**Advice 4353-E**  
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of the Radum-Vallecitos 60 kV Power Line Relocation Project in the City of Livermore, County of Alameda**

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

**Background**

The City of Livermore has requested Pacific Gas and Electric Company (PG&E) to relocate approximately 1,300 feet of the Radum-Vallecitos 60 Kilovolt (kV) Power Line (minor relocation), which parallels the northwest side of Vallecitos Road (existing franchise), to accommodate the city's Vineyard Avenue and Vallecitos Road project. PG&E's relocation of the power line will begin at the corner of the new intersection of East Vineyard Avenue and Vallecitos Road, and will continue southwest parallel to Vallecitos Road for approximately 1,300 feet. PG &E will replace four existing wood poles and relocate these poles along the alignment, setting them back from the edge of the pavement approximately 5 to 12 feet. The new poles will be wood or light-duty steel, which weathers to resemble wood, and will be approximately the same height or approximately 10 feet taller. Construction is tentatively scheduled to begin in March 2014, or as soon as project plans and approvals are in place. Construction is tentatively scheduled to be completed in April 2014, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s):

- c. "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures."
- g. "power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which final Negative Declaration or [Environmental Impact Report] EIR finds no significant unavoidable environmental impacts."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
