently Valid California Electrician License Number</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Mailing Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>City</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Business Phone</th>
<th>Fax</th>
<th>Email</th>
</tr>
</thead>
</table>

### C. Inverters interconnected with PG&E

List all the inverters that currently are interconnected to PG&E at this Generating Facility.

<table>
<thead>
<tr>
<th>No.</th>
<th>Inverter Manufacturer</th>
<th>Inverter Model Number</th>
<th>Inverter Nameplate Rating(^3) kW (per unit)</th>
<th>Inverter CEC Rating kW (per unit)</th>
<th>Quantity of Inverters</th>
<th>Inverter Output Voltage</th>
<th>Single or Three phase?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### D. Inverter CEC Approved

Are all the inverter models listed above currently listed on the [http://www.gosolarcalifornia.ca.gov/equipment/](http://www.gosolarcalifornia.ca.gov/equipment/) website?

- Yes □ No □

\(^3\) The inverter rating equals the nameplate rating, in kW. If there are more than one inverter of one type being installed, the inverter rating equals the nameplate rating of one unit of the model being installed.
E. Photovoltaic Generator Equipment
List the photovoltaic (PV) panel information requested below. If the panels are not all identical modules, list the total capacity connected to each inverter you listed above. (Please attach additional sheets if more space is needed.)

<table>
<thead>
<tr>
<th>No.</th>
<th>PV Panel Manufacturer</th>
<th>PV Panel Model</th>
<th>PV Panel Nameplate Rating5 kW (per unit)</th>
<th>PV Panel CEC Rating kW (per unit)</th>
<th>Quantity of PV Panels</th>
<th>Total Capacity6 (kW)</th>
<th>Inverter number from (B.) above (1 or 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

F. PV Panels CEC Approved
Are all the PV panel models listed above currently listed on the [http://www.gosolarcalifornia.ca.gov/equipment/](http://www.gosolarcalifornia.ca.gov/equipment/) website?

□ Yes  □ No

G. Wind Turbine Equipment (if applicable)
List the wind turbine information requested below. Write NONE if the inverter is incorporated in the wind turbine and no inverter is required.

<table>
<thead>
<tr>
<th>No.</th>
<th>Wind Turbine Manufacturer</th>
<th>Wind Turbine Model</th>
<th>Wind Turbine Nameplate Rating8 kW (per unit)</th>
<th>Wind Turbine CEC Rating kW per unit</th>
<th>Quantity of Wind Turbines</th>
<th>Total Capacity9 (kW)</th>
<th>Turbine Output Voltage</th>
<th>Single or Three Phase</th>
<th>Inverter number from (B) above (1 or 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

H. Wind Turbine CEC Approved
Are all the wind turbine models listed above currently listed on the [http://www.gosolarcalifornia.ca.gov/equipment/](http://www.gosolarcalifornia.ca.gov/equipment/) website?

□ Yes  □ No

I. Other Interconnected Generators
Are there other generators interconnected on this account at this location?  □ Yes  □ No

If Yes, list generator technology and capacity for all generators

Are there any backup generators?  □ Yes  □ No

---

4 Equipment not currently listed on the Go Solar website, or equipment formerly listed but no longer listed, may be subject to additional review or testing before being authorized to continue interconnection with PG&E, depending on the reason it is no longer listed.

5 For all generation equipment ratings, please use the nameplate rating found on the equipment or in the equipment specifications.

6 The total capacity is the photovoltaic (PV) panel (or wind turbine) rating times the quantity.

7 Id. Footnote 4 above.

8 Id. Footnote 6 above.

9 Id. Footnote 4 above.
If yes, there are backup generators, is the back-up generator is open or close transition? 
□ Open  □ Closed

J. Operational Tests

1.) Anti-islanding test
Pursuant to PG&E’s Electric Rule 21 section D.1.a.(3) verify the Generating Facility ceases to output within two seconds of opening the disconnect switch or otherwise disconnecting the Generating Facility from PG&E electrical system.

       Passes test? □ Yes

2.) Reclose and return to service within Rule 21 guidelines
Pursuant to PG&E’s Electric Rule 21 section D.1.a.(2), verify that the time-delay function reconnects the Generating Facility with PG&E’s Distribution System after at least 60 seconds.

       Passes test? □ Yes

K. Governing Authority
The terms and conditions of this inspection report shall at all times be subject to such changes or modification by the Public Utilities Commission of the State of California as said Commission may, from time to time, direct in the exercise of its jurisdiction.

L. Inspector Signature
I certify that I am currently a California licensed electrician, that the responses given in Part II of this Report for the Generating Facility are true and accurate to the best of my knowledge, and that the Generating Facility satisfies the Operational Tests in Part II, Section I.

Name California licensed electrical contractor (Please Print):  

Name California licensed electrical contractor Signature: _______________________________ Date:___________

California licensed electrician License No: _______________________________
