San Francisco, CA  94177

Subject:  PG&E’s Procurement Transactions for the First Quarter of 2013

Dear Mr. Cherry:

PG&E’s procurement transactions for the first quarter of 2013 are approved with the exception of the noncompliant gas hedging transactions, which will be subject to review under PG&E’s Energy Resource Recovery Account (ERRA) application.

Sincerely,

Edward F. Randolph
Director, Energy Division
April 30, 2013

Advice 4220-E
(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Procurement Transaction Quarterly Compliance Filing (Q1, 2013)

Pacific Gas and Electric Company ("PG&E") hereby submits to the California Public Utilities Commission ("Commission" or "CPUC") its compliance filing for the first quarter of 2013 in conformance with PG&E’s Bundled Procurement Plan ("BPP") approved by the Commission in Decision ("D.") 12-01-033. PG&E’s submittal of this Procurement Transaction Quarterly Compliance Report ("QCR") for record period January 1, 2013, through March 31, 2013, (Q1-2013) is in accordance with D.03-12-062, Ordering Paragraph 19, which requires that the Quarterly Procurement Plan Compliance Reports be submitted within 30 days of the end of the quarter.

Background

In D.07-12-052, the Commission directed Energy Division and the Investor-Owned Utilities ("IOUs") to continue the collaborative effort to develop a reformatted QCR. The Commission authorized Energy Division to implement a reformatted QCR and to make ministerial changes to the content and format of the report as needs arise. Energy Division and the IOUs finalized the QCR format in December 2008. This QCR is consistent with the final format authorized by Energy Division on December 15, 2008.

Compliance Items

Attachment 1 to this QCR includes a narrative with supporting Confidential Appendices that conforms to the reformatted QCR. The public version of Attachment 1 only includes the Narrative, which is not confidential. The confidential version of this QCR includes the following supporting Confidential Appendices:
Appendix A – First Quarter 2013 Electric and Natural Gas Transactions
Appendix B – First Quarter 2013 Counter-Party Information
Appendix C – First Quarter 2013 Electric Transactions Summary
Appendix D – First Quarter 2013 Natural Gas Transactions Summary
Appendix E – First Quarter 2013 Other Transactions
Appendix F – First Quarter 2013 Key Briefing Packages
Appendix G – First Quarter 2013 Independent Evaluator Reports
Appendix H – First Quarter 2013 New Contracts Executed/Contracts Amended
Appendix I – Summary of Retained Generation Investments Completed During First Quarter 2013
Appendix J – System Load Requirements/Conditions
Appendix K – Risk Management Strategy Communication and Management Disclosure
Appendix L – Reasonable Number of Analyses Models, Description of Models, and How Models Operate
Appendix M – Transactions Subject to Strong Showing

Attachment 2 to this QCR includes a confidentiality declaration and matrix.

**Protests**

Anyone wishing to protest this filing may do so by letter sent via U.S. mail, facsimile or E-mail, no later than **May 20, 2013**, which is 20 days after the date of this filing. Protests must be submitted to:

CPUC Energy Division
ED Tariff Unit
505 Van Ness Avenue, 4th Floor
San Francisco, California 94102

Facsimile: (415) 703-2200
E-mail: EDTariffUnit@cpuc.ca.gov

Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest shall also be sent to PG&E either via E-mail or U.S. mail (and by facsimile, if possible) at the address shown below on the same date it is mailed or delivered to the Commission:
Any person (including individuals, groups, or organizations) may protest or respond to an advice letter (General Order 96-B, Rule 7.4). The protest shall contain the following information: specification of the advice letter protested; grounds for the protest; supporting factual information or legal argument; name, telephone number, postal address, and (where appropriate) e-mail address of the protestant; and statement that the protest was sent to the utility no later than the day on which the protest was submitted to the reviewing Industry Division (General Order 96-B, Rule 3.11).

Effective Date

In accordance with D.02-10-062, the requested effective date of this Tier 2 advice letter is May 1, 2013.

Notice

In accordance with General Order 96-B, Section IV, a copy of this advice letter excluding the confidential appendices is being sent electronically and via U.S. mail to parties shown on the attached list and the service lists for Rulemaking ("R.") R.12-03-014, R.01-10-024, and R.11-10-023. Address changes to the General Order 96-B service list and all electronic approvals should be sent to e-mail PGETariffs@pge.com. For changes to any other service list, please contact the Commission's Process Office at (415) 703-2021 or at Process_Office@cpuc.ca.gov. Advice letter filings can also be accessed electronically at: http://www.pge.com/tariffs.

Vice President – Regulatory Relations

Advice Letter (AL) #: **4220-E**  Tier: **2**

Subject of AL: **Procurement Transaction Quarterly Compliance Filing (Q1, 2013)**

Keywords (choose from CPUC listing): **Compliance, Procurement**

AL filing type: ☑ Quarterly  ☐ Annual  ☐ One-Time  ☐ Other

If AL filed in compliance with a Commission order, indicate relevant Decision/Resolution #: **D. 12-01-033 and D.03-12-062**

Does AL replace a withdrawn or rejected AL?  If so, identify the prior AL: **No**

Summarize differences between the AL and the prior withdrawn or rejected AL: ______________________

Is AL requesting confidential treatment?  If so, what information is the utility seeking confidential treatment for: **Yes**  Please see attached Declaration and Matrix

Confidential information will be made available to those who have executed a nondisclosure agreement: ☐ Yes  ☐ No

Name(s) and contact information of the person(s) who will provide the nondisclosure agreement and access to the confidential information: **Sharon Tatai, (415) 973-2788 / Michael Kowalewski (415) 972-5589**

Resolution Required?  ☑ Yes  ☐ No

Requested effective date: **May 1, 2013**  No. of tariff sheets: **N/A**

Estimated system annual revenue effect (%): **N/A**

Estimated system average rate effect (%): **N/A**

When rates are affected by AL, include attachment in AL showing average rate effects on customer classes (residential, small commercial, large C/I, agricultural, lighting).

Tariff schedules affected: **N/A**

Service affected and changes proposed: **N/A**

Pending advice letters that revise the same tariff sheets: **N/A**

Protests, dispositions, and all other correspondence regarding this AL are due no later than 20 days after the date of this filing, unless otherwise authorized by the Commission, and shall be sent to:

**California Public Utilities Commission**

A. Introduction

As required by Ordering Paragraph (OP) 8 of Decision (D.) 02-10-062, and clarified in D.03-06-076, D.03-12-062, D.04-07-028, D.04-12-048 and D.07-12-052, Pacific Gas and Electric Company (PG&E) hereby provides its report demonstrating that its procurement-related transactions during the period January 1, 2013 through March 31, 2013 (Quarter) were in compliance with PG&E’s Bundled Procurement Plan (BPP or Plan) approved by the California Public Utilities Commission (CPUC or Commission) in D.12-01-033.

B. Summary

During the Quarter, PG&E engaged in competitively priced transactions consistent with its Plan. All transactions were conducted using processes specified in the Plan. During the Quarter, PG&E issued: (1) the 2013 Resource Adequacy Request for Offer (RFO) (March 12, 2013), (2) the Intermediate Term RFO (March 26, 2013), (3) the Gas Storage RFO (January 10, 2013), and (4) the Greenhouse Gas (GHG) Offset Credit RFO (March 25, 2013). Of these RFOs, only the Gas Storage RFO resulted in an executed contract during the Quarter.

PG&E also engaged in other procurement activities which are approved through separate regulatory processes. These activities include conducting competitive solicitations and activities related to the following: (1) PG&E’s 2012 Renewable Portfolio Standard (RPS) Plan; and (2) the Qualifying Facility/Combined Heat and Power (QF/CHP) Settlement, which became effective on November 23, 2011. PG&E continues to evaluate offers in the Renewable Auction Mechanism Auction 3 and the 2012 RPS RFO. In addition, during the Quarter, PG&E issued the Second CHP RFO (February 20, 2013).

A summary of the information included in each confidential attachment is:

---

1 The QF/CHP Settlement Agreement indicates that each Investor-Owned Utility shall conduct three RFOs during the “Initial Program Period” (or 48 months following the Settlement Effective Date) exclusively for CHP resources as a means of achieving its megawatt (MW) and GHG emissions reduction targets (see Term Sheet, Sections 4.2 and 5.1). PG&E issued its First CHP RFO on December 7, 2011.
Confidential Attachment A, *First Quarter 2013 Transactions*, provides a summary of all transactions executed during the Quarter, which are less than five years in length and that have not been filed through a separate advice filing or application.

Confidential Attachment B, *First Quarter 2013 Counterparty Information*, provides a summary of (1) all non-investment grade counterparties with whom PG&E transacted; and (2) the top 10 counterparties by volume during the Quarter.

Confidential Attachment C, *First Quarter 2013 Electric Transactions Summary*, provides a summary of the electric transactions executed during the Quarter.

Confidential Attachment D, *First Quarter 2013 Natural Gas Transactions Summary*, provides a summary of the gas transactions executed during the Quarter.

Confidential Attachment E, *First Quarter 2013 Other Transactions*, provides the executed transactions resulting from non-energy-related products during the Quarter.

Confidential Attachment F, *First Quarter 2013 Key Briefing Packages*, provides a summary of all relevant Procurement Review Group (PRG) agendas and presentations presented.

Confidential Attachment G, *First Quarter 2013 Independent Evaluator Reports*, provides any relevant Independent Evaluator (IE) report completed in the Quarter.

Confidential Attachment H, *First Quarter 2013 New Contracts Executed/Contracts Amended*, provides a summary of all agreements executed and/or amended in the Quarter.

Confidential Attachment I, *Summary of Retained Generation Investments Completed During First Quarter 2013*, provides a summary of any investments related to retained generation facilities and multiple contracts for the same supplier, resource or facility, consistent with the requirements of D.07-01-039.

Confidential Attachment J, *System Load Requirements/Conditions*, provides a summary of all information related to addressing PG&E’s residual net open position.

Confidential Attachment K, *Risk Management Strategy Communication and Management Disclosure*, provides a summary of all procurement-related risk strategies and issues communicated to PG&E’s senior management and the PRG.
• Confidential Attachment L, *Reasonable Number of Analyses Models, Description of Models, and How Models Operate*, provides a summary of any models related to the relevant transactions identified in this filing.

• Confidential Attachment M, *Transactions Subject to Strong Showing*, provides a summary and supporting documentation of strong showing transactions.

### C. Master Data Request Documentation

D.02-10-062, Appendix B, as clarified by D.03-06-076, sets forth specific elements to be addressed in this report. Each element is discussed below.

1. **Identification of the ultimate decision maker(s) up to the Board level, approving the transactions.**

   All procurement-related activity during the Quarter was approved and executed either by, or under the direction of, Fong Wan, Senior Vice President, Energy Procurement; Roy Kuga, Vice President, Energy Supply Management; Gary Jeung, Senior Director, Renewable Energy; and/or Marino Monardi, Director, Portfolio Management, consistent with the delegation of authority effective for the period.

2. **The briefing package provided to the ultimate decision maker.**

   The “decision-maker” for a particular contemplated transaction depends on many factors, such as term, volume, and notional value. For many of the transactions during the Quarter, the “decision-maker” was a gas or power trading employee executing transactions (e.g., day-ahead or hour-ahead power purchases and sales) per an established plan or to achieve a particular objective (such as balancing the portfolio supply and demand). For such transactions, briefing packages are not prepared. Briefing packages prepared during the Quarter for transactions that required senior management approval are included in Confidential Attachment K, *Risk Management Strategy Communication and Management Disclosure*. In addition, copies of presentations made by PG&E to its PRG during the Quarter are included in Confidential Attachment F, *First Quarter 2013 Key Briefing Packages*. 
3. Description of and justification for the procurement processes used to select the transactions.

a) Electric Procurement – Description

The approved procurement processes used during the Quarter were as follows:

- **Electronic Exchanges** – During the Quarter, PG&E assessed the use of electronic broker market transactions to manage its physical net open position and to participate in economic transactions designed to reduce customers’ exposure to market volatility. Activities can include day-ahead transactions. Relevant
information can be found in Confidential Attachment A, *First Quarter 2013 Transactions*.

- **Bilateral Via Voice Broker** – During the Quarter, PG&E assessed the use of voice brokers, to execute directly with counterparties for term transactions. Relevant information can be found in Confidential Attachment A, *Transactions*.

- **Legacy Contracts (For informational purposes only)** – Under the QF/CHP Program described above, some QF generators holding a legacy contract converted to new Power Purchase Agreement (PPA) (i.e., Under 20 MW Public Utility Regulatory Policies Act PPA, Transition PPA, and As-Available PPA) during the Quarter. However, many of the remaining legacy QF contracts are still active and may require amendments or letter agreements to help the generator meet the requirements of the Commission’s new CHP Program (e.g., GHG administration and metering issues) that were not required under the former program.

**b) Electric Procurement – Justification for Procurement Processes**

- **For competitive solicitations, describe the process used to rank offers and select winning bid(s).**

  In Q1 2013, PG&E did not execute any offers resulting from competitive solicitations submitted in this Quarterly Procurement Transaction Compliance Report (QPTCR), and no IE Reports were issued.

- **For other transactional methods, provide the documentation supporting the selection of the chosen products.**

  - **CAISO Monthly CRR Allocation and Auction Process** – PG&E estimated that a portion of its generation, imports and load in the months of February, March and April 2013, remained exposed to congestion risk, and therefore participated in the CAISO’s Monthly CRR allocation and auction process to obtain CRRs to mitigate this risk. PG&E sought CRRs to fulfill the following objectives: (1) narrow the distribution of PG&E’s energy procurement costs
due to electric transmission congestion as measured by the electric
To-expiration-Value-at-Risk; and (2) reduce the expected congestion costs that
PG&E would incur in its operations.

PG&E acquires CRRs for any path (represented by a source-sink pair)
connecting existing generation sources to existing loads (retail loads, Helms
pumping load and wholesale load obligations) or for any path that PG&E
reasonably anticipates that it might need to flow energy in the future due to the
addition of new contracts, resources or load obligations. Additionally, there may
be CRRs which are positively correlated in value with CRRs for paths that have
limited availability. PG&E is authorized to acquire CRRs for such positively
correlated paths as well. Therefore, PG&E will obtain any CRRs that are
determined to be valuable as hedges against congestion costs at the time they are
offered, subject to risk assessment regarding the specific source/sink combinations
as approved in its BPP.

PG&E provided information regarding its CRR strategy to the PRG. Relevant
information is included in Confidential Attachment F, First Quarter 2013 Key
Briefing Packages, Confidential Attachment J, System Load
Requirements/Conditions, Confidential Attachment K, Risk Management Strategy
Communication and Management Disclosure, and Confidential Attachment L,
Reasonable Number of Analyses Models, Description of Models, and How Models
Operate.

- **Electronic Exchanges and Bilateral – Direct With Counterparties** – The
dynamic environment of the short-term electric markets requires that traders
have the ability to transact when market conditions are within parameters
described by a particular trading strategy. Prices vary during a trading session
as buyers and sellers adjust their prices in response to items such as electric
system conditions, market responses, industry news and weather forecasts. As
a result, it is common to see trades executed at different prices over the course of a trading session. The key aspect is that the transaction was executed within the parameters described by the monthly trading strategy and the terms of current master agreements and approved resolutions approval PG&E’s execution of specific transactions. PG&E maintains flexibility in its procurement activities by transacting in various forums, e.g., voice and on-line brokers, electronic exchanges, and directly with counterparties. Not all counterparties participate in a single forum; most transact in various forums. For the Quarter, PG&E did not use electronic exchanges or bilateral negotiations to execute transactions.

c) **Natural Gas Procurement – Description**

The approved procurement processes used during the Quarter for Natural Gas transactions were as follows:

- **Electronic Exchanges - Commodity Purchases/Sales – PG&E bought and sold physical natural gas on the Intercontinental Exchange (ICE) and the ICE Natural Gas Exchange (ICE/NGX) physical clearing service. ICE is an electronic system that matches buyers and sellers of natural gas products. Once buyer and seller are matched, ICE trades become bilateral trades. ICE/NGX trades are cleared by NGX**
rather than bilaterally. Transactions include forward transactions with deliveries starting within the next quarter and up to one month in duration, Balance of Month (BOM), day-ahead, and same-day. Relevant information is included in Confidential Attachment A, Transactions.

- **Electronic Exchanges - Gas Hedges** – In compliance with D.12-01-033, PG&E conducted hedging activities under its approved hedging plan. PG&E executed hedges (swaps, options and swaptions) directly on the ICE, and cleared through exchanges (ICE or the New York Mercantile Exchange (NYMEX)). ICE and NYMEX provide access to anonymous bids and offers establishing both a liquid and robust market for financial products, and a benchmark for bilateral products. These products include Henry Hub swaps and options, and basis swaps against the industry benchmark indices, including Canadian Gas Price Reporter (CGPR), Gas Daily, Natural Gas Intelligence (NGI) and Inside Federal Energy Regulatory Commission (IFERC) Gas Market Report. Relevant information is included in Confidential Attachment A, Transactions, and Confidential Attachment J, System Load Requirements/Conditions.

- **Bilateral - Commodity Purchases/Sales** – PG&E bought and sold gas directly with counterparties in the bilateral market. Spot gas is traded at fixed prices and Gas Daily or CGPR index. Term gas (longer than one forward-month) is purchased at fixed prices, daily index (Gas Daily or CGPR) or monthly or bid week index (CGPR, NGI, or IFERC) prices. Relevant information is included in Confidential Attachment A, Transactions.

- **Bilateral – Liquids Extraction Services** – On February 27, 2013, PG&E executed a letter agreement with Cochrane/Empress V Partnership (Cochrane) to provide PG&E liquids extraction services. Cochrane will extract liquid hydrocarbons from PG&E’s gas stream flowing in Alberta, Canada. In exchange, Cochrane will pay PG&E based on index prices published by the Oil Price Information Service.
Relevant information is included in Confidential Attachment E, *First Quarter 2013 Other Transactions*, and Confidential Attachment H, *First Quarter 2013 New Contracts Executed/Contracts Amended.*

- **Bilateral - Gas Parking and Lending** – PG&E purchased gas parking and/or lending services to balance its daily supplies with demand. The term of the parking and lending transactions was through the following (prompt) month or shorter.
  Relevant information is included in Confidential Attachment A, *Transactions*.

- **Voice Brokers - Gas Hedges** – PG&E executed hedges (swaps) through voice brokers that resulted in exchange-cleared trades. Brokers provide access to anonymous bids and offers from both bilateral parties and cleared counterparties. After a broker matches a buyer and a seller in a trade, the parties will determine whether the trade will be settled bilaterally or cleared through NYMEX or ICE. The broker market trades the same financial products as the bilateral market.
  Relevant information is included in Confidential Attachment A, *Transactions*.

**d) Natural Gas Procurement – Justification for Procurement Processes**

i. For competitive solicitations, describe the process used to rank offers and select winning bid(s).

- **Gas Storage RFO** – On January 10, 2013, PG&E issued a Request for Offers for Gas Storage Services (Gas Storage RFO). Offers were ranked primarily based upon a cost-benefit analysis, with benefits estimated based on the parameters of the offered services and forward price simulation. PG&E provided information regarding its Gas Storage RFO to the PRG. Relevant information is included in Confidential Attachment E, *First Quarter 2013 Other Transactions*, Confidential Attachment F, *First Quarter 2013 Key Briefing Packages*, Confidential Attachment H, *First Quarter 2013 New Contracts Executed/Contracts Amended*, and Confidential Attachment L,
Reasonable Number of Analyses Models, Description of Models, and How Models Operate.

- **Independent Evaluator Reports** - An IE Report is required for all competitive solicitations that either involve affiliate transactions or utility-owned or utility-turnkey bids, and for all competitive RFOs seeking products to satisfy service area need and supply-side resources greater than two years in length (and subject to QPTCR filings) regardless of the bidders. PG&E executed one competitive solicitation during the Quarter that met the above criteria. An IE Report for the Gas Storage RFO is provided in Confidential Attachment G, *First Quarter 2013 Independent Evaluator Reports*.

ii. **For other transactional methods, provide the documentation supporting the selection of the chosen products.**

- **Bilateral – Liquids Extraction Services** – On February 27, 2013, PG&E executed a letter agreement with Cochrane/Empress V Partnership (Cochrane) to provide PG&E liquids extraction services. PG&E chose to enter into a contract with Cochrane and receive revenues that will offset customers’ cost of natural gas for electricity production. PG&E provided information regarding the letter agreement with Cochrane to the PRG. Relevant information is included in Confidential Attachment E, *First Quarter 2013 Other Transactions*, and Confidential Attachment H, *First Quarter 2013 New Contracts Executed/Contracts Amended*.

e) **Other Commodities**

- **California Air Resources Board (CARB) Allowance Allocation and Auction Processes** – PG&E received its annual allocation of allowances from CARB in September 2012 of Vintage 2013 allowances. All of these allowances in turn will be allocated into the quarterly CARB Auctions as required by the regulations. As
PG&E cannot use any of its allocated allowances to satisfy its GHG compliance obligations, allowances must separately be procured.

CARB held its second Auction on February 19, 2013 for vintage 2013 and 2016 allowances. As stated in PG&E’s conformed GHG Procurement Plan filed on August 31, 2012 (BPP, Appendix L) to comply with D.12-04-046, PG&E is authorized to procure GHG products through CARB Auctions, approved exchanges, and utilizing a competitive RFO process. PG&E provided information regarding its allowance procurement strategy to the PRG. Relevant information is included in Confidential Attachment E, *First Quarter 2013 Other Transactions*, Confidential Attachment F, *First Quarter 2013 Key Briefing Packages*, Confidential Attachment K, *Risk Management Strategy Communication and Management Disclosure*, and Confidential Attachment L, *Reasonable Number of Analyses Models, Description of Models, and How Models Operate*.

4. **Explanation/justification for the timing of the transactions.**

   a) **Electric Transactions**

   Throughout the Quarter, PG&E entered into electric transactions needed to reduce its net open position. This objective was achieved by gradually reducing the forecast open (i.e., short or long) energy positions through the use and assessment of products that include Term, such as BOM, and month-ahead transactions, employing both standard and non-standard products, bidding into the Integrated Forward Market (IFM) to meet day-ahead, and real-time short positions. When selecting electric transactions, the best-priced bids/offers were selected first (merit-order selection) among those available for the required products at the time of the transaction, subject to credit and other limitations and operational constraints. Operational constraints include the local area reliability requirements of the CAISO, as set forth in D.04-07-028. Detailed explanation/justification for the timing of the transactions is included in Confidential Attachment J, *System Load Requirements/Conditions*. 
b) Natural Gas Transactions

For daily physical gas transactions, timing of execution is primarily driven by the requirement to match fuel usage and supply on a daily and monthly basis, and by the availability of information impacting expectations for daily dispatch of electric generating units. For transactions one month or longer, PG&E typically fills its forecast short gas positions in month-ahead, seasonal, or annual blocks, depending on the liquidity and prices available in each of these markets. Execution of the transactions is based on the PG&E Electric Portfolio Winter 2012-2013 Physical Gas Procurement Plan, which is included in Confidential Attachment J, System Load Requirements/Conditions. Detailed explanation/justification for the timing of the transactions is included in Confidential Attachment J, System Load Requirements/Conditions.

5. Discussion of the system load requirements/conditions underlying the need for the Quarter’s transactions.

a) Near-Term Planning and Procurement

PG&E develops a near-term analysis of its resource position (intra-month through several months forward) using an optimization model, which solves for lowest cost by optimizing a mix of resources to meet requirements, including dispatchable California Department of Water Resources contracts, Utility-Owned Generation resources, PPAs with dispatchability, Tolling Arrangements with “Merchant Plants,” and market purchases, while accounting for all resource requirements and constraints (must-run, must-take and operating constraints).

Term and BOM purchases and sales may be transacted to close the net-open position and to reduce PG&E’s reliance on the spot market. After identifying transactions required to meet the must-run, must-take and operating constraints, PG&E considers “economic” transactions that involve decisions regarding dispatchable units and market purchases/sales. The decision to engage in “economic” transactions is more complex and depends on several quantitative and subjective factors. “Economic” transactions are conducted using information and data regarding system conditions,
market prices and options available at the time of the decision. While potentially attractive “economic” transactions that reduce ratepayer volatility inherently include risks that must be considered, such as: (a) sharp swings in electric prices; (b) changes in production costs due to market dynamics; or (c) system changes, which may result in these transactions becoming more, or less, valuable, during the operating period or possible losses on hedge transactions. Additionally, changes in load or expected generation and other market and system conditions may result in having to buy (or sell) energy in the day-ahead or Real-Time Markets (RTM) at a cost greater than the revenue earned (or a price less than paid) in the forward transaction. Factors that go into the decision to engage in these transactions include (but are not limited to) the forecasted level of short/long energy during the forecasted period, sensitivity to changes in market price, reserve margins and demand volatility.

\( b\) PG&E Participation in the CAISO Markets

In day-ahead planning process, PG&E strives to balance projected energy requirements with available resources and provide hour-ahead traders and real-time operators with appropriate resources in order to respond to changes that may occur on the electrical system subsequent to day-ahead trading. On a daily basis, PG&E conducts a least-cost analysis to forecast unit dispatch and determine market transactions to meet energy and ancillary services requirements. This process integrates all regulatory, environmental, safety and legal requirements.

PG&E’s day-ahead planning and procurement incorporates weather-adjusted load forecasts, resource availability, price forecasts, dispatch costs and current bilateral electric market and forecasts of the CAISO’s IFM prices. The results of this analysis will determine the price PG&E is willing to pay the CAISO to have it meet PG&E’s forecasted hourly load in the Day-Ahead Market and the costs of each of its dispatchable resources to use to bid these resources into the IFM and Hour-Ahead
Scheduling Process/RTM. The CAISO then assures least cost dispatch by considering all resources simultaneously with all transmission constraints.

In the RTM, similar to the day-ahead market, PG&E submits resource bids and schedules into CAISO markets and those resources that clear the market will be obligated to operate in real time. Market opportunities in the RTM have been limited with the advent of Market Redesign and Technology Upgrade and the volatility of the CAISO’s real-time energy market. Though bilateral market opportunities have been reduced, PG&E monitors the CAISO’s Hour-Ahead and RTMs and also submit bids and schedules resources as needed to optimize its generation and market transactions to reduce costs.

c) **PG&E-Owned Generation Conditions During First Quarter 2013**

PG&E received 25 percent of normal rainfall during the Quarter. The Helms Pumped Storage Facility (Helms) was used throughout the Quarter as unit availability, system conditions, and economics allowed. Helms 1 (404 MW) was out of service for planned maintenance for three days in March. Helms 2 (404 MW) was out of service for the Quarter on a major overhaul that began in December 2012 and is scheduled to continue until early June.

Planned maintenance lasting longer than 72 hours on conventional hydro facilities greater than 30 MW during the Quarter included work on Balch 1 (33 MW), both Balch 2 units (54 MW each), Belden (117.9 MW), Butt Valley (40 MW), both Caribou 2 units (60 MW each), both Haas units (72 MW each), Kings River (52 MW), both Pit 4 units (47.5 MW each), Pit 5 Unit 1 (40 MW), both Pit 6 units (40 MW each), both Pit 7 units (56 MW each), and Rock Creek Unit 2 (56 MW).

Forced outages lasting longer than 24 hours at conventional hydro facilities greater than 30 MW were incurred at Belden (117.9 MW), Bucks Creek Unit 1 (33 MW), and Pit 5 Units 2, 3 and 4 (40 MW each).
For PG&E-owned fossil generation, planned maintenance was performed at the Colusa Generating Station (692 MW) and several of the engines (16.7 MW each) at the Humboldt Bay Generating Station (HBGS). Forced outages on PG&E owned fossil generation included HBGS Engine 9 and Engine 10.

Diablo Canyon Nuclear Plant Unit 2 (1,118 MW) was out for planned refueling February 3 through March 23. No forced outages were incurred at Diablo Canyon.

A discussion of the monthly system conditions is included in Confidential Attachment J, *System Load Requirements/Conditions*.

6. **Discussion of how the Quarter’s transactions meet the goals of the risk management strategy reflected in the Plan.**

   During the Quarter, PG&E executed transactions in accordance with its CPUC-approved Hedging Plan. Financial hedges were executed directly on the ICE, through a broker and cleared through an exchange (ICE or the NYMEX) or through an electronic auction and cleared through an exchange. ICE and the brokers provide access to anonymous bids and offers from both bilateral parties and cleared counterparties establishing both a liquid and robust market for financial products, and a benchmark for bilateral products. These products include Henry Hub swaps and options, and basis swaps against the industry benchmark indices, including CGPR, Gas Daily, NGI and IFERC. A list of information regarding Consumer Risk Tolerance notifications and management disclosures is included in Confidential Attachment K, *Risk Management Strategy Communication and Management Disclosure*.

7. **Copy of each contract.**

   A list of transactional contracts executed and/or modified by PG&E during the Quarter is included in Confidential Attachment H, *First Quarter 2013 New Contracts Executed/Contracts Amended*. Copies of the contracts that were not separately filed are also included in this attachment.
8. The valuation results for the contract(s) (for contracts of three months or greater duration).

PG&E provides the valuation method and results for the contracts filed via this QPTCR in Confidential Attachment H, First Quarter 2013 New Contracts Executed/Contracts Amended.

9. An electronic copy of any data or forecasts used to analyze the transactions.

Because transaction personnel are continuously monitoring a wide range of market information on a 24-hour-per-day, 7-day-per-week basis, it is not feasible to provide all the data and forecasts used to analyze all potential and executed transactions. However, key analysis data utilized during the Quarter is contained in Confidential Attachment J, System Load Requirements/Conditions.

10. Provide a reasonable number of analyses requested by the Commission or the PRG and provide the resulting outputs.

To the extent any analyses requested by the Commission or PRG during the Quarter were not already included as a part of PG&E’s response to Items 1 through 9 above, such additional analyses would be contained in Confidential Attachment F, First Quarter 2013 Key Briefing Packages.

11. Any other information sought by the Commission under the Public Utilities Code.

To the extent that the Commission has requested information for the Quarter as identified in the Master Data Request, this information is included in the confidential attachment workpapers. In addition, the Commission’s Energy Division has requested that PG&E provide transparent exchange traded prices. PG&E has included this information in Confidential Attachment A, Transactions, and in Confidential Attachment M, Transactions Subject to Strong Showing.

D. Additional Reporting Requirement Pursuant to Decision 07-01-039

As required by OP 12 of D.07-01-039, PG&E has included in Confidential Attachment I, Summary of Retained Generation Investments Completed During First Quarter 2013, investments in retained generation that were completed during the Quarter, as well as any multiple contracts of less than five years with the “same supplier, resource or facility” as
required in D.07-01-039 on page 154. These were no transactions or investments to report during the Quarter.

E. Cost Allocation Mechanism (CAM)

For the Quarter, PG&E did not execute contracts or transactions that qualify as CAM resources.
I, Marianne Aikawa, declare:

1. I am presently employed by Pacific Gas and Electric Company ("PG&E"), and have been an employee at PG&E since 1989. My current title is Senior Manager within PG&E’s Energy Procurement organization. In this position my responsibilities include reviewing regulatory reports. In carrying out these responsibilities, I have acquired knowledge of PG&E’s regulatory reporting and have also gained knowledge of electric energy procurement data, processes, and practices. Through this experience, I have become familiar with the type of information that would affect the regulatory filing, as well as with the type of information that would be considered confidential and proprietary.

2. Based on my knowledge and experience, and in accordance with Decision ("D.") 08-04-023 and the August 22, 2006 “Administrative Law Judge’s Ruling Clarifying Interim Procedures for Complying with Decision 06-06-066,” I make this declaration seeking confidential treatment of PG&E’s April 30, 2013 Advice Letter 4220-E, Confidential Attachments A, B, C, E, H, I, J, L, and M. By this Application, PG&E is seeking the Commission’s approval of Quarter One, 2013 Quarterly Procurement Transaction Compliance Report, submitted by PG&E.

3. Attached to this declaration is a matrix identifying the data and information for which PG&E is seeking confidential treatment. The matrix specifies that the material PG&E is seeking to protect constitutes the particular type of data and information listed in Appendix I of D.06-06-
066 and Appendix D.08-04-023 (the “IOU Matrix”), and/or constitutes information that should be protected under General Order 66-C. The matrix also specifies the category or categories in the IOU Matrix to which the data and information corresponds, and why confidential protection is justified. Finally, the matrix specifies that: (1) PG&E is complying with the limitations specified in the IOU Matrix for that type of data or information; (2) the information is not already public; and (3) the data cannot be aggregated, redacted, summarized or otherwise protected in a way that allows partial disclosure. By this reference, I am incorporating into this declaration all of the explanatory text in the attached matrix that is pertinent to this submittal.

I declare under penalty of perjury, under the laws of the State of California, that the foregoing is true and correct.

Executed on April 30, 2013, at San Francisco, California.

Matrix Page 2
I, Michael Kowalewski, declare:

1. I am presently employed by Pacific Gas and Electric Company (PG&E) and have been an employee since 1992. My current title is Acting Director, Electric Gas Supply in the Energy Supply Management Department, which is part of the Energy Procurement Department. In this position, my responsibilities include physical and financial gas supply management and trading in support of PG&E’s allocated DWR contracts, PG&E’s company-owned generating facilities, and PG&E’s tolling agreements. In carrying out these responsibilities, I have acquired knowledge of gas supply and gas hedging for electric generation, the markets for physical and financial products for gas supply and hedging, and the various types of transactions involved.

2. Based on my knowledge and experience, and in accordance with Decision (“D.”) 08-04-023 and the August 22, 2006 “Administrative Law Judge’s Ruling Clarifying Interim Procedures for Complying with Decision 06-06-066,” I make this declaration seeking confidential treatment of PG&E’s April 30, 2013 Advice Letter 4220-E, Confidential Attachments A, B, D, E, H, J, L, and M. By this Application, PG&E is seeking the Commission’s approval of Quarter One, 2013 Quarterly Procurement Transaction Compliance Report, submitted by PG&E.

3. Attached to this declaration is a matrix identifying the data and information for which PG&E is seeking confidential treatment. The matrix specifies that the material PG&E is seeking to protect constitutes the particular type of data and information listed in Appendix I of D.06-06-
066 and Appendix D.08-04-023 (the “IOU Matrix”), and/or constitutes information that should be protected under General Order 66-C. The matrix also specifies the category or categories in the IOU Matrix to which the data and information corresponds, and why confidential protection is justified. Finally, the matrix specifies that: (1) PG&E is complying with the limitations specified in the IOU Matrix for that type of data or information; (2) the information is not already public; and (3) the data cannot be aggregated, redacted, summarized or otherwise protected in a way that allows partial disclosure. By this reference, I am incorporating into this declaration all of the explanatory text in the attached matrix that is pertinent to this submittal.

I declare under penalty of perjury, under the laws of the State of California, that the foregoing is true and correct.

Executed on April 30, 2013, at San Francisco, California.
