Advice 4514-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of the Glenn #3 60 kV Power Line Relocation Project in Butte County

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

The California Department of Transportation (Caltrans) has requested PG&E to relocate approximately 1,500 feet of the Glenn #3 60 Kilovolt (kV) Power Line to accommodate the Rock Creek Bridge Replacement Project in Butte County (minor relocation). The project is located along State Route 99 approximately 3 miles northwest of the City of Chico, from approximately 450 feet south of Meridian Road to approximately 850 feet north of Parsley Lane. The project will require relocating approximately five poles approximately 40 feet to the west. The existing wood poles range in height from approximately 35 to 60 feet tall, and the replacement wood poles will be approximately the same height or approximately 15 feet taller to comply with California Public Utilities Commission (CPUC) General Order 95 minimum ground-to-conductor clearance requirements. In addition, one anchor pole and accompanying overhead guy line will be installed to support the project. Construction is tentatively scheduled to begin in December 2014, or as soon as project plans and approvals are in place. Construction is scheduled to be completed in February 2015, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1 exempts a utility from the CPUC's requirement to file an application requesting authority to construct if a project meets specific conditions. This project qualifies for the following exemption(s):

- c. "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by October 28, 2014, which is 20 days after the date of this filing. Protests should be mailed to the following address:
