Advice 4394-E

(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Lakeville-Petaluma C 60 kV Power Line Relocation, Sonoma County

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

The County of Sonoma has requested that Pacific Gas and Electric Company (PG&E) relocate approximately 1,115 feet (minor relocation) of the existing Lakeville-Petaluma C 60 Kilovolt (kV) Power Line approximately 10 feet south of the existing line. This minor relocation accommodates the Adobe Road at East Washington Street Intersection Improvement Project. PG&E will replace 2 existing wood poles (approximately 45 feet tall), with 2 new wood poles (approximately 65 feet tall). Additionally, PG&E will replace one existing wood pole (approximately 40 feet tall), with one new wood pole (approximately 50 feet tall). The taller poles are needed to comply with CPUC General Order 95 minimum ground-to-conductor clearance requirements. General Order 95 also requires this project to accommodate any proposed roadway improvements and installation of traffic signals, and electric distribution wires on the power line poles (underbuild). The relocation begins on the southwest side of Adobe Road approximately 850 feet northwest of the Adobe Road and East Washington Street intersection. The power line will parallel the southwest side of Adobe Road, until it terminates approximately 265 feet southeast of the Adobe Road and East Washington Street intersection. Construction is tentatively scheduled

to begin in May 2014, or as soon as project plans and approvals are in place. The project is scheduled to be completed in June 2014, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts a utility from the CPUC's requirement to file an application requesting authority to construct if a project meets specific conditions. This project qualifies for the following exemption.

- c. "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
