Advice 4401-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Arcata-Humboldt 60 kV Power Line Replacement in the City of Arcata, County of Humboldt

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

Due to damage caused by a storm, PG&E will replace three poles and add a new pole on the Arcata- Humboldt 60 kV Power Line (existing easement) to facilitate repair of a distribution line serving Arcata. Three wood poles will be replaced with two wood and one light-duty steel pole, which weathers to resemble wood (replacement of existing facilities). The new poles will be approximately 5 to 15 feet taller than the existing poles to support the heavier distribution wires and to provide clearance over underlying vegetation. PG&E will also interset one approximately 66-foot-tall pole (intersetting structures). The first replacement pole is located on the south side of Samoa Boulevard in Arcata, approximately 320 feet west of the Samoa Boulevard and Union Street roundabout. The remaining two replacement poles and the interset pole are located east of the Samoa Boulevard northbound onramp to Highway 101, adjacent to the community center soccer fields. Construction activities are tentatively scheduled to begin in June 2014, or as soon as project plans and approvals are in place. The project is scheduled to be completed in October 2014, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s),

- b. "the replacement of existing power line facilities or supporting structures with equivalent facilities or structures."
- c. "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures."
- g. "power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR [Environmental Impact Report] finds no significant unavoidable environmental impacts."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
