**Advice 4454-E**  
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Centennial Corridor Power Line Relocation Project in the City of Bakersfield, County of Kern**

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order ("G.O.") 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

**Background**

The City of Bakersfield has requested PG&E to relocate approximately 1,800 feet of four parallel power lines to accommodate the Centennial Corridor Project (minor relocation). The four power lines are located on two parallel lattice-steel tower lines that cross Truxtun Avenue approximately 1,500 feet northeast of Commercial Way. The northernmost tower line carries the Kern-Magunden-Witco 115 Kilovolt (kV) Power Line and the Kern-Magunden 70 kV Power Line; the southernmost tower line carries the Kern-Westpark #1 and #2 115 kV Power Lines. Two existing tower pairs will be relocated approximately 300 feet south of their current location between Truxtun Avenue and the Kern River, and one tower pair located on the east side of Truxtun Avenue will be relocated approximately 70 feet to the west. PG&E will also interset two new structures in the existing alignment on the west side of the Kern River (intersetting of additional support structures). All relocated, replaced, and interset structures will be tubular-steel poles of approximately the same height as the existing lattice-steel towers (replacement of equivalent structures). Helicopters may be used to facilitate construction. Construction is tentatively scheduled to begin in September 2014,

or as soon as project plans and approvals are in place. Construction is scheduled to be in May 2015, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemptions,

- b. "the replacement of existing power line facilities or supporting structures with equivalent facilities or structures."
- c. "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
