Advice 4486-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of the Balch-McCall and Haas-McCall 230 kV Transmission Line Relocation, County of Fresno

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Certificate of Public Convenience and Necessity.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

The California Department of Transportation (Caltrans) has requested PG&E to relocate an existing lattice steel tower to accommodate the Highway 180 Phase 3 Project near the community of Minkler. Located north of Highway 180 and approximately 650 feet west of Piedra Road, the existing tower is approximately 127 feet tall and supports both the Balch-McCall and Haas-McCall 230 kV transmission lines. PG&E will remove the tower and install a new tubular steel pole approximately 200 feet northeast, and another tubular steel pole approximately 375 feet southwest of the existing tower, on either side of Highway 180 (minor relocation). Both new tubular steel poles will be in the existing alignment and approximately 115 feet tall. If PG&E is not able to de-energize the existing lines during construction, crews may need to temporarily install approximately 10 wood poles to relocate approximately 2,000 feet of the transmission line away from the construction area (minor relocation). After construction is complete, crews will move the line back to the new structures and remove the wood poles. Construction is tentatively scheduled to begin in October 2014, or as soon as project plans and approvals are in place.

Construction is scheduled to be completed in May 2015, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection A exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s),

- "the minor relocation of existing power line facilities"

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
