PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

ENERGY DIVISION

RESOLUTION E-4718

June 11, 2015

RESOLUTION

PROPOSED OUTCOME:

- This Resolution dismisses the Protest of Amador County Supervisor Brian Oneto and the protest of Roberta Pickett and approves Pacific Gas & Electric Company’s (PG&E’s) AL 4573-E, with an effective date of today. PG&E’s AL proposes encumbrance with a perpetual conservation easement (CE) of approximately 899 acres of land in Amador County commonly known as Lower Bear Area. Mother Lode Land Trust, a California non-profit public benefit corporation will hold the CE. PG&E will retain fee title to the property, and the CE will be granted subject to certain reserved rights in favor of PG&E for the continued operation of PG&E’s hydroelectric and water delivery facilities pursuant to PG&E’s Bankruptcy Settlement Agreement that established a Land Conservation Commitment (LCC).

SAFETY CONSIDERATIONS:

- Effective administration of PG&E’s LCC is part of the responsibility of PG&E to meet their obligations under Public Utilities Code Section 451 to provide services that promote the safety, health, comfort, and convenience of their patrons, employees and the public.

ESTIMATED COST:

- In D.03-12-035, the Commission approved the LCC with funding at $70 million. Ongoing fees for managing the CE are to be covered by the previously authorized LCC funding.

By Advice Letter 4573-E filed on January 30, 2015.
SUMMARY

This Resolution approves PG&E’s AL 4573-E, with an effective date of today. On January 30, 2015 PG&E filed Advice Letter 4573-E, requesting approval under Public Utilities Code Section 851, of the Lower Bear Area Conservation Easement Donation.

Pursuant to PG&E’s LCC approved in D.03-12-035, PG&E proposes encumbering with a perpetual CE, the 899-acre Lower Bear Area (“Property”). Mother Lode Land Trust, a California non-profit public benefit corporation, will hold the CE. This donation is being made in the public interest with the intent to provide for: (1) the preservation of land areas to protect the natural habitat of fish, wildlife, and plants; (2) the protection of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values; and (3) the prevention of any uses that will significantly impair or interfere with those values. This donation is in accordance with the terms and conditions specified in the PG&E Bankruptcy Settlement Agreement and Stipulation that were approved by the Commission (CPUC) in D.03-12-035.1

BACKGROUND

On April 6, 2001, PG&E filed for Chapter 11 bankruptcy protection. Two years later, CPUC approved a Settlement Agreement under which PG&E Watershed Lands would be subject to CEs and/or be donated in fee simple to public entities or non-profit organizations for the benefit of the public. Pursuant to the Settlement Agreement, the Pacific Forest and Watershed Lands Stewardship Council (Stewardship Council) was established in 2004 to develop a plan to permanently protect, for the benefit of the citizens of California, more than 140,000 acres of Watershed Lands currently owned by PG&E.

1 The Settlement Agreement provides a substantially increased opportunity for environmentally beneficial use and access by the public to 140,000 acres of land associated with PG&E’s hydroelectric facilities, without compromising the ability to PG&E to generate electricity from those facilities. In 1999 PG&E proposed to sell these lands to the highest bidder. The Settlement Agreement would remove forever that possibility, and replace the specter of loss of public control with the promise of perpetual public access. (D.03-12-035, pages 61, 62.)
Located primarily in the Sierra Nevada and Cascade Mountain range watersheds, the PG&E Watershed Lands contain some of the most pristine and resource-rich landscapes found in the state. The properties are diverse and geographically remote, located in 21 counties from the northern reaches of the state to the southern end of the Central Valley.

Protecting the Watershed Lands will be accomplished through (1) PG&E’s grant of CEs to one or more public agencies or qualified conservation organizations so as to protect the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values (collectively the Beneficial Public Values), and (2) PG&E’s donation of the Watershed Lands in fee simple to one or more public entities or qualified conservation organizations, whose ownership would be consistent with these conservation objectives. This effort is known as PG&E’s “Land Conservation Commitment” (LCC).

As required by D.03-12-035, the Stewardship Council prepared a Land Conservation Plan (LCP) to establish a framework for the conservation and/or enhancement of the Watershed Lands, and to ensure the permanent protection of these lands for the benefit of current and future Californians. To address the challenge of a conservation effort of this large scope, and to facilitate engagement of a wide range of stakeholders and interested members of the public, the Stewardship Council grouped the Watershed Lands into 47 planning units and established a phased approach to development and implementation of the LCP.

In 2007, the Stewardship Council Board adopted Volumes I and II of the LCP:

Volume I: The Land Conservation Framework establishes the overall framework for the LCP, including legal requirements, the planning process, methodologies, public involvement, and relevant regulatory processes.

Volume II: Planning Unit Concepts documents existing conditions and presents management objectives, potential measures, and conceptual plans to preserve and/or enhance the Beneficial Public Values (BPVs) within each planning unit. The management objectives for the Lower Bear Area planning unit are:
1. Preserve and enhance habitat in order to protect special biological resources and wilderness values;
2. Preserve open space in order to protect natural and cultural resources, viewsheds, and the recreation setting;
3. Enhance recreational facilities in order to provide additional public access and education and recreation opportunities;
4. Develop and implement forestry practices in order to contribute to a sustainable forest, preserve and enhance habitat, enhance surrounding wilderness values, as well as to ensure appropriate fuel load and fire management;
5. Identify potential grazing opportunities in order to enhance agricultural resources and related economic benefits;
6. Identify and manage cultural resources in order to ensure their protection.

Volumes II and III also document existing economic uses.

Volume III: Land Conservation and Conveyance Plans (LCCPs) to be issued serially and cumulatively will encompass a series of real estate transaction packages that will detail the specific land conservation and/or disposition requirements for each parcel or cluster. LCCPs represent the Stewardship Council’s recommendations for preserving and/or enhancing the BPVs of the Watershed Lands to PG&E, and are intended to support required regulatory approvals of the land transactions.²

Specifically, the LCCP produced for each parcel will incorporate the 10 programmatic objectives of the LCP as identified in the Stipulation that was an integral part of the Proposed Settlement Agreement adopted in D.03-12-035. These 10 programmatic objectives, which are intended to govern how the LCP is implemented for each and every Watershed Parcel, include: 1) reasonably exact estimates of acreage, by parcel, within or outside licensed project boundaries, and existing economic uses (including all related agreements); (2) objectives to preserve and/or enhance beneficial public values, as defined in the Settlement

² The LCCP addresses the requirements set forth in Section 12(a) of the “Stipulation Resolving Issues Regarding the Land Conservation Commitment” September 25, 2003.
Agreement, Appendix E, of each individual parcel; (3) a recommendation for grant of a conservation easement or fee simple title for each such parcel; (4) a finding that the intended recipient of such easement or fee simple title has the funding and other capacity to maintain that property interest so as to preserve and/or enhance the beneficial public values thereof; (5) an analysis of tax and other economic and physical impacts of such a disposition strategy, and a commitment by an appropriate entity to provide property tax revenue, other equivalent revenue source, or a lump sum payment, so that the totality of dispositions in each affected county under this Land Conservation Commitment will be “tax neutral” for that county; (6) a disclosure of all known hazardous waste or substance contamination or other such environmental liabilities associated with each parcel; (7) appropriate consideration of whether to split any parcel which is partly used or useful for operation of PG&E’s and/or co-licensee’s hydroelectric facilities, where the beneficial public values of the unused part may be enhanced by such split, provided it is consistent with Section 12(b)(4) of this stipulation; (8) a strategy to undertake appropriate physical measures to enhance the beneficial public values of individual parcels; (9) a plan to monitor the economic and physical impacts of disposition and implementation of enhancement measures on the applicable management objectives; and (10) a schedule for the implementing transactions and measures.

Advice Letter 4573-E Lower Bear Area Conservation Easement Donation (LCCP)
The Lower Bear Area contains 7 parcels for a total of approximately 889 acres (Land Conservation Parcels 952-958). The property will be retained by PG&E subject to a perpetual conservation easement held by the Mother Lode Land Trust (MLLT). The Lower Bear Area Property is located in Amador County, approximately 35 miles northeast of Jackson at an approximate elevation range

3 The Stewardship Council has agreed that it is the appropriate entity to provide property tax revenue, drawing from the $70 million provided to the Stewardship Council to implement the Land Conservation Commitment. In Finding #14 of Resolution E-4644, which was approved on August 14, 2014, the Commission made the following finding: The Commission agrees with the Stewardship Council that the tax neutrality payment to Tehama County may come from the LCC fund. (Deer Creek LCCP, November 14, 2003).

4 Mother Lode Land Trust, 1316 Jackson Gate Road, Jackson, CA 95642
of 5,900 to 7,000 feet. The planning unit is surrounded by the Eldorado National Forest and includes portions of Lower and Upper Bear River Reservoirs and land bordering a portion of Cole Creek, east of the reservoirs. Habitat for several special status species is located in the vicinity of Upper and Lower Bear River Reservoirs, including the Federal candidate mountain yellow-legged frog, and various bird species including willow flycatcher, bald eagle, and California spotted owl. Upper and Lower Bear River Reservoirs provide habitat for a variety of cold water fish species including rainbow trout, brown trout, and tui chub.

The planning unit provides many outdoor recreational opportunities, including fishing, boating, swimming, camping, hiking, off highway vehicle and snowmobile use. Lower Bear Reservoir is annually stocked with rainbow and brown trout and is known to be an exceptional trout fishery. The Silver Bear Snowmobile trail is located adjacent to Lower Bear River Reservoir and provides 20-55 miles of popular trails during the winter recreation season. The Bear River Resort is located on the western side of Lower Bear River Reservoir and is operated under a lease with PG&E. Many of the area’s recreational opportunities are provided by this lessee, including summer boat rentals. The resort also provides a store, restaurant, 126 campsites (including 30 trailers), and a marina. Camp Ritchie, which PG&E leases to the Church of Jesus Christ of Latter Day Saints (LDS), is operated as a 120-person per session summer camp for girls.

The planning unit contains three PG&E Timber Management Units (TMUs) for a total of 895 timbered acres. The TMU located by the Upper Bear River Reservoir contains 68 timbered acres and is managed under a recreation and Sustainable Timber Management prescription, meaning that recreation in this area is compatible with timber management. Forest management in designated recreation areas is limited to fuels reduction, hazard tree removal, and improvement of aesthetics. Outside of the designated recreation areas, sustainable timber management is emphasized. The TMU located by the Lower Bear River Reservoir contains 273 timbered acres and is managed under a Multiple-Use prescription, meaning that protection and uses of other resources and facilities may preclude sustained timber yield management as the highest

---

5 Parcels 948-951 that border Cole Creek east of the reservoirs will be the subject of a separate, future donation.
and best use of the portions of the TMU. The Lower Bear Area planning unit is within the traditional territory of the Northern Sierra Miwok; prehistoric sites have been identified in the area.

In compliance with the Stipulation 12(a) requirements, the following disclosures are included in all Watershed Lands Section 851 advice letter filings:

**Adjacent and Nearby Land Owners**

The seven parcels within the Lower Bear Area that are the subject of this LCCP are surrounded by National Forest System lands managed by the Eldorado National Forest. Lower Bear River Reservoir is accessible by a paved road, Bear River Road, off of Highway 88. Upper Bear River Reservoir is accessible by boat from Lower Bear River Reservoir and by a hiking trail on the western side of the reservoir.

**Existing Economic Uses and Agreements**

There are two lease agreements for economic uses on the property to be retained by PG&E, one for the Bear River Resort, and one for Camp Ritchie, a summer camp for girls. PG&E will reserve rights in the conservation easement as necessary to maintain and operate existing and future utility facilities over portions of the parcels. The specific Hydro Reserved Rights are set forth in the conservation easement.

**Objectives to preserve and/or enhance the BPVs**

The Land Conservation Commitment provides that “PG&E shall ensure that the Watershed Lands it owns...are conserved for a broad range of beneficial public values including the protection of the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values.

The following text lists the objectives for each BPV at the Lower Bear Area planning unit that the Stewardship Council Board approved in LCP Volume II, as well as a description of how the conservation easement addresses each objective and each applicable BPV.

1. **Preserve and enhance habitat in order to protect special biological resources and wilderness values.**
The conservation easement provides for the protection of “habitat for plants and animals that are native to the area, including species protected under the California Endangered Species Act and/or the federal Endangered Species Act.

2. Preserve open space in order to protect natural and cultural resources, viewsheds, and the recreation setting.

The conservation easement will conserve the scenic character of the property by ensuring that no further development will occur unless specifically authorized or permitted by the conservation easement.

3. Enhance the recreational facilities in order to provide additional public access, and education and recreational opportunities.

The conservation easement acknowledges that outdoor recreational facilities exist on the property, and lists recreational use including camping, swimming, hiking, boating and sightseeing as a BPV ensuring the protection and preservation of such uses in perpetuity. Furthermore the conservation easement provides that the landowner will allow public access on the property at levels substantially consistent with those existing at the time the conservation easement is recorded, subject to PG&E’s Hydro Reserved Rights and right to make reasonable rules and regulations.

4. Develop and implement forestry practices in order to contribute to a sustainable forest, preserve and enhance habitat, enhance surrounding wilderness values, as well as to ensure appropriate fuel load and fire management.

Forest management activities will be subject to compliance with applicable laws and conducted as further described and allowed in the conservation easement.

5. Identify potential grazing opportunities in order to enhance agricultural resources and related economic benefits.

There is currently no managed grazing within the planning unit.

6. Identify and manage cultural resources in order to ensure their protection.

The conservation easement will protect historic and cultural resources on the Property to the extent they are protected by state and federal law, including artifacts related to Native American uses.

Recommendation for Conservation Easement and Fee Simple Retention

All 899 acres within seven parcels (952-958) of the Lower Bear Area planning unit will be retained in fee by PG&E. The remaining lands in the Lower Bear Area planning unit will be donated by PG&E and are the subject of a separate LCCP.

Finding of Donee Funding and Other Capacity to Maintain Lands to Preserve and/or Enhance the BPVs
The Stewardship Council invited organizations to join its registry and submit a statement of qualifications (SOQs). The Stewardship Council then reviewed the SOQs, and organizations that appeared capable were invited to submit additional information describing their qualifications. Organizations demonstrating sufficient experience holding and enforcing CEs, sufficient financial and organizational capacity, and which the Stewardship Council has determined to be best-suited to receive a donation of CEs within particular Watershed Lands are recommended to PG&E to receive CEs.

At the conclusion of the selection process, the Stewardship Council board found that Mother Lode Land Trust (MLLT) has the funding and other capacity to maintain the property interest so as to preserve and/or enhance the BPVs. MLLT was established in 1991 and, as of 2014, holds 20 conservation easements on over 3,900 acres in Amador, Calaveras, Alpine, Tuolumne, and El Dorado Counties. MLLT has an experienced staff and board of directors with expertise in forestry, agriculture, wildlife biology, rangeland science, land management, appraisal practices, local government, and community development. MLLT is a qualified easement holder under California Civil Code Section 815.3.

Analysis of Tax and Other Economic and Physical Impacts

The Settlement and Stipulation adopted by D.03-12-035, requires that the LCCP provide: “an analysis of tax and other economic and physical impacts of such a disposition strategy, and a commitment by an appropriate entity (which may be PG&E, subject to being authorized by the Commission to fully recover in rates any such costs in approving PG&E’s Section 851 application or in another appropriate Commission proceeding, Stewardship Council, donee, or a third party, depending on the individual circumstances) to provide property tax revenue, other equivalent revenue source, or a lump sum payment, so that the totality of dispositions in each affected county under this Land Conservation Commitment will be “tax neutral” for that county”.  

To achieve property tax neutrality, the Stewardship Council has developed a methodology to establish a standard payment process when lands are transferred to organizations that are exempt from paying property taxes. The

---

6 Stipulation Resolving Issues Regarding The Land Conservation Commitment (page 8)
methodology would be applied to all counties that experience a loss in property tax revenue due to a fee title donation. Because PG&E is retaining fee title ownership of the Lower Bear Area Property, it will continue to pay property taxes to Amador County as assessed by the State Board of Equalization.

The Settlement and Stipulation require an analysis of the physical and economic impacts of each disposition. The agreements for the conservation easement on parcels 952-958 of the Lower Bear Area planning unit have not mandated any changes to the physical or economic uses and PG&E intends to manage the lands in a manner consistent with the current physical and economic uses.

**California Environmental Quality Act**

The Stewardship Council did not identify any physical measures to enhance the BPVs of the Lower Bear Area Property. While transfers of ownership of utility property under Public Utilities Code Section 851 may have an environmental impact, and accordingly constitute projects under the California Environmental Quality Act (CEQA), here the proposed retention of the Lower Bear Area planning unit parcels 952-958 and donation of conservation easement to MLLT results in no proposed changes to land uses; thus no direct or indirect environmental impacts will occur as a result of the donation. Therefore, the transaction is exempt due to the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment and does not require review under CEQA.

**Hazardous Waste Disclosure**

The stipulation states that in the transfer of fee title and conveyance of a conservation easement, PG&E will disclose all known hazardous waste, substance contamination, or other such environmental liabilities associated with each parcel and hold the donee harmless. The hazardous waste disclosure\(^7\) found no potential hazardous waste, substance contamination, or other such environmental condition on the property.

---

\(^7\) Summary of Potential Environmental Issues on Land to be Retained prepared by AMEC Geomatrix, Inc., September 8, 2010.
Consideration of Parcel Split

PG&E will retain fee title to all 899 acres within Parcels 952-958 of the Lower Bear Area planning unit. Therefore there is no need for a parcel split.

Strategy for Physical Measures to Enhance BPVs

The Stewardship Council has not identified any physical measures to enhance the beneficial public values of the Lower Bear Area planning unit parcels 952-958. The Stewardship Council is developing a grant program to fund enhancements on the Watershed Lands in the future. Grant funding will be available to accomplish any number of potential future physical measures such as developing trails, day use areas, and other public access improvements.

Monitoring Plan for the Economic and Physical impacts of Disposition and Implementation of Enhancement Measures

The Stipulation requires that the LCCP outlines a plan to monitor the economic and physical impacts of disposition and implementation of enhancement measures. The conservation easement holder is required to monitor every conservation easement that it holds to ensure that the landowner is complying with the terms of the easement in perpetuity. The Stewardship Council has entered into a Conservation Easement Funding Agreement with MLLT whereby the Stewardship Council will provide a monitoring and enforcement endowment to fund MLLT’s monitoring activities at Lower Bear Area planning unit parcels 952-958.

Implementation Schedule for Transaction and Measures

The implementation schedule for the Lower Bear Area Transaction indicates CPUC review and approval in 2015 and close of escrow in 2015. The Stewardship Council will release funds to MLLT per the conservation easement funding agreement when the conservation easement is recorded.

NOTICE

Notice of AL 4573-E was made by publication in the Commission’s Daily Calendar. PG&E states that a copy of the Advice Letter was mailed and distributed in accordance with Section 4 of General Order 96-B.
PROTESTS

Advice Letter AL 4573-E was protested by Amador County Board of Supervisors Chairman, Brian Oneto and by Roberta Pickett, a resident of Amador County.

On February 19, 2015, Mr. Oneto identified two issues of concern in his protest of AL 4573, Section 4, “Proposed Uses and Conservation Management Objectives”. First, Subdivision C, “Outdoor Recreation by the General Public”, is inadequate because it does not specifically include snowmobiling and legal off-highway vehicle recreation as outdoor recreation activities as a historical recreational use within the Lower Bear Area despite a snowmobile trail/road clearly designated on the map provided as part of PG&E’s Exhibit 1, “Map of the Property”. Mr. Oneto requests that snowmobiling and legal off-highway vehicle recreation be specifically identified as permissible activities in the proposed Conservation Easement Agreement. The second issue of concern to Mr. Oneto involves Subdivision E, “Agricultural Uses”. Mr. Oneto is concerned that the grazing or other agricultural uses are not identified as a BPV and are prohibited under the terms of the conservation easement. Mr. Oneto points out that even though no grazing lease covers the Lower Bear Area properties, the land is open range land and there is permitted grazing on lands adjacent to the property. As such, Mr. Oneto contends that the conservation easement should acknowledge that grazing has occurred and will likely continue to occur. Mr. Oneto references Amador County Code, Chapter 8.40-Open Range.

On February 18, 2015 in an e-mail to PG&E, Ms. Pickett identified a number of issues in her protest of AL 4573 and requested an extension of the public review period for an additional 30 days. Ms. Pickett explained that she did not receive the notice letter from PG&E until February, but was expected to respond by February 19th after having reviewed the attached documents pertaining to the Lower Bear Area donation of a conservation easement. Additionally, Ms. Pickett noted the lack of an attached map of the parcels to be donated. Ms. Pickett did not find any indication in the PG&E notice that Amador County officials or state representatives were copied on the letter or formally contacted. Finally, Ms. Pickett was unable to ascertain the scope of actions or activities that would occur under the oversight of the Mother Lode Land Trust, and the terms of the conservation easement.

On February 26, 2015, PG&E responded to the Protests of AL 4573-E. PG&E contends that AL 4573 is consistent with the recommendations contained in the
LCCP, D.03-12-035, and D.08-11-043. AL 4573 was served to parties, including Ms. Pickett, in accordance with the procedures set forth in D.03-12-035 and D.08-11-043 (as modified by D.10-04-004). Additionally, as part of its outreach effort, the Stewardship Council is required to provide notice to the Board of Supervisors of the affected county, each affected city, town, and water supply entity, each affected tribe/and or co-licensee, and each land owner located within one mile of the exterior boundary of the parcel.

The Stewardship Council informed PG&E that it provided the required notice on July 28, 2014. The notice included details of the proposed transaction and instructions for viewing the LCCP online, or alternatively, how to receive a copy of the draft by mail. The notice was mailed via U.S. Mail to Ms. Pickett at her address of record. No return letter indicating the notice was undeliverable was received by the Stewardship Council. Based on this, PG&E believes that the required notifications were made, and Ms. Pickett was provided an ample opportunity to comment on the transaction. Therefore, an extension of the protest period is not warranted.

PG&E did not directly address Ms. Pickett’s concern that PG&E failed to provide a clear definition of what the scope of actions or activities would be for the MLLT under the designation of “conservation”. However, PG&E did address the issue in the response to Mr. Oneto.

In response to Mr. Oneto, PG&E acknowledges that a snowmobile trail is labeled on the Stewardship Council map included in the LCCP and that the conservation easement does not specifically call out snowmobiling and off-highway vehicle use as BPVs on the lands. However, the absence of reference to a specific use on the property does not mean that such use is prohibited. PG&E’s CEs on all retained watershed lands specifically recognize and allow third party informal uses, and do not attempt to provide an exhaustive list of public recreational uses of the encumbered lands. Rather the CEs preserve informal uses categorically and list a representative sample of recreational uses and physical features, particularly those that are observed during site visits by the Land Trust during its development of the Baseline Document Report, those that are the subject of existing economic agreements, and/or those that are required by the relevant FERC Project License.

The proposed CE for the property does not include an exhaustive list of potential public recreational uses as this would be virtually impossible to define given the
broad range of possible public uses. The proposed CE accommodates a broad range of public uses (in this case, such as snowmobiling) by providing that PG&E must allow public access on the property that is substantially consistent with the public access on the effective date of the CE. In particular, Section 9.2 of the CE (Informal Uses and Public Access) acknowledges the existence of and requirement to allow continued public access for informal uses subject to reasonable rules and regulations, liability limitations, and annual review with the CE holder to ensure the overall preservation of the BPVs on the property.

Although they are not specifically identified in the Outdoor Recreation BPV, snowmobiling and off-highway vehicle use on the Property are considered existing informal uses and are allowable subject to section 9.2 of the CE. The only express restriction on the use of vehicles is articulated in bullet 5 of Exhibit F of the CE (prohibited uses), pursuant to which the use of motorized vehicles is allowed only on existing roadways on the property except for vehicles used for land management activities. This restriction does not prohibit the continued use of snowmobiles and off-highway vehicles on the existing roads. Finally, the ability to make reasonable rules to restrict or exclude certain uses and public access to the property is essential for the protection against physical harm to the Property, prevention of unauthorized activities, and protection against risk to public safety.

Regarding Mr. Oneto’s concern that Agricultural Uses are not identified as a BPV on the property, PG&E disagrees with the conclusion that the absence of reference to Agricultural Uses as a BPV means that the CE prohibits grazing or other agricultural uses on the property.

The BPVs do not include Agricultural Uses in the proposed CE because such activity is not actively occurring on the Property at a significant level, and there are no existing grazing licenses in place. PG&E is not aware of any such informal grazing that is currently occurring on the property but such grazing would be considered an informal use of the Property and would be allowed subject to Section 9.2 of the CE. Furthermore the CE does not conflict with the County’s open range ordinance. The CE expressly permits PG&E to comply with applicable legal requirements and grazing and other agricultural uses are not precluded as a prohibited use under Exhibit F of the CE. In fact, Exhibit F (bullet 7) creates an allowance for grazing to occur on the property. Additionally, Exhibit I of the CE articulates the “Permitted Uses” on the property and
incorporates a provision (bullet 6) that expressly permits PG&E to perform all activities required to comply with any and all Applicable Laws.

**DISCUSSION**

The Commission has reviewed PG&E AL 4573-E, the protests of Amador County Supervisor Brian Oneto and Ms. Roberta Pickett, and the reply to those protests by PG&E. Energy Division is satisfied that the reply of PG&E demonstrates that the required notice was provided to Ms. Pickett. Additionally, the Commission believes that the Stewardship Council provided required notice in accordance with D.03-12-035. Therefore, extension of the comment period is not warranted in this case. Regarding the concerns of Supervisor Oneto, the Commission is also satisfied by the reply of PG&E which explains that neither snowmobiling nor off-highway vehicle recreation is prohibited by the terms of the CE. The Commission is also satisfied that the CE creates an allowance for the informal agricultural grazing of livestock.

The Commission believes that PG&E’s AL 4573-E, request for approval in accordance with the streamlined procedure adopted by the Commission in D.08-11-043, D.10-08-004 and Public Utilities Code Section 851, be granted. PG&E has provided the information required by D.08-11-043 Ordering Paragraph 2. All of the information required by D.08-11-043 is included in the Lower Bear Area Planning Unit Conservation and Conveyance Plan (LCCP) and appended to PG&E AL 4573-E as Attachment A.

The Commission has reviewed PG&E AL 4573-E including the attached Lower Bear Area disposition package prepared by the Stewardship Council, the Protest

---

8. For Category 1 transactions, PG&E shall submit a simplified advice letter to the Commission that shall include the following five items of information for the proposed transaction: (1) identification of Conservation Property parcel(s); (2) Type of property interest disposition(s); (3) Legal name and location of receiving party or parties; (4) the proposed use(s) and conservation management objectives with references to applicable section(s) of the Land Conservation Plan (LCP); and (5) Applicable exemption(s) under CEQA (where no exception to the exemption applies) with explanation, if necessary, or reason why transaction is not a “project” under CEQA. (D. 08-11-043 page 46)
of Amador County Supervisor Brian Oneto, the Protest of Roberta Pickett, and
the response of PG&E, and has determined that the Lower Bear Area planning
unit parcels 952-958 LCCP is both thorough and complete, and complies with
both D.08-11-043, D.10-08-004, and with all of the ten Stipulation section 12(a)
requirements adopted by D.03-12-035.

COMMENTS

Public Utilities Code section 311(g)(1) provides that this resolution must be
served on all parties and subject to at least 30 days public review and comment
prior to a vote of the Commission. Section 311(g)(2) provides that this 30-day
period may be reduced or waived upon the stipulation of all parties in the
proceeding.

The 30-day comment period for the draft of this resolution was neither waived or
reduced. Accordingly, this draft resolution was mailed to parties for comments,
and will be placed on the Commission’s agenda no earlier than 30 days from
today.

On May 11, 2015 the Pacific Forest and Watershed Lands Stewardship Council
provided clarifying comments on Draft Resolution E-4718.

FINDINGS

1. The Commission approved a PG&E bankruptcy settlement Agreement in
D.03-12-035. Among other things, the Settlement Agreement contained
provisions for certain environmental benefits. Those benefits included the
adoption of the Land Conservation Commitment, which established
provisions to permanently protect and enhance the approximately 140,000
acres of PG&E’s watershed lands associated with its hydroelectric system,
plus the 655 acre Carrizo Plains property in San Luis Obispo County.

2. D.03-12-035 established a Land Conservation Plan process and also helped
establish a non-profit corporation named the Pacific Forest and Watershed
Lands Stewardship Council to oversee the implementation of the Land
Conservation Commitment and to carry out environmental enhancement
activities.
3. D.03-12-035 authorized the creation of the Land Conservation Commitment and required PG&E through retail rates, to fund the Stewardship Council with $70 million over 10 years to cover both the administrative expenses and the costs of environmental enhancements to the protected lands. D.03-12-035 also adopted the “Stipulation Resolving Issues Regarding the Land Conservation Commitment”. The “Stipulation Resolving Issues Regarding the Land Conservation Commitment, Section 12 (a) describes the 10 informational components to be contained in the disposition document developed by the Pacific Forest Watershed Lands Stewardship Council for each donated parcel.

4. D.08-11-043, modified by D.10-08-004 established a streamlined Section 851 process for Advice Letters related to the PG&E Land Conservation Commitment.

6. PG&E Advice Letter 4573-E complied with the streamlined procedures that adopted by the Commission in D.08-11-043 as modified by D.10-08-004.

7. Advice Letter AL 4573-E was protested by Amador County Supervisor Brian Oneto and by Roberta Pickett.

8. PG&E replied to the protests of AL 4573-E on February 26, 2015.

9. The PG&E response to Supervisor Oneto contained adequate assurances that the outdoor activities by the general public allowable on the Lower Bear Area planning unit parcels 952-958 would continue to include snowmobiling and off-highway vehicle use. Additionally, the agricultural use of informal grazing of livestock is also acknowledged as a historic use and is likewise allowed.
10. The PG&E response to Roberta Pickett clearly demonstrated that the Stewardship Council provided notice of the proposed transaction in accordance with D.03-12-035. Therefore, an extension of the protest period is not warranted. The protest of Roberta Pickett is dismissed as invalid.

11. The protest of Supervisor Oneto is dismissed as invalid. The clarifying information provided by PG&E demonstrates to the Commission that the conveyance of the proposed CE on the Property is consistent with the requirements of the Settlement and Stipulation.

12. AL 4573-E contained a LCCP that was compliant with D.03-12-035. The Stewardship Council prepared a LCCP for the Lower Bear Area planning unit conservation easement donation in compliance with D.03-12-035 and in accordance with the requirements set forth in Section 12(a) of the Stipulation Resolving Issues Regarding the Land Conservation Commitment.

13. In the LCCP, the Stewardship Council recommended that PG&E will retain, in fee-simple, the 7 parcels (952-958) of the Lower Bear Area planning unit and subject those parcels to a perpetual conservation easement. The Mother Lode Land Trust was identified as the organization qualified to hold and manage the conservation easement over the property. The Stewardship Council documented in the LCCP the ability of each organization to enhance the Beneficial Public Values (BPVs) of the Lower Bear Area planning unit parcels in compliance with D.03-12-035.

14. The Stewardship Council did not identify any physical measures to enhance the BPVs of the Lower Bear Area planning unit parcels. However, a grant program is available to fund future physical measures, if deemed appropriate by PG&E and the Mother Lode Land Trust.

15. The Summary of Potential Environmental Issues on Land to be Retained prepared by AMEC Geomatrix, Inc., dated September 8, 2010, found no potential hazardous waste, substance contamination, or other such environmental conditions on the property.
16. The proposed transaction constitutes no change in ownership and no proposed changes to land uses; thus no direct or indirect environmental impacts will occur as a result. Therefore, the transaction is exempt from review under the California Environmental Quality Act (CEQA). Accordingly, approval of this Advice Letter does not require review under CEQA.

17. PG&E will retain fee simple ownership of the land and will continue to pay property taxes to Amador County as assessed by the State Board of Equalization.

18. As recommended by the Pacific Forest and Watershed Stewardship Council, PG&E proposes to retain fee-simple title to the 899 total acres of the Lower Bear Area Planning unit parcels 952-958. The Lower Bear Area planning unit parcels will be protected by a Conservation Easement administered by the Mother Lode Land Trust.

19. The Stewardship Council has entered into a Conservation Easement Funding Agreement with the Mother Lode Land Trust to establish a monitoring endowment for costs the Mother Lode Land Trust will incur for monitoring activities at the Lower Bear Area Property.

20. The Implementation schedule calls for CPUC review and approval in 2015.

**THEREFORE IT IS ORDERED THAT:**

1. The request of Pacific Gas & Electric Company for approval of the Lower Bear Area Conservation Easement Donation as requested in AL 4573-E is approved.

This Resolution is effective today.
I certify that the foregoing resolution was duly introduced, passed and adopted at a conference of the Public Utilities Commission of the State of California held June 11, 2015; the following Commissioners voting favorably thereon:

/s/ TIMOTHY J. SULLIVAN
Executive Director

MICHAEL PICKER

Advice 4573-E
(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject:  Lower Bear Area Conservation Easement Donation - Request for Approval under Decision (D.) 08-11-043, D.10-08-004 and Public Utilities Code Section 851

Purpose

Pursuant to the streamlined procedures adopted by the California Public Utilities Commission (Commission or CPUC) in Decision (D.) 08-11-043 (as modified by D.10-08-004), Pacific Gas and Electric Company (“PG&E”) requests a disposition letter approving PG&E’s encumbrance with a perpetual conservation easement of approximately 899 acres of land in Amador County commonly known as Lower Bear Area (“Property”). Mother Lode Land Trust, a California non-profit public benefit corporation, will hold the conservation easement. PG&E will retain fee title to the Property and the conservation easement will be granted subject to certain reserved rights in favor of PG&E for the continued operation of PG&E’s hydroelectric and water delivery facilities. The perpetual encumbrance of the Property is in the public interest and will protect and preserve the Beneficial Public Values (“BPVs”) on the Property, including the habitat of fish, wildlife and plants, forest resources on the Property, the scenic viewshed of the Property, outdoor recreation, and identified historic and cultural values by restricting any use of the Property that would significantly impair or interfere with the protection of these values. This transaction is in accordance with the terms and conditions specified in the Settlement Agreement and Stipulation that were approved by the Commission in D.03-12-035 (“Stipulation”).

Background

Pursuant to the Stipulation, the Pacific Forest and Watershed Lands Stewardship Council (“Stewardship Council”) was established in 2004 to develop a plan to

---

1 Mother Lode Land Trust will also hold a conservation easement for Middle Fork Stanislaus River if approved by FERC and the CPUC. Requests for CPUC approval is made via Advice Letter 4575-E, submitted for filing concurrently with this advice filing.
permanently protect, for the benefit of the citizens of California, more than 140,000 acres of watershed lands ("Watershed Lands") owned by PG&E. This effort is known as PG&E’s Land Conservation Commitment. PG&E is fulfilling its commitment through fee donation of Watershed Lands and/or the conveyance of conservation easements (or satisfactory assurance in another form) that each parcel will be managed consistent with the purpose of the Land Conservation Commitment. PG&E will not make fee simple donations of lands that contain hydroelectric project features, hydroelectric projects licensed by the Federal Energy Regulatory Commission ("FERC"), or properties whose ownership is otherwise required for utility operations.

A detailed description of this proposed donation, which addresses the requirements set forth in Section 12(a) of the Stipulation, is provided in the attached Land Conservation and Conveyance Plan (Attachment A) prepared by the Stewardship Council and approved by their Board of Directors. Land Conservation and Conveyance Plans will be issued serially for all Watershed Lands and together will comprise the Land Conservation Plan Volume III.

In accordance with the streamlined procedure adopted by the Commission in D.08-11-043, PG&E provides the following information as required by Ordering Paragraph 2:

(1) **Identity of the Conservation Property**

The Property, identified as Parcels 952-958 (approximately 899 acres in total) on the map included in Attachment A, p. 3, is located in Amador County, approximately 35 miles northeast of Jackson at an approximate elevation range of 5,900 to 7,000 feet. The Property is generally surrounded by the Eldorado National Forest, and includes Lower and Upper Bear River Reservoirs. Lower Bear River Reservoir is accessible by a paved road, Bear River Road, off of Highway 88. Upper Bear River Reservoir is accessible by boat from Lower Bear River Reservoir and by a hiking trail on the westerly side of the reservoir.

(2) **Type of Property Interest Disposition**

Per the Stewardship Council recommendation, PG&E will convey a conservation easement to Mother Lode Land Trust, which will permanently protect the BPVs on the Property (Deed of Conservation Easement and Agreement, Attachment A, page 28). PG&E will not receive nor claim any monetary proceeds or tax benefits from this transfer (Attachment B).

A. **Property Encumbrances and Uses**

There are two lease agreements for economic uses on the property to be retained by PG&E, one for the Bear River Resort and one for Camp Ritchie, a summer camp for girls. In addition, there is an unrecorded

The Stipulation includes provisions to ensure the rights necessary to operate and maintain current and future hydroelectric and associated water delivery facilities are reserved, and the existing agreements for economic uses will be honored. Compliance with these requirements is reflected in the conservation easement (see Attachment A, pages 38, 44 and 68).

B. **PG&E’s Responsibility for Hazardous Substances**

Section 12(f) of the Stipulation requires that PG&E hold the donee and/or conservation organization harmless for hazardous waste or substance liability. Compliance with this requirement is reflected in the conservation easement (see Attachment A, page 56).

(3) **Legal Name and Location of Receiving Parties**

Mother Lode Land Trust  
Attention: Executive Director  
P.O. Box 1435  
Jackson, CA  95642  
Telephone: (209) 419-2861  
Email: ellie.routt@motherlodelandtrust.org

(4) **Proposed Uses and Conservation Management Objectives**

As set forth in the Stipulation, the cornerstone of the Land Conservation Commitment is its requirement that the Watershed Lands be preserved and enhanced for a broad range of BPVs, which are as follows:

- Protection of the Natural Habitat of Fish, Wildlife, and Plants
- Preservation of Open Space
- Outdoor Recreation by the General Public
- Sustainable Forestry
- Agricultural Uses
- Historic Values

The conservation easement for the Property ensures permanent protection of the BPVs on the property. Exhibit D of the conservation easement lists the BPVs present on the Property (Attachment A, page 70). These are:
A. Protection of the Natural Habitat of Fish, Wildlife, and Plants

Habitat for fish, wildlife, and plants that are native to the area, including species protected under the California Endangered Species Act and/or the federal Endangered Species Act. The term “habitat” includes vegetation along banks and shorelines that contribute to maintaining watershed health. The term “native” refers to plants and animals that occur naturally on the Property, and are defined as “native” by the California Department of Fish & Wildlife and its successors.

B. Preservation of Open Space

The scenic viewshed of the Property in keeping with the surrounding environment, providing a contiguous forested landscape visible to passersby on the nearby roads, as well as views of the waterbodies on the Property.

C. Outdoor Recreation by the General Public

Outdoor recreation such as camping, swimming, hiking, boating and sightseeing. Developed outdoor recreational facilities are located on the Property.

D. Sustainable Forestry

Forest resources on the Property. Forest resources consist of high-elevation Sierra Nevada mixed conifer forest type.

E. Agricultural Uses

There is no grazing or other agricultural use on the Property, as such, Agricultural Uses is not identified as a BPV in the conservation easement.

F. Historic Values

Identified historical and cultural values, to the extent they are protected by state and federal law, including artifacts related to Native American uses and the development of hydroelectric generating facilities on the property.

(5) Environmental Information

The proposed conveyance of a conservation easement constitutes no proposed changes to land use; thus, no direct or indirect environmental impacts will occur as a result. Therefore, the transaction does not constitute
a “project” under the California Environmental Quality Act (CEQA). Accordingly, as stated in D.99-12-030 (pages 7 and 9), this advice letter process is not subject to review under CEQA.

(6) FERC Approval

Standard FERC Licenses require Licensees to obtain and hold the interests in lands and other property necessary to operate their licensed projects; and to obtain prior FERC permission to sell, lease, or otherwise dispose of such interest.

A portion of the Property is within the Mokelumne River FERC Project (FERC #137). PG&E has requested approval from FERC to convey the conservation easement within FERC’s jurisdiction.

PG&E’s Review & Finding

PG&E has reviewed the transaction and documents herein, and has determined that the proposed transaction is compliant with requirements of the Stipulation. Additionally, this transaction will not have an adverse effect on the public interest or on the ability of the utility to provide safe and reliable service to customers at reasonable rates.

Protests

Anyone wishing to protest this filing may do so by letter sent via U.S. mail by facsimile or electronically, any of which must be received no later than February 19, 2015, which is 20 days after the date of this filing. Protests should be mailed to:

CPUC Energy Division  
ED Tariff Unit  
505 Van Ness Avenue, 4th Floor  
San Francisco, California 94102  
Facsimile: (415) 703-2200  
E-mail: EDTariffUnit@cpuc.ca.gov

Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest also should be sent via U.S. mail (and by facsimile and electronically, if possible) to PG&E at the address shown below on the same date it is mailed or delivered to the Commission.
Any person (including individuals, groups, or organizations) may protest or respond to this advice letter; the requirements for responding to advice letters are set forth in General Order 96-B, Rules 3.11; see also Decision 08-11-043 (as modified by Decision 10-08-004).

Effective Date

Pursuant to the review process outlined in D.08-11-043 (as modified by D.10-08-004), PG&E requests this Category 1 advice filing become effective as soon as possible.

Notice

In accordance with General Order 96-B, Section IV, and D.08-11-043, a copy of this advice letter is being sent electronically and via U.S. mail to parties shown on the attached list, Service List A.08-04-020, Appendix A and additional parties identified by the Stewardship Council. Address changes to the General Order 96-B service list should be directed to e-mail PGETariffs@pge.com. For changes to any other service list, please contact the Commission’s Process Office at (415) 703-2021 or at Process_Office@cpuc.ca.gov. Send all electronic approvals to PGETariffs@pge.com. Advice letter filings can also be accessed electronically at: http://www.pge.com/tariffs.

Land Conservation and Conveyance Plan
Land Conservation and Conveyance Plan
PG&E Retained Lands at Lower Bear Area Planning Unit
Executive Summary

Subject

LCCP Lower Bear Area Planning Unit
Land Conservation Plan Identification Numbers (Parcels) 952-958 as shown on the map attached as Exhibit 1.

Type of Property Interest Disposition

- PG&E to retain fee simple title to the 899 acres within Parcels 952-958.
- Mother Lode Land Trust (MLLT) to hold the conservation easement on the 899 acres in Parcels 952-958.

Summary

All 899 acres within Parcels 952-958 will be retained by PG&E and are the subject of this LCCP. Pending Federal Energy Regulatory Commission (FERC) and California Public Utilities Commission (CPUC) approval, PG&E and MLLT will enter into a conservation easement that will encumber Parcels 952-958.

Property Location

The Lower Bear Area planning unit is located within the Eldorado National Forest in Amador County, approximately 35 miles northeast of Jackson. The property subject to this LCCP consists of 899 acres in Amador County surrounding Upper and Lower Bear River Reservoirs.

Economic Uses and Agreements

There are two lease agreements for economic uses on the property to be retained by PG&E, one for the Bear River Resort and one for Camp Ritchie, a summer camp for girls.

In addition, there is an unrecorded letter agreement regarding Kirkwood Meadows Public Utilities District (PUD) Out-Valley Transmission Line dated May 10, 2013 between PG&E and Kirkwood Meadows PUD for use of temporary staging areas.

Finally, there are recorded encumbrances for road easements and road and utility purposes on the 899 acres within Parcels 952-958 at the Lower Bear Area planning unit to be retained by PG&E.

Preserving and/or Enhancing the Beneficial Public Values

The conservation easement on the Lower Bear Area property lists the following Beneficial Public Values (BPVs) to be protected:
• Habitat for plants and animals that are native to the area, including species protected under the California Endangered Species Act and/or the federal Endangered Species Act. The term “native” refers to plants and animals that occur naturally on the Property, and are defined as “native” by the California Department of Fish & Wildlife and its successors.

• Forest resources on the property. Forest resources consist of high-elevation Sierra Nevada mixed conifer forest type.

• The scenic viewshed of the Property in keeping with the surrounding environment, providing a contiguous forested landscape visible to passersby on the nearby roads as well as views of the waterbodies on the Property.

• Outdoor recreation such as camping, swimming, hiking, boating and sightseeing. Developed outdoor recreational facilities are located on the Property.

• Historical and cultural values, to the extent they are protected by state and federal law, including artifacts related to Native American uses and the development of hydroelectric generating facilities on the property.

**Tax Neutrality**

PG&E will continue to own and pay property taxes on the property.

**Hazardous Waste Disclosure**

As part of its due diligence disclosures, PG&E will provide the Summary of Potential Environmental Issues on Land to be Retained prepared by AMEC Geomatrix, Inc., dated September 8, 2010 to MLLT, fulfilling the disclosure requirements of the Land Conservation Commitment.

**Consideration of Parcel Split**

All 899 acres within Parcels 952-958 are being retained by PG&E and no parcel split is being proposed.

**Applicable CEQA Exemption(s) or Reason Why Transaction is not a “Project Under CEQA”**

The establishment of a conservation easement is categorically exempt under Section 15325 of the CEQA Guidelines (CFR Title 14, Chapter 3).

The Lower Bear Area transaction will not result in a direct physical change or a reasonably foreseeable indirect physical change in the environment; therefore, the Stewardship Council does not believe that the transaction is a project under CEQA.

Introduction

The Pacific Forest and Watershed Lands Stewardship Council (Stewardship Council) is a private, nonprofit foundation established in 2004 pursuant to a Settlement Agreement and a Stipulation Resolving Issues Regarding the Land Conservation Commitment approved by the California Public Utilities Commission (CPUC) in Decision 03-12-035 (Dec. 18, 2003). The Stewardship Council Board of Directors includes appointees from state and federal agencies, water districts, Native American and rural interests, forest and farm industry groups, conservation organizations, the CPUC, and Pacific Gas and Electric Company (PG&E).

The Stewardship Council has developed a plan to protect more than 140,000 acres of watershed lands (Watershed Lands) currently owned by PG&E for the benefit of the citizens of California. Protecting the Watershed Lands will be accomplished through (1) PG&E’s grant of conservation easements to one or more public agencies or qualified conservation organizations so as to protect the natural habitat of fish, wildlife, and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values (collectively the Beneficial Public Values), and in some cases, (2) PG&E’s donation of the Watershed Lands in fee to one or more public entities or qualified conservation organizations, whose ownership would be consistent with these conservation objectives.

Located primarily in the Sierra Nevada and Cascade Mountain range watersheds, the Watershed Lands contain some of the most pristine and resource-rich landscapes found in the state. The properties are diverse and geographically remote, located in 21 counties from the northern reaches of the state to the southern end of the Central Valley.

As required by the Settlement and Stipulation, the Stewardship Council prepared a Land Conservation Plan (LCP) to establish a framework for the conservation and/or enhancement of the Watershed Lands, and to ensure the permanent protection of these lands for the benefit of current and future generations of Californians. To address the challenge of a conservation effort of this large scope and unique nature, and to facilitate engagement of a wide range of stakeholders and interested members of the public, the Stewardship Council grouped the Watershed Lands into 47 planning units and established a phased approach to development and implementation of the LCP.

In 2007, the Stewardship Council board adopted Volumes I and II of the LCP:

- **Volume I**: The Land Conservation Framework establishes the overall framework for the LCP, including legal requirements, the planning process, methodologies, public involvement, and relevant regulatory processes.

- **Volume II**: Planning Unit Concepts documents existing conditions and presents management objectives, potential measures, and conceptual plans to preserve and/or enhance the Beneficial Public Values (BPVs) within each planning unit. It also documents existing economic uses.
Volume III, consisting of Land Conservation and Conveyance Plans (LCCPs) to be issued serially and cumulatively, will encompass a series of real estate transaction packages that will detail the specific land conservation and/or disposition requirements for each parcel or parcel cluster. LCCPs represent the Stewardship Council’s recommendations for preserving and/or enhancing the BPVs of the Watershed Lands, and are intended to support required regulatory approvals of the land transactions resulting from the Stewardship Council’s recommendations. The content of the LCCP spans a number of issues required by the Settlement and Stipulation, such as an express reservation of a right for continued operation and maintenance of hydroelectric facilities and associated water delivery facilities, including project replacements and improvements required to meet existing and future water delivery requirements for power generation and consumptive water use by existing users, compliance with any Federal Energy Regulatory Commission (FERC) license, FERC license renewal, or other regulatory requirements. In addition, conservation easements will honor existing agreements for economic uses, including consumptive water deliveries, and preserve or enhance reasonable public access to the Watershed Lands.

During the development of LCP Volumes I and II and the LCCPs, the Stewardship Council implemented a public outreach program to ensure local communities, elected representatives, neighboring property owners, and other key stakeholders had many opportunities to engage in the Stewardship Council’s effort to preserve and enhance the Watershed Lands. To solicit additional input from the public on potential fee title recipients or conservation easement holders (referred to as donees), the Stewardship Council hosted a series of public information meetings. These meetings were designed to (1) provide an overview and update on the Stewardship Council’s Land Conservation Program, (2) outline next steps, timeline, and opportunities for additional public input, and (3) solicit public input on the desired qualifications of potential donees and the future stewardship of the planning units.

Public input that the Stewardship Council received as a result of the public outreach process, including comments on Volume II of the LCP, comments from public information meetings on the selection of donees and other issues, and correspondence received by the Stewardship Council were considered by the Stewardship Council in its evaluation of the potential donees and their land stewardship proposals. In addition to public meetings, the public was given the opportunity to participate in all of the Stewardship Council’s public board meetings where decisions were made on fee title and conservation easement donees. Prior to making a decision regarding the disposition of any parcel, the Stewardship Council will provide notice to the Board of Supervisors of the affected county, each affected city, town, and water supply entity, each affected Tribe and/or co-licensee, and each landowner located within one mile of the exterior boundary of the parcel, by mail or other effective manner. A summary of the public outreach process for this subject LCCP, the Lower Bear Area planning unit, is provided in Appendix 1. Furthermore, the proposed LCCP will be made available for public review and comment before it is forwarded by the Watershed Planning Committee to the board for its review and approval.
The Stewardship Council Board of Directors recommends the Mother Lode Land Trust (MLLT) hold the conservation easement encumbering all seven parcels (952-958) of the lands to be retained by PG&E.

Table 1-1 identifies Stipulation requirements that will be addressed in the LCCP and includes pertinent language from the Stipulation.

1. Acreage, Existing Economic Uses and Agreements

Acreage and Property Description

Approximately 899 acres in the seven parcels (Parcels 952-958) surrounding Upper and Lower Bear River Reservoirs will be retained by PG&E and, consistent with the conditions in the Settlement Agreement, will be encumbered with a perpetual conservation easement, granted by PG&E to MLLT as described in Chapter 3.

The Lower Bear Area planning unit is located in Amador County, approximately 35 miles northeast of Jackson at an approximate elevation range of 5,900 to 7,000 feet. The planning unit is surrounded by the Eldorado National Forest. The planning unit includes portions of Lower and Upper Bear River Reservoirs and land bordering a portion of Cole Creek, east of the reservoirs.

Habitat for several special status species is located in the vicinity of Upper and Lower Bear River Reservoirs, including the Federal candidate mountain yellow-legged frog, and various bird species including willow flycatcher, bald eagle, and California spotted owl. Upper and Lower Bear River Reservoirs provide habitat for a variety of coldwater fish species, including rainbow trout, brown trout, and tui chub.

The planning unit provides many outdoor recreational opportunities, including fishing, boating, swimming, camping, hiking and snowmobile use. Lower Bear River Reservoir is annually stocked with rainbow and brown trout and is known to be an exceptional northern California trout fishery. The Silver Bear Snowmobile Trail is located adjacent to Lower Bear River Reservoir and provides 20 to 55 miles of popular trails during the winter recreation season. The Bear River Resort is located on the western side of Lower Bear River Reservoir and is operated under a lease with PG&E. Many of the area’s recreational opportunities are provided by this lessee, including summer boat rentals. The resort also provides a store, restaurant, 126 campsites (including 30 trailers), and a marina. Camp Ritchie, which PG&E leases to the Church of Jesus Christ of Latter Day Saints (LDS), is operated as a 120-person per session summer camp for girls.

The planning unit contains three PG&E Timber Management Units (TMUs) for a total of 895 timbered acres. The TMU located by Upper Bear River Reservoir contains 68 timbered acres and is managed under a Recreation and Sustainable Timber Management prescription, meaning that recreation in this area is compatible with timber management. Forest management in designated recreation areas is limited to fuels reduction, hazard tree removal, and improvement of aesthetics. Outside of designated recreation areas, sustainable timber management is emphasized. The TMU located by Lower Bear River Reservoir contains 273 timbered acres and is managed under a Multiple-Use prescription, meaning that protection and uses of other resources and facilities may preclude sustained timber yield management as the highest and best use of portions of the TMU.

The Lower Bear Area planning unit is within the traditional territory of the Northern Sierra Miwok; prehistoric sites have been identified in the area.
Adjacent and Nearby Landowners

The seven parcels within the Lower Bear Area that are the subject of this LCCP are surrounded by National Forest System lands managed by the Eldorado National Forest. Lower Bear River Reservoir is accessible by a paved road, Bear River Road, off of Highway 88. Upper Bear River Reservoir is accessible by boat from Lower Bear River Reservoir and by a hiking trail on the western side of the reservoir.

The Stewardship Council notified and invited landowners located within one mile of the subject parcels to provide comment during key phases of the land conservation and conveyance planning process. Any comments received were brought to the attention of the Stewardship Council Board of Directors.

Existing Economic Uses and Agreements

There are two lease agreements for economic uses on the property to be retained by PG&E, one for the Bear River Resort and one for Camp Ritchie, a summer camp for girls.

In addition, there is an unrecorded letter agreement regarding Kirkwood Meadows Public Utilities District (PUD) Out-Valley Transmission Line dated May 10, 2013 between PG&E and Kirkwood Meadows PUD for use of temporary staging areas.

Finally, there are recorded encumbrances for road easements and road and utility purposes on the 899 acres within Parcels 952-958 at the Lower Bear Area planning unit to be retained by PG&E.

PG&E will reserve rights in the conservation easement as necessary to maintain and operate existing and future utility facilities over portions of the parcels. The specific Hydro Reserved Rights are set forth in the conservation easement, which can be found in Appendix 2.
2. **Objectives to Preserve and/or Enhance the BPVs**

The Land Conservation Commitment provides that “PG&E shall ensure that the Watershed Lands it owns… are conserved for a broad range of beneficial public values, including the protection of the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values. PG&E will protect these beneficial public values associated with the Watershed Lands… from uses that would conflict with their conservation. PG&E recognizes that such lands are important to maintaining the quality of life of local communities and all the people of California in many ways, and it is PG&E’s intention to protect and preserve the beneficial public values of these lands under the terms of any agreements concerning their future ownership or management.”

The following text lists the objectives for each BPV at the Lower Bear Area planning unit that the Stewardship Council board approved in LCP Volume II, as well as a description of how the conservation easement addresses each objective and each applicable BPV.

The conservation easement will protect the BPVs, subject to PG&E’s hydro and other reserved rights as provided in the conservation easement.

1. **Objective: Preserve and enhance habitat in order to protect special biological resources and wilderness values.**

The conservation easement (Appendix 2) includes a list of BPVs that will be protected including the following BPV: “Habitat for plants and animals that are native to the area, including species protected under the California Endangered Species Act and/or the federal Endangered Species Act. The term ‘native’ refers to plants and animals that occur naturally on the Property, and are defined as ‘native’ by the California Department of Fish and Wildlife and its successors.”

2. **Objective: Preserve open space in order to protect natural and cultural resources, viewsheds, and the recreation setting.**

The conservation easement will conserve the scenic character of the property by ensuring that no further development will occur unless specifically authorized or permitted by the conservation easement.

3. **Objective: Enhance recreational facilities in order to provide additional public access, and education and recreation opportunities.**

The conservation easement acknowledges that outdoor recreational facilities exist on the property, and lists recreation use including camping, swimming, hiking, boating and sightseeing as a BPV ensuring the protection and preservation of such uses in perpetuity. Furthermore, the conservation easement provides that the landowner will allow public access on the property at levels substantially consistent with those existing at the time the conservation easement is recorded, subject to PG&E’s Hydro Reserved Rights, Exhibit F

---

¹ Land Conservation Commitment I.02-04-026, Appendix E, p. 38
(Prohibited Uses) of the conservation easement and right to make reasonable rules and regulations.

4. **Objective:** Develop and implement forestry practices in order to contribute to a sustainable forest, preserve and enhance habitat, enhance surrounding wilderness values, as well as to ensure appropriate fuel load and fire management.

Forest management activities will be subject to compliance with applicable laws and conducted as further described and allowed in the conservation easement (Appendix 2).

5. **Objective:** Identify potential grazing opportunities in order to enhance agricultural resources and related economic benefits.

There is currently no managed grazing within the planning unit.

6. **Objective:** Identify and manage cultural resources in order to ensure their protection.

The conservation easement will protect historic and cultural resources on the Property to the extent they are protected by state and federal law, including artifacts related to Native American uses.
3. **Recommendations for Conservation Easement and Fee Simple Donation**

The Settlement and Stipulation require that the Watershed Lands: (1) be subject to permanent conservation easements restricting development of the Watershed Lands so as to protect and preserve the BPVs, and/or (2) be donated in fee simple to one or more public entities or qualified nonprofit conservation organizations, whose ownership will ensure the protection of these BPVs.

**Conservation Easement**

The Settlement Agreement states “the conservation easements shall provide for the preservation of land areas for the protection of the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values, and shall prevent any other uses that will significantly impair or interfere with those values. Conservation easements on the Watershed Lands will include an express reservation of a right for continued operation and maintenance of hydroelectric facilities and associated water delivery facilities, including project replacements and improvements required to meet existing and future water delivery requirements for power generation and consumptive water use by existing users, compliance with any FERC license, FERC license renewal or other regulatory requirements. In addition, conservation easements will honor existing agreements for economic uses, including consumptive water deliveries. The conservation easements shall be donated to and managed by one or more non-profit conservation trusts, qualified conservation organizations or public agencies with the experience and expertise to fully and strictly implement the conservation easements” (Land Conservation Commitment I.02-04-026, Appendix E, pp. 38-39).

For the complete text of the conservation easement, see Appendix 2.

Conservation easements must be donated to nonprofit organizations, Native American tribes, or public agencies that meet the requirements of California Civil Code section 815.3 and possess the experience and capacity to fully and strictly implement the terms of the conservation easement. The Mother Lode Land Trust (MLLT) will hold the conservation easement over the lands in the Lower Bear Area planning unit to be retained by PG&E. The qualifications of the MLLT are described in Chapter 4.

Accordingly, immediately following the Section 851 approval of PG&E’s grant of a conservation easement over lands retained by PG&E in the Lower Bear Area planning unit, PG&E and MLLT will execute the conservation easement and it will be recorded.

**Retention or Donation of Fee Title**

The Settlement Agreement states that PG&E will not be expected to make fee simple donations of Watershed Lands with hydroelectric project features, and conservation easements and enhancements may not interfere with hydroelectric operations. In general, PG&E will retain fee title to those Watershed Lands within the boundaries of hydroelectric projects licensed by the FERC, as well as other properties required for
continuing and future utility operations. However, these Watershed Lands will be conserved via a conservation easement. See Appendix 5 for a description of PG&E’s Land Conservation Commitment.

**Lands to be Retained by PG&E**

All 899 acres within seven parcels (952-958) of the Lower Bear Area planning unit will be retained in fee by PG&E, as shown in the map attached in Appendix 4. The map also shows key features in the planning unit and surrounding area, and the ownership of adjacent land.

**Lands to be Donated by PG&E**

The remaining lands in the Lower Bear Area planning unit will be donated by PG&E and are the subject of a separate LCCP.
4. **Finding of Donee Funding and Other Capacity to Maintain Lands to Preserve and/or Enhance the BPVs**

**Selected Organizations**

At the conclusion of the selection process referenced below, the following organization was endorsed by the Stewardship Council board on December 2, 2010:

- Mother Lode Land Trust (MLLT) to hold a conservation easement over the seven parcels to be retained by PG&E (Parcels 952-958) in the Lower Bear Area planning unit.

**Capacity of Selected Organizations**

The Stewardship Council board finds that MLLT has the funding and other capacity to maintain the property interest so as to preserve and/or enhance the BPVs.

- MLLT was established in 1991 and, as of 2014, MLLT holds 20 conservation easements on over 3,490 acres in Amador, Calaveras, Alpine, Tuolumne, and El Dorado counties. MLLT also owns and manages the 187 acre Chichizola-Cuneo Ranch in Jackson Ca. as well as 375 acres of the Deer Creek Hills preserve in a partnership with the Sacramento Valley Conservancy.

- MLLT has an experienced staff and board of directors with expertise in forestry, agriculture, wildlife biology, rangeland science, land management, appraisal practices, local government, and community development.

- MLLT is a qualified conservation easement holder under California Civil Code Section 815.3.

**Donee Selection Process**

The Stewardship Council used the following process to select an organization to become the conservation easement holder at the Lower Bear Area planning unit:

- Organizations were invited to register via the Stewardship Council’s Interested Donee Registry and were invited to submit a statement of qualifications (SOQ).

- The Stewardship Council reviewed the SOQs that were submitted. Organizations with interest in holding conservation easements that appeared to be capable of satisfying the requirements of the Settlement and Stipulation for receiving a donation of a conservation easement, were invited to submit additional information describing their qualifications.

- Organizations demonstrating sufficient experience holding and enforcing conservation easements, sufficient financial and organizational capacity, and which the Stewardship Council has determined to be best-suited to receive a
donation of conservation easements within particular Watershed Lands are being recommended to PG&E to receive conservation easements.
5. Analysis of Tax and Other Economic and Physical Impacts

The Settlement and Stipulation require that the LCCP provide “an analysis of tax and other economic and physical impacts of such disposition strategy, and a commitment by an appropriate entity (which may be PG&E, subject to being authorized by the Commission to fully recover in rates any such costs in approving PG&E’s Section 851 application or in another appropriate Commission proceeding, Stewardship Council, donee, or a third party, depending on the individual circumstances) to provide property tax revenue, other equivalent revenue source, or a lump sum payment, so that the totality of dispositions in each affected county under this Land Conservation Commitment will be ‘tax neutral’ for that county.”

Property Tax Analysis

PG&E is retaining fee title ownership of the 899 acres within Parcels 952-958 of the Lower Bear Area planning unit and as such, PG&E will continue to pay property taxes to Amador County as assessed by the State Board of Equalization.

Other Economic and Physical Impacts

The Settlement and Stipulation require an analysis of the physical and economic impacts of each disposition. The agreements for the conservation easement on Parcels 952-958 of the Lower Bear Area planning unit have not mandated any changes to the physical or economic uses and PG&E intends to manage the lands in a manner consistent with the current physical and economic uses.

No new activities are proposed that will result in physical impacts.

The conservation easement will permit existing economic uses on the lands to continue. The conservation easement will prohibit development and other uses of the land that would significantly impair the BPVs, all subject to PG&E’s Hydro Reserved Rights which can be found in Appendix 2.
6. **Hazardous Waste Disclosure**

The Stipulation states that in the transfer of fee title and conveyance of a conservation easement, PG&E will disclose all known hazardous waste, substance contamination, or other such environmental liabilities associated with each parcel and hold the donee harmless.

**Lands to be Retained by PG&E**

As part of its due diligence disclosures, PG&E will provide the Summary of Potential Environmental Issues on Land to be Retained prepared by AMEC Geomatrix, Inc., dated September 8, 2010 to MLLT, fulfilling the disclosure requirements of the Land Conservation Commitment.
7. **Consideration of Parcel Split**

PG&E will retain fee title to all 899 acres within Parcels 952-958 of the Lower Bear Area planning unit. Therefore, there is no need for a parcel split.
8. **Strategy for Physical Measures to Enhance the BPVs**

The Stewardship Council developed and implemented a strategy to identify and undertake appropriate physical measures to enhance the BPVs of the Watershed Lands consistent with Settlement Agreement paragraph 17(c)\(^3\) and Appendix E, paragraph 1.

During the preparation of Volume II of the LCP, a number of potential physical enhancement measures to preserve and/or enhance the BPVs were identified. These measures were identified with public input and were intended to be illustrative in nature and subject to change over time in coordination with the future landowner.

The Stewardship Council has developed a grant program to fund enhancements on the Watershed Lands in the future. Grant funding will be available to accomplish any number of potential future physical measures such as developing trails, day use areas, and other public access improvements.

---

\(^3\) Settlement Agreement Paragraph 17(c) states, “PG&E shall fund PG&E Environmental Enhancement Corporation with $70 million in Cash to cover administrative expenses and the costs of environmental enhancements to the Watershed Lands… provided that no such enhancement may at any time interfere with PG&E’s hydroelectric operations maintenance or capital improvements.”

The Stipulation requires that the LCCP outline a plan to monitor the economic and physical impacts of disposition and implementation of enhancement measures.

The conservation easement holder is required to monitor every conservation easement that it holds to ensure that the landowner is complying with the terms of the easement. The Stewardship Council will enter into a Conservation Easement Funding Agreement (Appendix 3) with each conservation easement holder whereby the holder will receive a monitoring and enforcement endowment from the Stewardship Council to fund its monitoring activities.

To further meet the requirement of monitoring the economic and physical impacts, the Stewardship Council will enter into an agreement with the Sierra Nevada Conservancy (SNC), a state agency, whereby the agency will agree to undertake certain duties designed to monitor the impacts of PG&E’s Land Conservation Commitment.

When the Stewardship Council has completed its work, it will be dissolved. Prior to its dissolution, the Stewardship Council expects to prepare a report providing an assessment of any economic and physical impacts resulting from the Land Conservation Commitment as of that time. Stewardship Council’s close-out report will include, among other things, the following information:

- How the property tax neutrality requirement was satisfied with regard to each parcel donated to a tax exempt organization.
- A report regarding the enhancements that were funded by the Stewardship Council.

It is anticipated that several years after the dissolution of the Stewardship Council, SNC will prepare a report assessing the physical and economic impacts of the Land Conservation Commitment up until that time. The report is expected to cover the following topics:

- Impact of the Land Conservation Commitment on agreements for economic uses.
- Changes in entities holding conservation easements or fee title.
- Performance of duties by conservation easement holders.

In addition to preparing an assessment report, which will be submitted to the CPUC and PG&E, SNC will serve as a public repository for key transaction documents and other documents pertaining to the Land Conservation Commitment through June 2025.
10. Implementation Schedule for Transaction and Measures

Schedule for Transaction

- FERC review and approval (2015)
- CPUC review and approval (2015)
- Close of escrow (2015)
- Stewardship Council release of funds to MLLT per conservation easement funding agreement (2015)

Compliance with Local Land Use Planning Requirements

Future management of Parcels 952-958 at the Lower Bear Area planning unit is anticipated to comply with all applicable County ordinances and/or General Plan policies.
SUMMARY OF PUBLIC OUTREACH PROGRAM

The Stewardship Council established a comprehensive public outreach program to both inform and solicit input from the public on the development and implementation of a plan to permanently protect over 140,000 acres of PG&E watershed lands. A variety of tools and techniques are used to engage the public, including:

- **Stewardship Council Website**: the website provides background information on the land conservation program and is regularly updated with board meeting agendas and minutes, proposed recommendations, and other announcements.

- **Stakeholder Database and E-mailing**: regular e-mail notifications are sent directly to individuals and organizations that have signed-up to receive e-mails. The e-mails provide updates on the status of the land conservation program, including pending actions by the board and upcoming public meetings.

- **Targeted Newspaper Noticing and Paid Advertisements**: newspaper advertisements and notices are placed in local newspapers circulated in the area where a board or public meeting is taking place or in communities that may have an interest in a particular topic on an upcoming meeting agenda.

- **News Releases**: news releases are issued to statewide and local media outlets at key intervals during the planning process.

- **Public Information Meetings and Workshops**: public information meetings and workshops are conducted throughout the watershed lands to provide updates and solicit input from interested stakeholders on the land conservation program and individual planning units. In many workshops, public comments were sought on potential measures to protect and enhance the beneficial public values on specific lands as well as the desired qualifications of potential donee organizations. Individuals and organizations unable to attend are provided an opportunity to submit comments in writing and review meeting summaries posted on the web site.

- **Notice by Mail of Pending Decisions Regarding the Conveyance of Individual Parcels and Invitation to Comment**:
  - Noticing of Affected Governmental Entities: prior to the Watershed Planning Committee forwarding a recommendation to the board that a proposed Land Conservation and Conveyance Plan (LCCP) be adopted by the board, a notice will be mailed to the Board of Supervisors of the affected county; each affected city, town, and water supply entity; and each affected tribe and/or co-licensee.
  - Noticing of landowners: postcards or letters are sent to all landowners located within one mile of lands that are the subject of a proposed LCCP prior to the Watershed Planning Committee forwarding a recommendation to the board that the proposed LCCP be adopted by the board.

- **Individual Meetings with Stakeholders**: Over the course of the preparation of Volumes I and II of the Land Conservation Plan (LCP) and the LCCP, Stewardship Council staff met, and communicated via the telephone and email, with a number of stakeholders interested in the Watershed Lands.
Appendix 1: Summary of Public Outreach

- The Stewardship Council Board of Directors meets five to six times per year, typically on a bimonthly schedule. At the board meetings, the public is invited to directly address the board on an agenda item or on any other matter. The meetings have been held at locations in northern and central California and across the watershed lands to help facilitate public participation. Agendas are available one week prior to meetings, and meeting minutes are posted on the Stewardship Council public website approximately three weeks following those meetings.

**LOWER BEAR PLANNING UNIT PUBLIC OUTREACH**

Highlighted below are the opportunities that have been, or are being, provided for public input on key documents and decisions concerning the Lower Bear planning unit and the land conservation and conveyance process.

I. **PUBLIC REVIEW OF VOLUMES I AND II OF THE LCP**

The Draft Land Conservation Plan Volumes I and II were released in June 2007 for a 60-day public comment period. During this time, the Stewardship Council held ten public meetings to publicize the availability of the Draft LCP and to encourage public comment. These meetings were advertised via an e-mail sent to contacts in the Stewardship Council’s database, an announcement posted on the Stewardship Council’s web site, a press release issued to local newspapers, a paid advertisement in local papers, and a postcard sent to all landowners on record that reside within one mile of any PG&E parcel. Comments were received via email, the website, and hardcopy letters. The comments were reviewed, and responded to individually; and the text in the draft LCP was revised as appropriate.

During public review of Volumes I and II of the LCP, 19 public comments were submitted concerning the Lower Bear planning unit. These comments primarily noted the Amador Water Agency’s plans to consider increased storage at Lower Bear Reservoir and the potential impacts to the proposed Recommended Concepts. Comments also requested that protection for water quality and supplies be reflected in the Recommended Volume II Concept Objectives and Beneficial Public Values. Comments were also submitted to clarify that the Mokelumne Wilderness boundary encompassed the easternmost parcel at Cole Creek, and to support appropriate management measures to prevent entry of OHV’s within the wilderness boundary. One comment noted that the Cole Creek parcels presented limited potential for supporting youth program opportunities, and one comment noted that no change should be made to the existing Camp (Camp Ritchie) near the property.

II. **NOTICING OF LANDOWNERS WITHIN ONE MILE**

In the fall of 2006 a postcard was distributed to the approximately 26,000 landowners located within one mile of the exterior boundary of all the parcels to notify and invite comment on Volume I and II of the LCP. A postcard was also sent to notify and invite all landowners located within one mile of the parcels within the Lower Bear planning unit to a Public Information Meeting that was held in Jackson, California on October 7, 2009. In addition, simultaneous with the release of the proposed subject LCCP for public comment, adjacent landowners located within one mile of the subject parcels are noticed by mail 30 days before the Watershed Planning Committee considers forwarding the proposed subject LCCP to the board for final approval.
III. PUBLIC INFORMATION MEETING

A Public Information Meeting workshop for several planning units in the Mokelumne Watershed Area was hosted by the Stewardship Council on October 7, 2009 in Jackson, California. The meeting concerned two planning units: Lower Bear Area and North Fork Mokelumne River. Attendees at the workshop included a total of 36 individuals representing a wide variety of interests including local, state, federal, and tribal governments; and community organizations. The meeting was advertised via an e-mail sent to contacts in the Stewardship Council’s database, an announcement posted on the Stewardship Council’s web site, a press release issued to the local newspaper, and a postcard sent to all landowners on record located within one mile of any PG&E parcel associated with the Lower Bear planning unit.

The purpose of the workshop was to: (1) provide an overview of the land conservation process; and, (2) solicit additional public input on future stewardship of the two planning units.

IV. PUBLIC REVIEW OF LAND CONSERVATION PROGRAM POLICIES & GUIDELINES

Public comment was sought on policies and guidelines that helped inform the Stewardship Council’s land conservation and conveyance process. These documents were provided to the public in advance of being reviewed and endorsed by the Watershed Planning Committee or Fiduciary Committee and forwarded to the board for review and consideration.

Land Conservation Program Funding Policy

The Stewardship Council created a Land Conservation Program Funding Policy to help guide future planning and decision-making regarding funding of the long term management and stewardship of the watershed lands. In June and July, 2009, the draft policy was posted on the Stewardship Council’s web site and made available for review and comment to a group of stakeholders consisting of all registered potential donees and representatives of the counties in which the watershed lands are located. Two comments were received during the 30-day review and comment period. Both comments were reviewed, and it was determined that neither comment necessitated a change in the draft policy. The Stewardship Council’s Board of Directors adopted the policy at a public board meeting in Sonora, Calif. on September 17, 2009.

Guidelines for Achieving Property Tax Neutrality

The Stewardship Council created guidelines for achieving property tax neutrality to describe scenarios when the Stewardship Council will make property tax payments to affected counties as in lieu payments for property taxes that are lost due to the donation of PG&E watershed lands to an entity that is exempt from paying property taxes. The guidelines also defined a set of overarching assumptions regarding property tax neutrality payments. The draft guidelines were posted on the Stewardship Council’s web site in December 2010. A notice inviting review and comment on the guidelines was sent to the Stewardship Council’s stakeholder database. Additional targeted outreach was performed to inform the affected counties. Nine comments were received during the 60-day review and comment period. After consideration of public comments, the Stewardship Council Board adopted a set of guidelines at its public board meeting on March 30, 2011.
Proposed methodology for achieving tax neutrality

The proposed methodology for achieving tax neutrality on donated lands was e-mailed to all land stakeholders and posted on Stewardship Council’s website for public review and comment on January 9, 2012. The deadline for submission of comments was March 9, 2012. The Stewardship Council received one request to extend this deadline, which was granted. By the new deadline March 30, 2012, six comments were received. Upon consideration of the comments received, the Stewardship Council board deferred adoption of the full methodology until the June 27, 2012 board meeting so that the affected counties could be notified of the proposed change to the capitalization rate. No comments were received on the revised capitalization rate. The revised methodology was adopted by the board at its June 27, 2012 meeting.

V. WATERSHED PLANNING COMMITTEE RECOMMENDATIONS OF FEE TITLE AND CONSERVATION EASEMENT DONEES

Staff recommendations for prospective fee title donees and conservation easement holders that are endorsed by the Watershed Planning Committee are posted on the Stewardship Council’s website for public review and comment. The proposed board action is noticed via an e-mail sent to contacts in the Stewardship Council’s database. In addition, public board meetings are advertised via an e-mail sent to contacts in the Stewardship Council’s database, an announcement posted on the Stewardship Council’s web site, a press release issued to local papers, and an advertisement placed in local newspapers in the area where a board or public meeting is taking place or in communities that may have an interest in a particular topic on an upcoming meeting agenda. The board action taken is also noted in the meeting minutes that are posted on the Stewardship Council’s website following each meeting.

All public comments received by staff concerning the conservation easement recommendation at the Lower Bear planning unit were provided to the board for consideration at the relevant public board meeting.

VI. PUBLIC REVIEW OF THE LAND CONSERVATION AND CONVEYANCE PLANS

The public is provided an opportunity to review and comment on the proposed Land Conservation and Conveyance Plans (LCCPs), and the comments received are shared with board members prior to the Watershed Planning Committee’s forwarding the proposed LCCP to the board for its review and approval. The 30-day public review and comment periods are announced via an e-mail sent to contacts in the Stewardship Council’s database, a posting on the Stewardship Council’s web site, and an advertisement placed in local newspapers in communities that may have an interest in a particular planning unit. A notice inviting review and comment on the proposed LCCP is also sent to all landowners on record located within one mile of the subject PG&E parcels and to PG&E leaseholders. In addition, a notice is mailed to the board of supervisors of the affected county; each affected city, town, and water supply entity; and each affected tribe and/or co-licensee. After receiving public comment, the Watershed Planning Committee may make revisions to a proposed LCCP prior to forwarding a recommendation to the board.
VII. STEWARDSHIP COUNCIL BOARD OF DIRECTORS MEETINGS

Proposed LCCPs endorsed by the Watershed Planning Committee are posted on the Stewardship Council’s website for additional public review and comment approximately 30 days prior to being considered by the board at a public board meeting. The posting of proposed LCCPs is advertised via an e-mail sent to contacts in the Stewardship Council’s database. In addition, public board meetings are advertised via an e-mail sent to contacts in the Stewardship Council’s database, an announcement posted on the Stewardship Council’s web site, a press release issued to local papers, and an advertisement placed in local newspapers in the area where a board or public meeting is taking place or in communities that may have an interest in a particular topic on an upcoming meeting agenda. The board action taken is noted in the meeting minutes that are posted on the Stewardship Council’s website following each meeting.

All public comments received will be provided to the board. There is also an additional opportunity for public comment at the public board meeting when the board considers approval of the proposed LCCP. Adoption of an LCCP by the board would be the final step in the Stewardship Council’s process for selecting donees. The conservation easement donee is responsible for securing its own internal approvals prior to the transaction being completed. Transactions will be finalized upon LCCP review and transaction approval by the California Public Utilities Commission.
DEED OF CONSERVATION EASEMENT AND AGREEMENT
(LOWER BEAR PLANNING UNIT)

Between

PACIFIC GAS AND ELECTRIC COMPANY, a California corporation,
as Grantor

and

MOTHER LODE LAND TRUST, a California non-profit public benefit corporation,,as Grantee

Note to the County Recorder: This is a conservation easement within the meaning given to such term in California Government Code §27255 and is to be included in the index developed and maintained pursuant to such section.

DEED OF CONSERVATION EASEMENT AND AGREEMENT
(LOWER BEAR PLANNING UNIT)

THIS DEED OF CONSERVATION EASEMENT AND AGREEMENT (this "Easement") is made and entered into this _____ day of ______________, 20__ (the "Effective Date") by and between PACIFIC GAS AND ELECTRIC COMPANY, a California corporation ("Grantor"), and MOTHER LODE LAND TRUST, a California non-profit public benefit corporation ("Grantee"), with reference to the following facts:

RECITALS

A. The Property. Grantor is the owner of approximately 897 acres of real property located in Amador County, State of California, as more particularly described in the attached Exhibit A (the "Property").

B. FPA and FERC Jurisdiction. The Property lies within the boundaries of one or more hydroelectric projects licensed to Grantor pursuant to Part I of the Federal Power Act, 16 U.S.C. §§792-823d ("FPA").

1. FPA and FERC Requirements. The FPA requires regulation of the construction, operation, and maintenance of non-federal hydroelectric power projects pursuant to licenses issued by the Federal Power Commission, or its successor, the Federal Energy Regulatory Commission ("FERC"). Each such license requires the licensee to undertake appropriate measures on behalf of both developmental and environmental public interest uses of a waterway, including as relevant fish and wildlife protection and enhancement, irrigation, flood control, water supply, and recreation, together with whatever other beneficial public uses the license identifies as a "Project Purpose." The license requires the licensee to acquire and retain all interests in non-federal lands and other property necessary or appropriate to carry out the Project Purposes.

2. FPA and FERC Non-Project Uses. The FPA provides FERC with authority to regulate the use of a licensed project's lands and waters not only by the licensee but also by any other entity. FERC refers to such third-party use as "non-project use of project lands and waters." Even where the third-party use may be compatible with and even promote a specified Project Purpose, such use is "non-project," because it is not in the license as a direct obligation of the licensee. As a FERC licensee for the Property which is the subject of this Easement, Grantor must (except for very minor matters) apply to FERC for approval to convey to a third party any easement over project lands. FERC approval requires conveyance instruments to contain recorded covenants providing that that the non-project use will not interfere with Project Purposes, and requires its licensees to enforce such covenants and protect the project values.

3. Removal of FERC Jurisdiction. FERC jurisdiction and authority over a licensed hydropower project is removed if and when (1) the project is
decommissioned and the project license is surrendered or otherwise terminated; or (2) FERC determines that the project does not require a license to continue to operate, and the license expires or is otherwise terminated. Neither FERC nor the hydropower project license can bestow, remove, or alter water or other property rights; therefore, the end of FERC jurisdiction over the project has no effect on existing property rights in project lands and waters, including any conservation easements on such lands.

C. **Grantor Party to Settlement Agreement.** Grantor is a party to that certain Settlement Agreement (the "Settlement Agreement") as modified and approved by the Public Utilities Commission of the State of California (the "Commission") in its Opinion and Order of December 18, 2003 (Decision 03-12-035).

D. **Grantor Party to Stipulation.** In furtherance of the Settlement Agreement, and to provide additional detail regarding the implementation of the "Land Conservation Commitment" (defined below), the parties to the Settlement Agreement and other interested parties entered into that certain Stipulation Resolving Issues Regarding the Land Conservation Commitment dated September 25, 2003 (the "Stipulation").

E. **Governing Documents and Beneficial Public Values.** The Settlement Agreement and the Stipulation (collectively, the "Governing Documents") require Grantor to ensure that approximately 140,000 acres of watershed lands, all owned by Grantor (collectively, the "Watershed Lands"), including the Property, are conserved for a broad range of beneficial public values, including the protection of the natural habitat of fish, wildlife and plants; the preservation of open space; outdoor recreation by the general public; sustainable forestry; agricultural uses; and historic values. The obligations of Grantor to convey conservation easements and protect such beneficial public values on the Watershed Lands, as well as certain other obligations related thereto, are set forth in detail in Appendix E of the Settlement Agreement (as further explicated in Section 12 of the Stipulation), and are defined therein as the "Land Conservation Commitment."

F. **Stewardship Council and Land Conservation Plan.** Pursuant to the Governing Documents, the Pacific Forest and Watershed Lands Stewardship Council, a California non-profit public benefit corporation (the "Stewardship Council"), was created to oversee and carry out the Land Conservation Commitment. Pursuant to the Governing Documents, the Stewardship Council developed a plan for protection of the Watershed Lands for the benefit of the citizens of California (the "Land Conservation Plan" or "LCP"). The LCP includes, among other things, objectives to preserve and/or enhance the beneficial public values identified on each parcel of Watershed Lands.

G. **California Civil Code §815.** The Legislature of the State of California, as set forth in California Civil Code §815 et seq., has found and declared it to be the public policy and in the public interest of this state to encourage the preservation of land in its predominantly natural, scenic, agricultural, historical, forested, or open-space condition, and that it is "the public policy and in the public interest of this state to encourage the voluntary conveyance of conservation easements to qualified nonprofit organizations."
H. Grantee Qualified Nonprofit Organization. Grantee is a tax-exempt nonprofit organization qualified under §501(c)(3) of the Internal Revenue Code and is eligible to acquire and hold a perpetual conservation easement pursuant to §815.3(a) of the California Civil Code.

I. Grantor’s Continuing Hydro Project Activities. Grantor has used and continues to use the Property for the purposes related to the generation of electricity from hydropower facilities and related to the delivery, storage, and consumptive and nonconsumptive use of water as described more fully on attached Exhibit B (the "Hydro Project Activities"). In furtherance of the Hydro Project Activities, Grantor has improved portions of the Property with water- and power-related facilities, access roads, recreational facilities, buildings and other structures. The Governing Documents provide that "[c]onservation easements on Watershed Lands will include an express reservation of a right for continued operation and maintenance of hydroelectric facilities and associated water delivery facilities, including project replacements and improvements required to meet existing and future water delivery requirements for power generation and consumptive water use by existing users, compliance with any FERC license, FERC license renewal or other regulatory requirements."

J. Perpetual Protection of Beneficial Public Values. Grantee and Grantor intend through this Easement to ensure the perpetual protection of the beneficial public values on the Property as identified in the LCP, on and subject to the terms and conditions of this Easement. Specifically, the parties intend to assure that the beneficial public values identified in the LCP and set forth on Exhibit D (the "Beneficial Public Values") will be protected and preserved in perpetuity and that uses of the Property that are inconsistent with protecting and preserving these Beneficial Public Values will be restricted, all as set forth in this Easement; provided, however, that Grantor shall retain all interests not transferred to Grantee by this Easement, including, but not limited to Grantor’s Hydro Reserved Rights described in Section 7 below.

AGREEMENT

In consideration of the above recitals and the mutual covenants, terms, conditions, and restrictions contained herein, and pursuant to California Civil Code §815 et seq., Grantor and Grantee further hereby agree as follows:

1. Grant of Easement. Grantor hereby grants to Grantee a perpetual "conservation easement" as defined by §815.1 of the Conservation Easement Act of 1979 (California Civil Code §815 et seq.) in gross, in, on, over and across the Property (the "Conservation Easement"), subject to and in accordance with the terms and conditions of this Easement.

2. Purpose. It is the purpose of this Easement to protect and preserve in perpetuity the Beneficial Public Values on the Property by restricting any use of the Property that will significantly impair the Beneficial Public Values, all subject to and in accordance with the terms and conditions of this Easement (the "Purpose"). As used in this Easement, the terms "impair" and "impairment" mean to diminish in quantity,
quality, value, strength or viability. As used in this Easement, the terms "significant" and "significantly," when used with "impair" and "impairment," respectively, mean a greater than negligible adverse impact, for more than a transient period. The parties agree that Grantor’s retention of certain rights specified in this Easement, including the Hydro Reserved Rights, is consistent with the Purpose of this Easement.

3. Baseline Documentation Report. The parties acknowledge that certain existing conditions particularly relevant to the Property are documented in a baseline documentation report (the "Baseline Documentation Report"). Grantor and Grantee each have a copy of the signed Baseline Documentation Report, executed by both parties to acknowledge their approval and receipt of the Baseline Documentation Report. The parties agree that the Baseline Documentation Report contains an accurate representation of such existing conditions of the Property as of the Effective Date, and is intended to serve as an objective, though non-exclusive, information baseline for monitoring compliance with the terms of this Easement. The foregoing notwithstanding, if a dispute arises with respect to any of the conditions of the Property, the parties shall not be foreclosed from utilizing any and all other relevant documents, surveys, or other evidence or information to assist in the resolution of the dispute.

4. Commission and FERC. The terms and conditions of this Easement are subject to any conditions imposed by the Commission pursuant to [Note: citation to decision/resolution to be inserted] or by FERC pursuant to any hydroelectric project license for the Property or any applicable orders or regulations that FERC may issue from time to time. Notwithstanding anything to the contrary in this Easement, Grantor, its successors, and assigns have the right to perform any and all acts required by an order of FERC, or its successors, without the prior approval of Grantee or any other person. Grantor expressly reserves the right to comply with all FERC orders and regulations as they may be amended from time to time. In addition, Grantee shall comply with any information requests or reporting obligations required by the Commission or FERC, whether directly to the Commission or FERC, or through Grantor; provided that Grantor shall reimburse the reasonable costs and expenses incurred by Grantee in responding to such requests. Execution of this Easement by Grantor does not imply tacit Commission or FERC approval of a non-project use on the Property nor does it obligate Grantor to seek Commission or FERC approval for non-project uses proposed by Grantee.

5. Rights Conveyed to Grantee. Subject to the terms and conditions of this Easement, Grantor grants and conveys to Grantee the following affirmative rights:

5.1 Identification, Monitoring and Enforcement. The right to identify with Grantor the Beneficial Public Values of the Property, the right to monitor and enforce the protection and preservation of such Beneficial Public Values in accordance with the terms of this Easement, the right to enforce the terms of this Easement, the right to enjoin any activity on the Property or other use of the Property which violates the terms of this Easement, and the right to enforce the restoration of such areas or features of the Property as may hereafter be damaged in violation of this Easement.
5.2 Access. The right for Grantee and Grantee’s directors, officers, partners, members, managers, employees, contractors, subcontractors, consultants, representatives, agents, permittees and invitees ("Grantee’s Representatives") to enter onto the Property at reasonable times, during normal business hours, not more than twice per calendar year and upon not less than ten (10) business days’ advance written notice in order to monitor and inspect the Property, to enforce the rights which are granted herein, to determine whether the activities conducted on the Property are in compliance with the terms of this Easement, and to enforce the restoration of such areas or features of the Property as may have been damaged in violation of this Easement, all in compliance with the provisions of Section 10. Grantee will limit the number of Grantee Representatives entering the Property to those who are reasonably necessary to undertake the inspections, and such entry will be for no more days than are reasonably necessary to carry out the inspections. Grantor’s representatives shall have the right to accompany Grantee’s Representatives during bi-annual monitoring visits or on any other visit permitted by this Section 5.2. Notwithstanding the foregoing, Grantee shall also have the right of entry upon the Property upon not less than twenty-four (24) hours’ advance written notice where such entry is necessary to (i) prevent, terminate, or mitigate a violation of the terms of this Easement; or (ii) monitor actions taken pursuant to the bi-annual inspections contemplated by this Section 5.2. All access and entry allowed under this Section 5.2 will be made in a manner that will not unreasonably interfere with the permitted use(s) of the Property by Grantor, its successors in interest, and any occupant(s) or user(s) of the Property and shall comply with any entry and access guidelines established by Grantor and restrictions contained in any Third Party Use Agreements.

5.3 Grantee Signs. Grantee shall have the right, but not the obligation, at its sole cost and expense, to erect, maintain, and/or remove, one or more reasonable, non-illuminated signs or other appropriate markers in locations on the Property visible from any public roads or other adjoining property, bearing information indicating (a) that the Property is protected by the Conservation Easement, and/or (b) the participation of Grantee and of any funder in the stewardship of the Conservation Easement, the wording, size, number, design, and location of which shall be decided upon by Grantee and Grantor, each exercising its reasonable discretion.

6. Prohibited Uses. Grantor will not engage in, or permit others to engage in, the prohibited uses set forth on Exhibit F hereto, except as otherwise provided therein (the "Prohibited Uses"), which Grantor and Grantee agree are inconsistent with the Purpose of this Easement.

7.1 Hydro and Other Reserved Rights. As provided in California Civil Code §815.4, all interests not expressly transferred and conveyed to Grantee by this Easement shall remain in Grantor, including the right to engage in and permit or invite others to engage in all uses of the Property not affected by this Easement nor prohibited by this Easement or by law. In compliance with §815.4, Grantor and Grantee acknowledge and agree that Grantor expressly reserves all rights accruing from the
ownership of the Property and not expressly transferred and conveyed to Grantee by this Easement, including without limitation the right to engage in or permit or invite others to engage in all uses of the Property that do not significantly impair the Beneficial Public Values and are not expressly prohibited by this Easement. Without limiting the foregoing, Grantor shall have the right to engage in and permit or invite others to engage in the permitted uses set forth in Exhibit I (the "Permitted Uses"). In addition and notwithstanding any other provision of this Easement, Grantor expressly reserves the right to engage in or permit or invite others to engage in those uses set forth in Exhibit C ("Hydro Reserved Rights"), subject to the restrictions set forth in Sections 7.3 and 7.4 below.

7.2 Definitions. As used in this Section 7, the following defined terms shall have the meanings set forth below:

7.2.1 Anticipated Significant Actions. As used herein, "Anticipated Significant Actions" are (a) those Required Actions (which include Specified Required Actions pursuant to Section 7.2.3), that involve a Prohibited Use and/or that Grantor determines in Grantor's reasonable discretion exercised in good faith are likely to significantly impair one or more of the Beneficial Public Values, (b) Discretionary Actions that Grantor determines in Grantor's reasonable discretion exercised in good faith are likely to significantly impair one or more of the Beneficial Public Values, and (c) Permitted Uses that Grantor determines in Grantor's reasonable discretion exercised in good faith are likely to significantly impair one or more of the Beneficial Public Values. Except as provided in Section 7.3.1, no Grantee notification, consultation or consent shall be required for actions, activities or improvements that are not Anticipated Significant Actions.

7.2.2 Required Actions. As used herein, "Required Actions" are those intended actions, activities or improvements that Grantor determines in Grantor's sole discretion exercised in good faith are required on the Property by any one or more of the following: (a) the Commission, FERC, or any other governmental entity having jurisdiction over Grantor's use, ownership, operation, or management of the Property, including the Hydro Project Activities, or (b) any Applicable Law (as defined in Section 8), or (c) any Third Party Use Agreements, or (d) to comply with professional practices, standards and/or policies governing the Hydro Project Activities. All references in this Agreement to "Required Actions" shall include Specified Required Actions (as defined below) unless otherwise noted.

7.2.3 Specified Required Actions. As used herein, "Specified Required Actions" are those Required Actions that require a specified action, activity or improvement on the Property, with respect to which Grantor has no material discretion over the specific details of implementation, including, without limitation, the manner, timing, and location of the Specified Required Action. Without limiting Grantor's notification obligations pursuant to Section 7.3.1 below, no Grantee consultation or consent shall be required with respect to any Specified Required Action.
7.2.4 Discretionary Action. As used herein, a "Discretionary Action" is an intended action, activity or improvement that is not a Required Action or a Permitted Use, and does not involve a Prohibited Use.

7.2.5 Hydro Operating Zone. As used herein, a "Hydro Operating Zone" is a spatially delineated area of the Property intended to primarily contain (or immediately adjacent to an area of the Property containing) Hydroelectric Facilities and Associated Water Delivery Facilities, as defined and described on Exhibit B hereto. The initial delineated Hydro Operating Zones are set forth on Exhibit G hereto; provided, however, that, subject to Sections 7.3 and 7.4 below, Grantor shall have the right, as a Discretionary Action governed by Sections 7.3 and 7.4 below, to expand, contract, add or remove Hydro Operating Zones from time to time.

7.3 Annual Work Plan Notification, Consultation and Consent Requirements.

7.3.1 Delivery and Contents of Annual Work Plan. No later than February 15th of each calendar year after the Effective Date, Grantor shall prepare and deliver to Grantee an annual work plan for the Property (an "Annual Work Plan"). In the Annual Work Plan, Grantor shall inform Grantee of the Anticipated Significant Actions Grantor anticipates undertaking on the Property during such calendar year. The Annual Work Plan shall include the following:

(a) a reasonably detailed description of the Anticipated Significant Actions Grantor intends to commence within such calendar year, together with a bullet point list of those actions Grantor intends to commence during such calendar year that Grantor determines do not constitute Anticipated Significant Actions;

(b) a bullet point list of all actions undertaken by Grantor during the immediately preceding calendar year that Grantor determined did not constitute Anticipated Significant Actions and were not described in a previous Annual Work Plan (or otherwise disclosed to Grantee);

(c) an indication of whether the Anticipated Significant Actions will occur within or outside of a Hydro Operating Zone;

(d) Grantor’s determination of which Anticipated Significant Actions are Discretionary Actions;

(e) Grantor’s determination of which Anticipated Significant Actions are Required Actions, including a reasonably detailed explanation of the basis for Grantor’s determination;

(f) Grantor’s determination of which Anticipated Significant Actions are Specified Required Actions, including a reasonably detailed explanation of the basis for Grantor’s determination;
(g) Grantor’s determination of which Anticipated Significant Actions are Permitted Uses, including a reasonably detailed explanation of the basis for Grantor’s determination;

(h) Grantor’s estimated timeline for commencement and completion of each of the Anticipated Significant Actions;

(i) a description of Grantor’s anticipated efforts to avoid or minimize harm to or impairment of the Beneficial Public Values from the Anticipated Significant Actions;

(j) if and when available, Grantor shall use reasonable efforts to provide copies of any underlying filings (including filings, if any, under the California Environmental Quality Act), permits (e.g., burn permits, stream alteration permits, or timber harvest plans), orders or rulings associated with the Anticipated Significant Actions; and

(k) any Third Party Use Agreement renewals or replacements as contemplated by Section 9.1.2 below.

7.3.2 Review of Annual Work Plan. Grantor and Grantee shall meet (in person or electronically) within sixty (60) days after Grantee’s receipt of the Annual Work Plan to review the Annual Work Plan. Grantee has the right to request reasonable additional information regarding actions identified in the Annual Work Plan. As part of the Annual Work Plan review process, Grantor and Grantee will consult on Express Third Party Uses as contemplated by Section 9.1 below and Informal Uses as contemplated by Section 9.2 below. Periodically, at such annual review meetings, the content requirements for the Annual Work Plan as set forth in Section 7.3.1 above may be modified, confirmed by mutual written agreement of the parties.

7.3.3 Anticipated Significant Actions within Hydro Operating Zones. Without limiting Grantor’s notification obligations pursuant to Section 7.3.1 above, no Grantee consultation or consent shall be required with respect to any Anticipated Significant Actions within a Hydro Operating Zone.

7.3.4 Anticipated Significant Actions Outside Hydro Operating Zones. The following provisions shall apply with respect to Anticipated Significant Actions outside of a Hydro Operating Zone:

(a) Specified Required Actions. Without limiting Grantor’s notification obligations pursuant to Section 7.3.1 above, no Grantee consultation or consent shall be required with respect to any Specified Required Actions outside of a Hydro Operating Zone.

(b) Other Required Actions and Permitted Uses. With respect to Required Actions and Permitted Uses disclosed in the Annual Work Plan that are not Specified Required Actions and are to be undertaken outside of a Hydro Operating Zone, Grantor and Grantee agree that, at or prior to the meeting to review the
Annual Work Plan, Grantee may (but shall be under no obligation to) propose alternative methods and practices to avoid or minimize harm to or impairment of one or more Beneficial Public Values by such Anticipated Significant Actions ("Proposed Methods and Practices"). Grantor shall implement the Proposed Methods and Practices, to the extent Grantor determines in its sole discretion exercised in good faith that the Proposed Methods and Practices (i) may be implemented in a commercially reasonable manner balancing the harm to Beneficial Public Values with any increased cost or burden to Grantor, (ii) where applicable, will allow for the completion of a Required Action in a timely manner, and (iii) are reasonably likely to avoid potential harm to or impairment of one or more Beneficial Public Values. If Grantor determines that one or more of the foregoing conditions has not been satisfied, Grantor shall specify the reasons for this determination in detail, and Grantor and Grantee shall cooperate in good faith and with diligence to attempt to resolve Grantor’s objections to Grantee’s Proposed Methods and Practices consistent with this paragraph.

(c) Discretionary Actions. With respect to Discretionary Actions disclosed in the Annual Work Plan that are to be undertaken outside of a Hydro Operating Zone, such Discretionary Actions shall be subject to Grantee’s prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed by Grantee. If Grantee fails to grant or deny Grantor’s request for consent within one hundred eighty (180) days following Grantee’s receipt of Grantor’s request for consent, Grantee shall be deemed to have consented to the particular Discretionary Action described in the request. If Grantee withholds its consent to such proposed Discretionary Action to be undertaken outside of a Hydro Operating Zone, Grantee shall specify its objections in detail and, wherever possible, propose commercially reasonable alternatives, methods and/or practices to avoid or mitigate harm to or impairment of the Beneficial Public Values while substantially achieving the purposes of Grantor’s proposed Discretionary Action. Grantor and Grantee shall cooperate in good faith and with diligence to attempt to resolve Grantee’s objections in a manner that sufficiently mitigates Grantee’s objections to its reasonable satisfaction.

7.4 Anticipated Significant Actions Not Identified in Annual Work Plan. If Grantor intends to undertake an Anticipated Significant Action not identified in an Annual Work Plan, Grantor shall notify Grantee (a "Notice of Action"), and include the information required by Section 7.3.1 above. Additionally, Grantor and Grantee shall meet (in person or electronically) within sixty (60) days after Grantee’s receipt of Grantor’s request for consent of the Notice of Action to review Grantor’s proposed Anticipated Significant Actions. Any Anticipated Significant Action (other than a Specified Required Action) identified in a Notice of Action which is proposed to occur outside of a Hydro Operating Zone shall be subject to Section 7.3.4 above. Where this Section 7.4 applies, references to the "Annual Work Plan" in Section 7.3.4 above shall be deemed to be references to the applicable Notice of Action except that Grantor shall not be required to provide the list of actions set forth in Section 7.3.1(b) above.

7.5 Emergency Actions. Notwithstanding any other provisions of this Section 7, in the case of an emergency or other exigent circumstance affecting the safety of persons and/or property, Grantor may exercise its Hydro Reserved Rights and
take any other remedial actions in an unrestricted manner on all or any portion of the Property within or outside of a Hydro Operating Zone without consultation with Grantee and without Grantee's consent. Grantor shall provide copies of any required notifications to applicable regulatory agencies of the emergency action and shall notify Grantee of those emergency actions taken, such notice to be provided to Grantee as soon as practicable but in any event within thirty (30) days after the emergency action has occurred.

7.6 Water Rights. Parties acknowledge that Grantor's exercise of water rights relating to water located or flowing on or under the Property, including those described in Exhibit C, are governed by this Section 7.

8. Responsibility for Operations. Nothing in this Easement shall be construed as giving any right or ability to Grantee to exercise physical or managerial control of the day-to-day operations of the Property or of Grantor's activities on the Property. Grantor shall have and retain all responsibility for, and shall bear all costs and liabilities of, the ownership of the Property. In connection with Grantor's use or occupancy of the Property, Grantor shall have and retain all responsibility for, and shall bear all costs and liabilities of, compliance with any present and future applicable laws, ordinances, rules, regulations, permits, licenses, authorizations, orders and requirements, whether or not in the current contemplation of the parties, which may affect or be applicable to the Property or any part of the Property (including, without limitation, any subsurface area), all consents or approvals required to be obtained from, and all rules and regulations of, and all building and zoning laws of, all federal, state, county and municipal governments, the departments, bureaus, agencies or commissions thereof, or any other governmental or quasi-governmental body or bodies exercising similar functions, having or acquiring jurisdiction of the Property (in each case, an "Applicable Law"), except as expressly stated otherwise in this Easement. Without placing any limitation on the foregoing sentence, the parties agree as follows:

8.1 Condition of Property. Grantee shall have no duty or responsibility for (a) the operation or maintenance of the Property except to the extent specifically undertaken by Grantee as permitted under this Easement, (b) the monitoring of any hazardous conditions thereon, or (c) the protection of Grantor, the public, or any other person or entity from any risks relating to conditions on the Property.

8.2 Taxes. Grantee shall have no duty or responsibility for real property taxes and assessments levied on the Property.

8.3 Permits and Approvals. Grantor shall be solely responsible for obtaining any and all applicable governmental permits and approvals for, and otherwise complying with all Applicable Laws relating to, any activity or use of the Property by Grantor which is permitted by this Easement; provided, however, Grantor shall have no responsibility pursuant to this Easement for obtaining permits and approvals required on behalf of unrelated third parties who occupy or use the Property or for an unrelated third party's failure to comply with Applicable Laws. Grantee shall be solely responsible for obtaining any and all applicable governmental permits and approvals for, and otherwise
8.4 Limitation on Restoration Obligations. Nothing in this Easement shall require Grantor to take any action to restore the condition of the Property after (a) any Act of God, which includes, without limitation, fire, climate change, flood, storm, earth movement, or natural evolutionary changes in the condition of the Property from that described in the Baseline Documentation Report; (b) any prudent action taken by Grantor under emergency conditions to prevent, abate, or mitigate significant injury to the Property or to any person resulting from such causes; or (c) the non-permitted acts of unrelated third parties so long as Grantor has satisfied its obligations under Section 9.3.

9.1 Express Third Party Uses. Exhibit H hereto describes the existing third party uses of the Property permitted with the express agreement of Grantor ("Express Third Party Uses"). Subject to Section 7 above, Express Third Party Uses shall also include any future third party use implemented by Grantor as a Required Action or as a Discretionary Action approved by Grantee in accordance with Section 7. Grantor retains the right to maintain, renew, and replace all agreements memorializing the Express Third Party Uses ("Third Party Use Agreements") and to engage in all activities reasonably required to comply with Grantor’s obligations with respect to the Express Third Party Uses, subject to the following conditions:

9.1.1 Increases in Intensity or Expansion of Location or Size or Change in Use. Any (i) increase in the intensity, or (ii) expansion of the location or size, or (iii) a change in the use, of an Express Third Party Use (whether through a new agreement or an amendment to an existing agreement), that Grantor determines in Grantor's reasonable discretion exercised in good faith is likely to significantly impair the Beneficial Public Values shall be subject to Grantee’s prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed by Grantee, except if such change in Express Third Party Use constitutes a Required Action in which case the consultation provisions of Section 7 above shall apply.

9.1.2 Renewal or Replacement of Third Party Use Agreements. All Third Party Use Agreements existing on the date hereof are identified on Exhibit H. As Third Party Use Agreements are renewed or replaced (either with the existing user or a new user), Grantor, in consultation with Grantee as part of the Annual Work Plan consultation in accordance with Section 7.3 above, shall include contractual provisions to bring the continuation of the Express Third Party Use and the preservation of the Beneficial Public Values into alignment to the fullest extent reasonably practicable.

9.1.3 Consultation on Express Third Party Uses. As part of the Annual Work Plan review process under Section 7.3 above, Grantor and Grantee will consult on existing Express Third Party Uses, including recommendations, if any, on
how to bring the Express Third Party Uses and the preservation of the Beneficial Public Values into alignment to the fullest extent reasonably practicable.

9.1.4 Enforcement of Third Party Use Agreements. If Grantor or Grantee discovers any default under a Third Party Use Agreement that significantly impairs the Beneficial Public Values (and if Grantee makes such discovery, Grantee gives Grantor written notice thereof), Grantor shall use reasonable efforts to enforce such Third Party Use Agreement or otherwise remedy such violation, at Grantor’s sole expense.

9.2 Informal Uses and Public Access. Grantor and Grantee recognize that the Property has been used by third parties for recreational, cultural, and other non-commercial or informal purposes without formal written agreements to conduct such activities (the "Informal Uses"). Grantor and Grantee further recognize that access is inherent or may be inherent in the enjoyment of the Beneficial Public Values and the Informal Uses. Consistent with the objectives articulated in the Governing Documents to provide continued reasonable access by the public to the Watershed Lands, Grantor shall allow public access to the Property (other than Hydro Operating Zones) that is substantially consistent with the public access existing on the Effective Date, subject to Section 7 and the following limitations:

9.2.1 Rules and Regulations. Grantor reserves the right to make reasonable rules and regulations to control, limit, or, as necessary, exclude Informal Uses and public access.

9.2.2 Liability Limitation. Grantor and Grantee claim all of the rights and immunities against liability for injury to the public to the fullest extent allowable by law.

9.2.3 Periodic Review of Informal Uses. As part of the Annual Work Plan review process under Section 7.3 above, Grantor and Grantee will consult on Informal Uses, including recommendations made by Grantor or Grantee, if any, regarding the necessity of controlling, limiting or excluding the Informal Uses to ensure the preservation of the Beneficial Public Values.

9.3 Unauthorized Third-Party Uses. If Grantor or Grantee discovers any unauthorized third-party use or activity on the Property (not including any third party violation covered by Section 9.1.4 above) that violates the terms of this Easement (and if Grantee makes such discovery, Grantee gives Grantor written notice thereof), Grantor shall use reasonable efforts, in consultation with Grantee, to stop or prevent any such unauthorized use of the Property, at Grantor’s sole expense; provided that in no event shall Grantor’s obligations under this Section 9.3 require Grantor to pursue legal action or incur other substantial costs. If Grantee demonstrates that Grantor’s efforts in compliance with this Section 9.3 have not prevented, or are unlikely to prevent, the unauthorized third-party use or activity on the Property that violates the terms of this Easement, Grantee may meet and confer with Grantor to propose additional efforts to prevent such use or activity which Grantee may undertake, at Grantee’s sole expense.
Grantor shall consider such proposal in good faith and, if Grantor permits Grantee to use such additional efforts, the scope and duration of such efforts shall be determined by Grantor, and Grantee shall comply with any requirements imposed by Grantor in connection with such efforts.

10. **Enforcement and Remedies.**

10.1 **Procedures Upon Violation.** If a party hereto (the "Non-Breaching Party") determines there is a breach of the terms of this Easement or that a breach is threatened, written notice of such breach (the "Notice of Breach") and a demand for corrective action sufficient to cure the breach shall be given by the Non-Breaching Party to the party allegedly breaching this Easement (the "Breaching Party"). Within fourteen (14) days after delivery of a Notice of Breach, Grantor and Grantee shall meet at a location in the County where the Property is located or as otherwise agreed to by the parties to discuss the circumstances of the alleged or threatened breach and to attempt to agree on appropriate corrective action. If the parties mutually determine that it is appropriate and desirable, a duly qualified expert in the subject matter of the alleged breach (the "Consulting Expert") shall attend the meeting. Grantor and Grantee shall each pay one-half of the costs of retaining the services of the Consulting Expert for such discussion; provided, however, that if Grantor and Grantee are unable to agree upon a Consulting Expert, each party may retain the services of an expert at its own expense. If Grantor and Grantee are unable to agree on appropriate corrective action (or if any such corrective action is required) within thirty (30) days after such meeting, then the Non-Breaching Party may, at its election, deliver a further written notice to the Breaching Party to demand reasonable, particular corrective action to cure the breach (the "Notice of Easement Violation"). If a violation is not cured within thirty (30) days after the delivery of the Notice of Easement Violation, or if the cure reasonably requires more than thirty (30) days to complete and there is failure to begin the cure within the 30-day period or failure to continue diligently to complete the cure, the Non-Breaching Party may commence litigation in accordance with Section 10.2 below.

10.2 **Litigation.** If the parties are not able to resolve a claim or dispute pursuant to Section 10.1 above, the Non-Breaching Party may bring an action at law or in equity in a court of competent jurisdiction to enforce compliance with the terms of this Easement, to recover any damages to which Non-Breaching Party may be entitled for violation of the terms of this Easement, or for any other legal or equitable relief available under California law, including, but not limited to, temporary or permanent injunctive relief, monetary damages and/or any other form of relief required to achieve the restoration of the Property to the condition in which it existed prior to any violation. To the extent that Grantee recovers any monetary damages for the cost of restoring any injury or damage to a portion of the Property that is caused by Grantor’s breach of this Easement, all such damages recovered by Grantee (after appropriate costs of suit are reimbursed) shall be applied to the cost of undertaking any corrective action to the applicable portion of the Property. Notwithstanding anything to the contrary contained in this Easement, in no event shall the Breaching Party be liable to the Non-Breaching Party for, and the parties each hereby waive their right to, any indirect, special, punitive,
or consequential damages resulting from the Breaching Party’s breach of this Easement, whether foreseeable or unforeseeable.

10.3  **Emergency Injunctive Relief.** If circumstances require immediate action to prevent or mitigate a violation of this Easement and the Non-Breaching Party reasonably determines that irreparable harm would result if the Non-Breaching Party were required to complete the process set forth in Section 10.1, the Non-Breaching Party may proceed immediately to seek an injunction to stop the violation, temporarily or permanently.

10.4  **RemediesCumulative.** The remedies described in this Section 10 shall be cumulative and shall be in addition to all remedies now or hereafter existing at law or in equity, including but not limited to, the remedies set forth in Civil Code §815 et seq., inclusive. The failure of a party to discover a violation or to take immediate legal action shall not bar taking such action at a later time.

10.5  **Costs of Enforcement.** All costs incurred in enforcing the terms of this Easement, including, but not limited to, costs of suit and reasonable attorneys’ fees as set forth in Section 20.11, shall be borne by the Breaching Party, but only to the extent that a breach of this Easement is determined to have occurred. If, after the Non-Breaching Party delivers a Notice of Easement Violation, it is determined that there was no breach of this Easement by the Breaching Party, the Non-Breaching Party shall pay all of the Breaching Party’s costs and expenses incurred in connection with the alleged breach.

10.6  **No Waiver.** Enforcement of this Easement against a party shall be at the discretion of the Non-Breaching Party, and any forbearance by the Non-Breaching Party to exercise its rights under this Easement in the event of any breach of any term of this Easement shall not be deemed or construed to be a waiver by the Non-Breaching Party of such term or of any subsequent breach of the same or any other term of this Easement or of any of such party’s rights under this Easement. No delay or omission by the Non-Breaching Party in the exercise of any right or remedy shall impair such right or remedy or be construed as a waiver. A party’s permission to the other party to carry out, or failure to object to, any proposed use or activity by the other party shall not constitute consent to any subsequent use or activity of the same or different nature.

11.  **Indemnification and Insurance.**

11.1  **Indemnification by Grantee.** Grantee shall, to the maximum extent permitted by law, indemnify, protect, defend and hold harmless Grantor, its parent corporation, subsidiaries, affiliates, and their respective officers, managers, directors, representatives, agents, employees, transferees, successors and assigns (collectively, "Grantor Indemnitees") from and against all claims, losses, actions, demands, damages, costs, expenses (including, but not limited to, experts’ fees and reasonable attorneys’ fees and costs) and liabilities of whatever kind or nature (collectively,
"Claims") arising out of or in connection with this Easement or the Property to the extent caused by the negligence or willful misconduct of the Grantee Indemnitees.

11.2 Indemnification by Grantor. Grantor shall, to the maximum extent permitted by law, indemnify, protect, defend and hold harmless Grantee, its parent corporation, subsidiaries, affiliates, and their respective officers, managers, directors, representatives, agents, employees, transferees, successors and assigns (collectively, "Grantee Indemnitees") from and against all Claims arising out of or in connection with this Easement or the Property except to the extent caused by the negligence or willful misconduct of the Grantee Indemnitees.

11.3 Release. Entry onto the Property by Grantee and Grantee’s Representatives shall be at Grantee’s sole risk and expense, and Grantee accepts all risk relating to the condition of the Property. Notwithstanding the provisions of Section 11.2, Grantor shall not be liable to Grantee for, and to the maximum extent permitted by law, Grantee hereby waives and releases Grantor and the other Grantor Indemnitees from, any and all liability, whether in contract, tort or on any other basis, for any injury, damage, or loss to Grantee and/or Grantee’s Representatives resulting from or attributable to any occurrence relating to the condition of the Property, except if arising solely from Grantor’s gross negligence or willful misconduct.

11.4 Insurance. Grantee shall procure, carry and maintain in effect during all access to the Property throughout the term of this Easement the insurance specified in Exhibit E hereto, provided that Grantor reserves the right to periodically review and reasonably modify the insurance requirements specified in Exhibit E in effect to be generally consistent with requirements of other prudent property owners allowing access to their properties by conservation easement holders. All insurance shall be written on forms and with insurance carriers acceptable to Grantor in its commercially reasonable judgment. Prior to Grantee’s initial entry onto the Property, and thereafter at least thirty (30) days prior to the expiration date of any policy, Grantee shall provide Grantor with evidence of the insurance coverage, or continuing coverage, as applicable, satisfying the requirements of this Section 11.4 and Exhibit E. Grantee is also responsible for causing Grantee’s agents and contractors entering the Property to comply with the insurance requirements of this Easement at all relevant times, the insurance being specified in Exhibit E. Grantee shall, to the maximum extent permitted by law, indemnify, protect, defend and hold the Grantor Indemnitees harmless against claims, losses, costs (including attorneys’ fees and costs), liabilities and damages resulting from the failure of Grantee, or any of Grantee’s consultants, contractors or subcontractors, to comply with the insurance requirements set forth in this Section 11.4 and Exhibit E. Except for the right to access the Property under Section 5.2 above, which shall be conditioned upon carrying insurance required herein, no failure to carry such insurance or to provide a certificate thereof by any such deadline shall alter or affect in any manner any of the rights or obligations of the parties under or with respect to this Easement. The foregoing insurance requirements shall not apply in the event that the Grantee is a governmental agency with a self-insurance program reasonably acceptable to Grantor.
12. **Grantee Transfer of Easement.**

12.1 **Voluntary Transfer.**

12.1.1 If Grantee desires to assign its interest under this Easement, Grantee shall provide Grantor and the Sierra Nevada Conservancy ("SNC") with written notice of such intention to transfer to an assignee which is (a) qualified to hold a conservation easement under §815.3 of the California Civil Code; and (b) willing and with the financial capability (taking into account any stewardship funds to be transferred by Grantee with this Easement) and organizational experience to assume all of the responsibilities imposed on Grantee under this Easement; and (c) acceptable to Grantor in its reasonable discretion. Grantee shall allow the SNC, in consultation with Grantor, a period of not less than sixty (60) days within which to approve the proposed assignee, which approval shall not be unreasonably withheld and shall be based on whether the proposed assignee meets the designation criteria specified in this Section 12.1.1.

12.1.2 Grantee is responsible for identifying a suitable assignee pursuant to Section 12.1.1. However, if a suitable assignee is not identified, then SNC shall have sole discretion to elect to become the assignee of Grantee’s interest hereunder.

12.1.3 As conditions to any assignment of Grantee’s interest under this Easement, Grantee shall (a) require the assignee to expressly agree in writing to assume Grantee’s obligations hereunder, and (b) ensure that such assignee has the resources to fulfill its obligations under this Easement. Notwithstanding anything in this Section 12.1 to the contrary, this Easement shall not be transferred by Grantee to any governmental entity, public agency or Native American tribe without the consent of the Grantor, which consent shall be in Grantor’s sole discretion exercised in good faith.

12.2 **Involuntary Transfer.** If Grantee ever ceases to exist or no longer qualifies under §815.3 of the California Civil Code, the Stewardship Council (or its designee), or if the Stewardship Council (or its designee) shall cease to exist, the Attorney General of the State of California, shall petition a court of competent jurisdiction to transfer this Easement to an organization that meets all of the designation criteria specified in Section 12.1.

13. **Subsequent Property Transfers by Grantor.**

13.1 **Rights of Grantor.** Subject to the provisions of Sections 7 and 9 above, this Section 13, Section 20.12 below, and Exhibit F, Paragraph 1 below, Grantor shall have the unrestricted right to sell, encumber, or otherwise transfer the Property or portions thereof to anyone Grantor chooses. Notwithstanding the foregoing, Grantor shall disclose the existence of this Easement (including reference to the recording information) in any deed or other legal instrument by which Grantor divests itself of a real property interest in all or a portion of the Property, including, without limitation, a leasehold interest, and all such conveyances shall be made expressly subject to the terms of this Easement. Grantor shall notify Grantee periodically of any contemplated
grants by Grantor to any third party of any interest in any portion of the Property, whether such interest is a fee, easement, lease, mortgage or other interest. Additionally, Grantor shall notify Grantee in writing not more than thirty (30) days after any grant by Grantor to any third party of any interest in any portion of the Property, whether such interest is a fee, easement, lease, mortgage or other interest. The failure of Grantor to perform any act required by this Section 13 shall not impair the validity of this Easement or limit its enforcement in any way or create any obligation on the part of Grantee. Grantor recognizes that Grantee may incur direct and indirect costs for monitoring and administration of the Conservation Easement in the event fee title to the Property is transferred under this provision. Accordingly, upon Grantor’s sale, transfer or conveyance of fee title of the Property, Grantor shall pay, or cause to be paid, to Grantee a one-time payment of a sum representing the increased cost of such Conservation Easement stewardship, as reasonably determined at such time by Grantee. Such one-time payment shall be in addition to any reimbursements required pursuant to Section 13.2.4 or Section 17 of this Easement.

13.2.1 Conveyance of Entire Property. In the event:

(a) Grantor intends to transfer fee title to the entire Property to an unaffiliated third party;

(b) the Hydro Project Activities and any uses and facilities that are unrelated to the Hydro Project Activities but undertaken as a Required Action at the Property have been formally and permanently terminated by Grantor and, as appropriate, decommissioned pursuant to a regulatory proceeding; and

(c) no Hydroelectric Facilities and Associated Water Delivery Facilities, nor other facilities unrelated to Hydro Project Activities installed pursuant to a Required Action are located at the Property,

then, subject to any final orders or decommissioning requirements issued by the FERC and/or other agency(ies) with jurisdiction over the Hydro Project Activities and such other unrelated uses prior to said transfer of the entire Property, Grantor shall release, relinquish and forever terminate, in a manner that shall be binding upon all successors in interest to the Property, (i) all rights of Grantor described in Exhibit C, (ii) the exceptions to the Prohibited Uses for Required Actions and Specified Required Actions set forth in Exhibit F, (iii) the exceptions to the Prohibited Uses in Exhibit F relating to activities within the Hydro Operating Zone, and (iv) Permitted Uses, to the extent related to the Hydro Project Activities, as set forth in Exhibit I (items (i), (ii), (iii) and (iv) being referred to collectively as the "Reservations"). Following such release, relinquishment and termination of Reservations, all Anticipated Significant Actions (except for Prohibited Uses and continuing Permitted Uses) shall be subject to Grantee’s consent as Discretionary Actions and the Easement shall be interpreted more restrictively in a manner recognizing the release of Reservations. Additionally, following such release, relinquishment and termination of Reservations, the forest management activities...
specified in Section 9 of Exhibit I shall continue as Permitted Uses, but shall be subject to Grantee's consent as Discretionary Actions.

13.2.2 **Partial Conveyance.** In the event:

(a) Grantor intends to transfer fee title to less than the entire Property (the "**Transferred Parcel**") to an unaffiliated third party;

(b) the Hydro Project Activities and any uses and facilities that are unrelated to the Hydro Project Activities but undertaken as a Required Action at the Transferred Parcel have been formally and permanently terminated by Grantor and, as appropriate, decommissioned pursuant to a regulatory proceeding; and

(c) no Hydroelectric Facilities and Associated Water Delivery Facilities, nor other facilities unrelated to Hydro Project Activities installed pursuant to a Required Action are located at the Transferred Parcel,

then, subject to any final orders or decommissioning requirements issued by the FERC and/or other agency(ies) with jurisdiction over the Hydro Project Activities and such other unrelated uses, prior to said transfer of the Transferred Parcel, Grantor shall release, relinquish and forever terminate, in a manner that shall be binding upon all successors in interest to the Transferred Parcel, the Reservations with respect to the Transferred Parcel. Following such release, relinquishment and termination of Reservations, all Anticipated Significant Actions (except for Prohibited Uses and continuing Permitted Uses) on the Transferred Parcel shall be subject to Grantee's consent as Discretionary Actions and the Easement shall be interpreted more restrictively in a manner recognizing the release of Reservations as to the Transferred Parcel. Additionally, following such release, relinquishment and termination of Reservations, the forest management activities specified in Section 9 of Exhibit I on the Transferred Parcel shall continue as Permitted Uses, but shall be subject to Grantee's consent as Discretionary Actions.

13.2.3 **Grantor's Continuing Reserved Rights.** Nothing in Section 13.2.2 shall limit the rights of Grantor in this Easement with respect to the portion of the Property retained by Grantor.

13.2.4 **Easement Amendment.** In the event of a conveyance and release of Reservations pursuant to this Section 13.2, Grantor and Grantee may agree to amend this Easement, or to create a separate Easement for the Transferred Parcel and for the remaining portion of the Property in accordance with Section 17, to reflect the release of Reservations and, where appropriate, to reflect separate ownership of the Transferred Parcel and the remainder of the Property. In accordance with Section 17 below, Grantor shall reimburse Grantee for all reasonable costs incurred in connection with the drafting, review, negotiation, approval and recording of any amendment or separate Easement pursuant to this Section, including costs incurred in consideration of whether an amendment and/or new Easement(s) is/are necessary or appropriate.
13.2.5 Transfer Restrictions Remain Applicable. Nothing herein shall affect Grantor's obligations under Section 1 of Exhibit F.

14.1 Extinguishment. If circumstances arise in the future such as render the Purpose of this Easement impossible to accomplish, this Easement shall only be terminated or extinguished, whether in whole or in part, by judicial proceedings in a court of competent jurisdiction. Grantor's economic hardship shall not be a reason to extinguish this Easement.

14.2 Condemnation. If all or part of the Property is taken by the exercise of the power of eminent domain by public, corporate, or other authority, whether permanent or temporary, of all or any portion of the Property (or the proceeds of private sale in lieu thereof), so as to abrogate the restrictions imposed by the Conservation Easement, Grantor and Grantee shall join in appropriate actions at the time of such taking to recover the full value of the taking and all incidental or direct damages resulting from the taking. All compensation thereby awarded will belong and be paid to Grantor and Grantee in proportion to their respective interests in the Property as determined pursuant to Section 14.3, it being expressly agreed that the Conservation Easement constitutes a compensable property right. All expenses incurred by Grantor and Grantee in such action shall be paid out of the recovered proceeds. Grantor and Grantee acknowledge that any and all awards to Grantor and Grantee may be subject to the approval of the Commission and/or the FERC.

14.3 Proceeds. Pursuant to California Civil Code §815.2(a) this Easement constitutes a real property interest immediately vested in Grantee. It is acknowledged by the parties that the purposes of establishing the value of this property right and enforcing the rights of Grantee with respect thereto is to prevent a private windfall and to protect the public investment which is involved in the conveyance of the Conservation Easement. That being the case, the parties stipulate that, for the purpose of determining the ratio for proportionate value of the each parties respective interest in the Property at the time of termination or extinguishment of the Conservation Easement, the value of the Conservation Easement shall be the difference between (a) the current fair market value of the fee interest in the Property at the time of termination, as if unencumbered by the Conservation Easement, but taking into account all other existing restrictions on the improvement, construction, alteration, expansion, development, use, maintenance or operation of all or any portion of the Property (e.g., zoning laws, land use laws or other governmental laws, codes, regulations or ordinances, and private restrictions such as covenants, restrictions and agreements), and (b) the current fair market value of the Property at the time of termination, as encumbered by the Conservation Easement, but taking into account all other existing restrictions on the improvement, construction, alteration, expansion, development, use, maintenance or operation of all or any portion of the Property (e.g., zoning laws, land use laws or other governmental laws, codes, regulations or ordinances, and private restrictions such as covenants, restrictions and agreements). The values shall be determined by an appraisal prepared by a qualified appraiser.
familiar with appraising conservation easements jointly selected by Grantor and Grantee. The cost of the appraisal shall be paid out of proceeds in proportion to the recoveries of Grantor and Grantee. There shall be no restriction on Grantor’s or Grantee’s use of proceeds received pursuant to this Section 14.3.

15. **Estoppel Certificates.** Grantee shall, within thirty (30) days after receiving Grantor’s written request therefor (not to exceed once during any twelve (12) month period), execute and deliver to Grantor a document certifying, to the actual knowledge of the person executing the document without any duty of investigation, that Grantor is in compliance with any obligation of Grantor contained in this Easement, or otherwise evidencing the status of such obligation to the extent of Grantee’s actual knowledge thereof, as may be reasonably requested by Grantor.

16. **Notices.** *Note: Confirm PG&E’s notices address are current.* Any notice or other communication required or permitted under this Easement shall be in writing and shall be either personally delivered or transmitted by registered or certified mail, return receipt requested, postage prepaid, or by a nationally recognized overnight courier, such as FedEx, UPS, or Airborne Express, addressed to the parties as follows:

If to Grantor:

Director, Land Management  
Pacific Gas and Electric Company  
P.O. Box 770000, Mail Code N10A  
San Francisco, CA 94177  
Re: Land Conservation Commitment  

With a copy to:

Law Department  
Pacific Gas and Electric Company  
P.O. Box 7442  
San Francisco, CA 94120  
Attn: Senior Director & Lead Counsel, Corporate and Commercial Group (Real Estate)  
Re: Land Conservation Commitment  

If by personal delivery or overnight courier:

Director, Land Management  
Pacific Gas and Electric Company  
245 Market Street, Room 1051  
San Francisco, CA 94105  
Re: Land Conservation Commitment
With a copy to:

Law Department  
Pacific Gas and Electric Company  
77 Beale Street, Mail Code B30A  
San Francisco, CA 94105  
Attn: Senior Director & Lead Counsel, Corporate and Commercial Group (Real Estate)  
Re: Land Conservation Commitment

If to Grantee:  
Mother Lode Land Trust  
PO Box 1435  
Jackson, CA 95642  
Attn: Executive Director

The date of any notice or communication shall be deemed to be the date of receipt if delivered personally, or the date of the receipt or refusal of delivery if transmitted by mail or overnight courier. Any party may change the address for notice by giving notice to the other party in accordance with this Section 16.

17. Amendment. This Easement may not be amended, except by written amendment executed by Grantor and Grantee or their respective successors and assigns and recorded in the official public records of the jurisdiction where the Property is located. If circumstances arise under which an amendment would be appropriate, any such amendment shall be consistent with Grantee’s conservation easement amendment policy(ies), and the Purpose of this Easement, including continuing to protect and preserve the Beneficial Public Values, and shall not affect the perpetual duration of this Easement or the qualification of the Conservation Easement as a conservation easement under California Civil Code §815 et seq. (or successor thereto). Grantee shall promptly record the amendment in the official records of the County in which the Property is located, and shall thereafter promptly provide a conformed copy of the recorded amendment to Grantor. The party requesting the amendment shall reimburse the non-requesting party for all reasonable costs incurred in connection with the drafting, review, negotiation, approval and recording of such amendment. Grantor shall be deemed to be the "party requesting the amendment" in connection with any amendment and/or new conservation easement(s) pursuant to Section 13 above and the "reasonable costs incurred" shall include consideration of whether an amendment and/or new conservation easement(s) is/are necessary or appropriate.

18.1 Definitions. The following terms have the meanings ascribed to them below for purposes of this Easement:

18.1.1 "Environmental Requirements" means all applicable present and future laws, statutes, regulations, rules, ordinances, codes, licenses,
permits, orders, approvals, plans, authorizations, judicial, administrative and regulatory decrees, directives and judgments of all governmental agencies, departments, commissions and boards, relating to the protection of human health or safety, or regulating or relating to industrial hygiene or environmental conditions, or the protection of the environment, or pollution or contamination of the air, soil, surface water or groundwater, including, without limitation, all requirements and regulations pertaining to reporting, licensing, permitting, investigating and remediating emissions, discharges, releases or threatened releases of Hazardous Substances, whether solid, liquid or gaseous in nature, into the air, surface water, or land, or relating to the manufacture, processing, distribution, use, treatment, storage, disposal, transport or handling of Hazardous Substances, whether solid, liquid or gaseous in nature.

18.1.2 "Hazardous Substances" means any hazardous or toxic material or waste which is or becomes regulated by any local governmental authority, the State of California or the United States Government under any Environmental Requirements, including, without limitation, any material or substance:

(a) now or hereafter defined as a "hazardous substance," "hazardous waste," "hazardous material," "extremely hazardous waste," "restricted hazardous waste" or "toxic substance" or words of similar import under any applicable local, state or federal law or under the regulations adopted or promulgated pursuant thereto; and all rules and regulations of the United States or California Environmental Protection Agency or any successor agency, or any other state or federal department, board or agency, or any other agency or governmental board or entity having jurisdiction, as any of the foregoing have been, or are hereafter amended from time to time; or

(b) which is toxic, explosive, corrosive, flammable, infectious, radioactive, carcinogenic, mutagenic or otherwise hazardous, and is now or hereafter regulated as a Hazardous Substance by any governmental authority, agency, department, commission, board, agency or instrumentality of the United States, any State of the United States or any political subdivision thereof; or which cause, or are listed by the State of California as being known to the State of California to cause, cancer or reproductive toxicity; or

(c) the presence of which on the Property poses or threatens to pose a hazard to the health or safety of persons or to the environment; or

(d) which contains gasoline, diesel fuel or other petroleum hydrocarbons; or

(e) which contains lead-based paint or other lead contamination, polychlorinated biphenyls or asbestos or asbestos-containing materials or urea formaldehyde foam insulation; or

(f) which contains radon gas.

18.1.3 "Necessary Remediation" means Remediation required by any governmental agency which has jurisdiction over the Remediation pursuant to the Environmental Requirements.
18.1.4 "Remediation" refers to the process of, and all work and planning performed in connection with, the investigation, testing for, monitoring, remediation, containment, transportation, removal and disposal or recycling of Hazardous Substances from the Property and any other property to which Hazardous Substances originating on the Property have migrated or may migrate in the future, and the repair and restoration of the Property, and restoration and mitigation of affected natural resources, regardless of whether such actions are required by Environmental Requirements.

18.2 Allocation of Responsibility for Hazardous Substances.

18.2.1 Generally. Grantor shall (as between Grantor and Grantee) bear the cost for the Necessary Remediation of Hazardous Substances.

18.2.2 Environmental Reports. Grantor, as part of the Land Conservation Commitment has prepared certain environmental reports concerning the Property. Copies of these environmental reports have been provided to Grantee.

18.2.3 Grantor Responsibility for the Cost of Necessary Remediation. Grantor shall retain responsibility for the cost of Necessary Remediation of Hazardous Substance releases in soil and groundwater, whether occurring in the past or at any time in the future, which are present on the Property, provided that Grantee did not cause, in whole or in part, such Hazardous Substance contamination.

18.2.4 No Owner or Operator Liability. The parties do not intend this Easement to be, and this Easement shall not be, construed such that it creates in or gives to Grantee any of the following solely as the result of being a holder of the Conservation Easement:

(a) The obligations or liability of an "owner" or "operator" or "arranger," as those terms are defined and used in Environmental Requirements;

(b) The obligations or liabilities of a person described in 42 U.S.C. §9607(a)(3) or (4);

(c) The obligations of a responsible person under any applicable Environmental Requirements;

(d) The right to investigate and remediate any Hazardous Substances associated with the Property; or

(e) Any control over Grantor’s ability to investigate, remove, remediate or otherwise clean up any Hazardous Substances associated with the Property.
18.3 Hazardous Substances Indemnification.

18.3.1 By Grantor. Grantor agrees and covenants, at its sole cost and expense, to indemnify, protect, defend and hold Grantee harmless, from and against any and all losses (including diminution in the value of the Property and other consequential damages), costs, claims, demands, actions, suits, orders, causes of action, penalties, fines, taxes, obligations, controversies, debts, expenses, accounts, damages (including, without limitation, punitive damages), judgments and liabilities of whatever kind or nature, and by whomsoever asserted, in law, equity or otherwise, including, without limitation, the actual fees and expenses of experts, attorneys and others and the payment of "response costs" under CERCLA or any other Environmental Requirements, arising from or relating, in whole or in part, to Hazardous Substances present at the Property, alleged to be present there, or otherwise connected in any way to the Property, whether before, on, or after the date of this Easement (collectively, "Environmental Claims"), except to the extent caused, in whole or in part, by the negligent or intentional act of Grantee.

18.3.2 By Grantee. Grantee agrees and covenants, at its sole cost and expense, to indemnify, protect, defend and hold Grantor harmless, from and against any and all Environmental Claims, to the extent caused, in whole or in part, by the negligent or intentional act of Grantee.

19.1 Promotion of Climate Stability. Grantor and Grantee anticipate that the protection and preservation of the Beneficial Public Values will promote climate stability, especially the ability of the forest to store atmospheric carbon as a means to mitigate global warming, which is recognized as being of public benefit by the 1993 United Nations Framework Convention on Climate Change, the federal Energy Policy Act of 1002, section 1605(a) and (b), the United States Climate Challenge Program, the 2007 reports of the International Panel on Climate Change, and California legislation such as that embodied in Fish and Game Code Section 1356.

19.2 Reservation of Carbon Rights. Grantor exclusively reserves to itself, and to its personal representatives, heirs, successors and assigns, any and all carbon rights and obligations appurtenant to or accruing from the Property as may exist as of the date of recordation of this Easement or as may be granted, discovered, created, declared or developed in the future, including, but not limited to, the right to (subject to and in accordance with Section 7 hereof) use, store, sequester, accumulate, and/or depreciate carbon within or on the Property and the right to trade, sell, transfer, or lease these rights. Grantor and Grantee acknowledge and agree that these carbon rights are consistent with the Beneficial Public Values, and this Easement shall not extinguish or otherwise impair the carbon rights and obligations appurtenant to or accruing from the Property.

19.3 Carbon Certification. In furtherance of Grantor’s exercise of the carbon rights reserved hereunder, Grantor may elect to enter into an agreement not
inconsistent with this Easement respecting such reserved rights as may be required by a third party that Grantor chooses ("Carbon Certification Party") in order to facilitate the sale, transfer or lease of the carbon rights and may record such agreement in the official records of any County where the Property is located. To the extent reasonably required by any Carbon Certification Party and requested by Grantor, Grantee, at Grantor’s cost and expense, shall cooperate with Grantor by accommodating Grantor’s establishment, verification or certification of the carbon rights in connection with the Property. Grantor agrees to notify Grantee at least thirty (30) days prior to any sale, transfer or lease of these carbon rights or the recording of an agreement with respect thereto, unless Grantor has previously notified Grantee in an Annual Work Plan.

20.1 Governing Laws. This Easement shall be governed by, and construed and enforced in accordance with, the laws of the State of California.

20.2 No Public Dedication. Nothing contained in this Easement shall be construed or deemed to be an express or implied dedication or gift of all or any portion of the Property for use or access by the general public nor shall this Easement or any of the rights granted hereunder be construed as an acknowledgement of any claim of prescriptive or other similar rights in or over the Property.

20.3 Liberal Construction. Any general rule of construction to the contrary notwithstanding, this Easement shall be liberally construed to effect the Purpose of this Easement and the policy and purpose of California Civil Code §815 et seq., while recognizing Grantor’s reserved rights. If any provision in this Easement is found to be ambiguous, an interpretation consistent with the Purpose of this Easement, which recognizes Grantor’s reserved rights and that would render the provision valid shall be favored over any interpretation that would render it invalid.

20.4 Further Assurances. Each party hereto agrees to execute and deliver to the other party such further documents or instruments as may be necessary or appropriate in order to carry out the intentions of the parties as contained in this Easement.

20.5 Severability. If any provision of this Easement shall be unenforceable or invalid, the same shall not affect the remaining provisions of this Easement, and to this end the provisions of this Easement are intended to be and shall be severable.

20.6 Entire Agreement. This Easement sets forth the entire agreement of the parties with respect to the Conservation Easement and supersedes all prior discussions, negotiations, understandings, or agreements relating to the Conservation Easement, all of which are merged herein.

20.7 No Forfeiture. Nothing contained herein will result in a forfeiture or reversion of Grantor’s title in any respect.
20.8 **Successors.** The easement created by this instrument shall be a servitude running with the land in perpetuity. The covenants, terms, conditions, and restrictions of this Easement shall be binding upon, and inure to the benefit of, the parties hereto and their respective successors and assigns and shall run with the Property. However, this Easement shall not create or bestow any lien or property right in any third party. Grantor and Grantee agree that no third party beneficiary to this Easement exists and that nothing contained herein shall be construed as giving any person third party beneficiary status or any right of enforcement hereunder.

20.9 **Recordation.** Grantee shall promptly record this Easement in the official records of the County in which the Property is located, and shall thereafter promptly provide to Grantor a copy hereof showing the recording information. Grantee may re-record this Easement at any time as may be required to preserve its rights in this Easement.

20.10 **Termination of Rights and Obligations.** A party’s rights and obligations under this Easement shall terminate only upon transfer of the party’s interest in all or portions of either the Conservation Easement or the Property, except that liability for acts or omissions occurring prior to transfer shall survive the transfer.

20.11 **Attorneys’ Fees.** In the event that any party shall bring an action to enforce its rights under this Easement, or relating to the interpretation hereof, whether for declaratory, injunctive or other relief, the prevailing party in any such proceeding shall be entitled to recover from the other party reasonable attorneys’ fees and all costs, expenses and disbursements that the prevailing party incurred in connection with such proceeding, including appeals, remands and any other subsequent proceeding (including, but not limited to, the reasonable costs of discovery, investigation, preparation for trial, professional or expert consultation and testimony). A party shall be deemed to have prevailed in any such action (without limiting the generality of the foregoing) if such action is dismissed upon the payment by the other party of the sums allegedly due or the performance of obligations allegedly not complied with, or if such party obtains substantially the relief sought by it in the action, irrespective of whether such action is prosecuted to judgment. The non-prevailing party shall also pay the attorneys’ fees and costs incurred by the prevailing party in any post-judgment proceedings to collect and enforce the judgment. Any such fees and costs incurred prior to judgment, award, or decree may be included in any judgment, award or decree entered in such proceeding in favor of the prevailing party. Any such fees, costs and expenses incurred by the prevailing party in enforcing a judgment, award or decree in its favor shall be recoverable separately from and in addition to any other amount included in such judgment, award or decree. This provision is separate and several and shall survive the merger of this Easement into any judgment on this Easement.

20.12 **Mortgage Liens Subordinate.** No provision of this Easement is to be construed as impairing the ability of Grantor to use the Property as collateral for any loan, provided that any lien securing such loan (a "Mortgage Lien"), regardless of date, shall be subordinate to the terms of this Easement and Grantee’s rights under this Easement. Under no circumstances may Grantee’s rights be extinguished or otherwise
affected by the recording, foreclosure, or any other action taken concerning any Mortgage Lien.

20.13 Pre-Existing Water Rights. In accordance with Section 12(e) of the Stipulation, this Easement does not impact the authority of third-party holders of water rights to exercise those rights.

20.14 Table of Contents and Captions. The table of contents and captions in this Easement have been inserted solely for convenience of reference and are not a part of this Easement and shall have no effect upon construction or interpretation.

20.15 Incorporation of Recitals. All Recitals are incorporated herein by this reference.

20.17 Counterparts. This Easement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event of a discrepancy between counterparts, the recorded Easement shall be controlling.

[Signature page follows]
IN WITNESS WHEREOF, Grantor has granted to Grantee, and Grantee has accepted, this Easement, and the parties mutually agree to the terms and covenants set forth above, as of the Effective Date.

Legal Description of Property

THE LAND DESCRIBED HEREIN IS SITUATED IN THE STATE OF CALIFORNIA, COUNTY OF AMADOR, UNINCORPORATED AREA, AND IS DESCRIBED AS FOLLOWS:

PARCEL ONE:

X137-CFX-00039
APN 028-010-010
LCP ID #0952

ALL THAT CERTAIN PARCEL OF LAND SITUATE IN SECTION 4 AND SECTION 9, TOWNSHIP 8 NORTH, RANGE 16 EAST, MOUNT DIABLO BASE AND MERIDIAN, AS RECORDED IN VOLUME A, PAGE 297 OF MISCELLANEOUS PATENTS OF THE COUNTY OF AMADOR, STATE OF CALIFORNIA, PARTICULARLY DESCRIBED THEREIN AS FOLLOWS:

PARCEL TWO:

X137-CFX-00045
APN 028-010-011
LCP ID #0953

ALL THAT CERTAIN PARCEL OF LAND SITUATE IN SECTION 9, TOWNSHIP 8 NORTH, RANGE 16 EAST, MOUNT DIABLO BASE AND MERIDIAN, AS RECORDED IN VOLUME A, PAGE 297 OF MISCELLANEOUS PATENTS OF COUNTY OF AMADOR, STATE OF CALIFORNIA, PARTICULARLY DESCRIBED THEREIN AS FOLLOWS:

PARCEL THREE:

X137-CFX-00046
APN 028-010-008
LCP ID #0954

ALL THAT CERTAIN PARCEL OF LAND SITUATE IN SECTION 8, TOWNSHIP 8 NORTH, RANGE 16 EAST, MOUNT DIABLO BASE AND MERIDIAN, AS RECORDED IN VOLUME A, PAGE 297 OF MISCELLANEOUS PATENTS OF THE COUNTY OF AMADOR, STATE OF CALIFORNIA, PARTICULARLY DESCRIBED THEREIN AS FOLLOWS:

SOUTHWEST ONE-QUARTER OF THE SOUTHEAST ONE-QUARTER OF SAID SECTION 8.
PARCEL FOUR:

X137-CFX-00047
APN 028-050-08
LCP ID #0955

ALL THAT CERTAIN PARCEL OF LAND SITUATE IN SECTION 16, TOWNSHIP 8 NORTH, RANGE 16 EAST, MOUNT DIABLO BASE AND MERIDIAN, AS RECORDED IN VOLUME A, PAGE 263 OF MISCELLANEOUS PATENTS OF THE COUNTY OF AMADOR, STATE OF CALIFORNIA, PARTICULARLY DESCRIBED THEREIN AS FOLLOWS:

NORTHWEST ONE-QUARTER OF THE NORTHWEST ONE-QUARTER OF SAID SECTION 16.

PARCEL FIVE:

X137-CFX-00048
APN 028-050-005

LCP ID #0958

ALL THAT CERTAIN PARCEL OF LAND SITUATE IN SECTION 7 AND SECTION 18, TOWNSHIP 8 NORTH, RANGE 16 EAST, MOUNT DIABLO BASE AND MERIDIAN, AS RECORDED IN BOOK 49, PAGE 196 OF DEEDS AND IN BOOK 49, PAGE 272 OF DEEDS, BOTH OF THE COUNTY OF AMADOR, STATE OF CALIFORNIA, PARTICULARLY DESCRIBED THEREIN AS FOLLOWS:

EXHIBIT VERSION

EXHIBIT B

Description of Hydro Project Activities and Hydroelectric Facilities and Associated Water Delivery Facilities

As used in this Easement, "Hydro Project Activities" are those existing and future uses of the Property, and the existing and future Hydroelectric Facilities and Associated Water Delivery Facilities (as defined below) now or hereafter located on, above, or under the Property, associated with the operation of the Mokelumne River FERC Project (FERC Project No. 137), and shall include any future uses of the Property, and the existing and future Hydroelectric Facilities and Associated Water Delivery Facilities now or hereafter located on, above, or under the Property, associated with compliance with the current FERC License and/or any future FERC License, FERC License renewal or other regulatory requirements.

As used in this Easement, "Hydroelectric Facilities and Associated Water Delivery Facilities" are those existing and future facilities, structures, buildings, and improvements now or hereafter located on, above, or under the Property, and associated with the operation of the Mokelumne River FERC Project (FERC Project No. 137), including, but not limited to, the following existing and future improvements: 2 dams, boat ramps, and other infrastructure and facilities necessary for the operation of the Mokelumne River FERC Project; and other improvements for existing and future water delivery and other requirements of power generation, transmission, distribution, and storage, for nonconsumptive and consumptive water use; gauging stations; bridges, electrical transmission lines, including distribution lines; and communications lines and facilities.
EXHIBIT C
Hydro Reserved Rights

Grantor’s reserved rights on the Property include the following, which are expressly excluded from the transfer and conveyance of the easement granted in this Easement and reserved to Grantor:

Subject to the provisions of Section 7, the right to conduct Hydro Project Activities on the Property, including construction, operation, repair, alteration, maintenance, removal, replacement and expansion of existing and future Hydroelectric Facilities and Associated Water Delivery Facilities, including project replacements and improvements required for existing and future water delivery and other requirements for power generation, transmission, distribution, and storage, for nonconsumptive and consumptive water, and for communications in connection with the foregoing and for compliance with any future FERC License, FERC License renewal or other regulatory requirements. In furtherance of and without in any way limiting the generality of the foregoing, the following rights are expressly reserved:

(1) The right to conduct any and all uses and activities now or at any time in the future deemed necessary or appropriate by Grantor in Grantor’s sole discretion exercised in good faith in connection with the generation of hydroelectric energy, including, but not limited to the construction, operation, repair, alteration, maintenance, removal, replacement and expansion of existing Hydroelectric Facilities and Associated Water Delivery Facilities, and the construction, operation, repair, alteration, maintenance, removal, replacement and expansion of new Hydroelectric Facilities and Associated Water Delivery Facilities; and

(2) The right to use, maintain, establish, construct, alter, expand and improve water sources, courses, and bodies within the Property, and to take, divert, store, convey and appropriate water; and

(3) The right to increase or otherwise modify water diversion, storage and transmission capacities of Hydroelectric Facilities and Associated Water Delivery Facilities; and

(4) The right to exercise: all riparian water rights inherent in and part and parcel of the Property; all appropriative surface water rights (including, but not limited to, any appropriative surface water rights having a point of diversion, place of storage, or place of use on the Property); all prescriptive surface water rights; and all other right, title and interest of any nature whatsoever in and to the surface waters which are now or hereafter located or flowing on, under or abutting the Property; and

(5) The right to decommission all or any portion of existing and future Hydroelectric Facilities and Water Delivery Facilities in accordance with the applicable license issued by the FERC, or as otherwise allowed by Applicable Law; and
(6) The right to enlarge, improve, reconstruct, relocate and replace said Grantor’s existing facilities and additional facilities with any other number, size, or type of transformers, poles, towers, or structures, or underground wires, cables, pipelines and conduits, or other devices and equipment either in the original location or at any location or locations within the Property; and

(7) The right to construct, operate, use, repair, alter, maintain, remove, replace and expand Grantor’s existing and future facilities for transformation, transmission and distribution of electric energy and for communication purposes and also the rights to reconstruct, replace, remove, maintain and use the same as Grantor shall at any time and from time to time deem necessary in Grantor’s sole discretion exercised in good faith, together with the rights to excavate for, construct, install, repair, reconstruct, replace, remove, maintain and use, at any time and from time to time, additional facilities for the transformation, transmission and distribution of electric energy and for communication purposes, consisting of such devices and equipment with suitable concrete pads and adequate protection therefore necessary for transforming electric energy, one or more lines of underground wires and cables (enclosed at Grantor’s option within conduits), and one or more lines of towers, poles and/or other structures, wires and cables, including both underground and overhead ground wires, and all necessary and proper foundations, footings, cross arms and other appliances and fixtures for use in connection with said towers, poles and/or other structures, wires and cables.
EXHIBIT D

Beneficial Public Values

The Purpose of the Conservation Easement for the Lower Bear Planning Unit is to protect the Beneficial Public Values of the Property, as summarized below and described in more detail in the Baseline Documentation Report:

(a) Habitat for fish, wildlife, and plants that are native to the area, including species protected under the California Endangered Species Act and/or the federal Endangered Species Act. The term “habitat” includes vegetation along banks and shorelines that contribute to maintaining watershed health. The term “native” refers to plants and animals that occur naturally on the Property, and are defined as “native” by the California Department of Fish & Wildlife and its successors.

(b) Forest resources on the Property. Forest resources consist of high-elevation Sierra Nevada mixed conifer forest type.

(c) The scenic viewshed of the Property in keeping with the surrounding environment, providing a contiguous forested landscape visible to passersby on the nearby roads, as well as views of the waterbodies on the Property.

(d) Outdoor recreation such as camping, swimming, hiking, boating and sightseeing. Developed outdoor recreational facilities are located on the Property.

(e) Identified historical and cultural values, to the extent they are protected by state and federal law, including artifacts related to Native American uses and the development of hydroelectric generating facilities on the property.
Grantee Insurance Requirements

Grantee shall procure, carry and maintain the following insurance coverage:

A. Workers’ Compensation and Employers’ Liability
   1. Workers’ Compensation insurance or self-insurance indicating compliance with any applicable labor codes, acts, laws or statutes, state or federal.
   2. Employers’ Liability insurance shall not be less than One Hundred Thousand Dollars ($100,000) for injury or death each accident.

B. Commercial General Liability
   1. Coverage shall be at least as broad as the Insurance Services Office (ISO) Commercial General Liability Coverage "occurrence" form, with no coverage deletions.
   2. The limit shall not be less than One Million Dollars ($1,000,000) each occurrence/ Two Million Dollars ($2,000,000) aggregate for bodily injury, property damage and personal injury.
   3. Coverage shall: a) By "Additional Insured" endorsement add as insureds Grantor, its directors, officers, agents and employees with respect to liability arising out of work performed by or for Grantee; b) Be endorsed to specify that Grantee's insurance is primary.

C. Business Auto
   1. Coverage shall be at least as broad as the Insurance Services Office (ISO) Business Auto Coverage form covering Automobile Liability, code 1 "any auto."
   2. The limit shall not be less than One Million Dollars ($1,000,000) each accident for bodily injury and property damage.

   1. Upon change in carrier or coverage, or otherwise upon Grantor's request, Grantee shall furnish Grantor with certificates of insurance and endorsements of all required insurance for Grantee.
   2. The documentation shall state that coverage shall not be canceled except after thirty (30) days prior written notice has been given to Grantor.
3. The documentation must be signed by a person authorized by that insurer to bind coverage on its behalf and shall be submitted to:

   Pacific Gas and Electric Company
   Insurance Department - B24H
   Post Office Box 770000
   San Francisco, CA 94177

   A copy of all such insurance documents shall be sent to Grantor’s Land Agent as specified under Notices in the body of this Easement.

4. Upon request, not to exceed once annually, Grantee shall furnish Grantor complete copies of policies.

5. Upon request, not to exceed once annually, Grantee shall furnish Grantor the same evidence of insurance for Grantee’s agents or contractors as Grantor requires of Grantee.
Prohibited Uses

As provided in Section 6 of this Easement, Grantor will not engage in, or permit others to engage in, the following Prohibited Uses:

1. **Number of Fee Owners; Subdivision.**

   (a) **Limit on Number of Fee Owners.** Except for Specified Required Actions, notwithstanding the fact that the Property, at any time, might be comprised of more than two (2) separate legal parcels, fee title to the Property shall be held by no more than two (2) separate owners at any given time, provided, however, that the foregoing shall not prohibit undivided ownership of the Property by multiple owners (e.g. tenants in common), subject to the restrictions on the rights of undivided owners provided below, and the terms and conditions of this Easement shall perpetually apply to the Property as a whole. The existence of any separate legal parcels shall not be interpreted to permit any use or activity on an individual legal parcel that would not have been permitted on said parcel under the terms and conditions of this Easement as applied to the Property as a whole. This section only applies to conveyances of fee ownership and not to conveyances of any property interests other than fee ownership (e.g. leasehold interests). In respect to ownership of the Property or permitted separate legal parcels, as the case may be, ownership may be (among others) in the form of a partnership, limited partnership, limited liability company, corporation or other legal entity or as undivided interests such as tenants in common, whether by choice or by operation of any Applicable Laws, but no owner of an undivided interest shall thereby have (i) the right of exclusive occupancy or exclusive use of any separate portion of the Property (or permitted separate legal parcel), or (ii) any right to have the Property (or permitted separate legal parcel), partitioned in kind, whether pursuant to California Code of Civil Procedure §872.010 et seq. ("CCP") or any successor statute or otherwise. In the event that a partition action is brought and a court determines that the remedy of partition must be granted, Grantor, on behalf of itself and its successors and assigns hereby irrevocably agrees the remedy shall not be a physical subdivision of the Property (or permitted separate legal parcel), but instead may be a partition by appraisal pursuant to CCP §873.210 or any successor statute or a judicially supervised sale of Grantor’s entire estate in the Property (or permitted separate legal parcel) pursuant to CCP §873.510 or any successor statute, subject, however, to this Easement, followed by a division of sales proceeds among the parties entitled thereto. Grantor recognizes that Grantee will incur direct and indirect costs for monitoring and administration of the Conservation Easement in the event fee title to a portion of the Property is transferred under this provision. Accordingly, upon Grantor’s sale, transfer or conveyance of fee title to less than all of the Property in accordance with this subsection (a), Grantor shall pay, or cause to be paid, to Grantee a one-time payment of a sum representing the increased cost of such Conservation Easement stewardship, as reasonably determined at such time by Grantee. Such one-time payment shall be in addition to any reimbursements required pursuant to Section 13.2.4 or Section 17 of this Easement.
(b) **Limit on Subdivision.** Except for Specified Required Actions, Grantor shall not subdivide the Property with the result of frustrating the ownership restrictions set forth in subsection (a) above. For example, the following actions would not frustrate the ownership restrictions in subsection (a) above: (i) merger and reduction of the number of separate legal parcels comprising the Property; or (ii) reconfiguring by lot line adjustment the existing internal boundaries of legal parcels within the outer boundaries of the Property; or (iii) clarifying boundary lines with adjacent landowners; or (iv) subdivisions to facilitate Hydro Project Activities. Grantor shall (i) as part of the Annual Work Plan review in accordance with Section 7, or at least ninety (90) days prior to any Grantor subdivision activity (whether or not prohibited hereunder), furnish Grantee with the subdivision application or filings; and (ii) provide to Grantee reasonably sufficient information to identify the boundaries of each legal parcel. This information will become part of the Baseline Documentation Report. At the election of either party, the parties shall execute and record an amendment of this Easement to reflect any change to the legal description of the Property set forth in Exhibit A or any other changes and allocations resulting from permitted subdivision that are not established to the reasonable satisfaction of the parties by recordation in the Public Records of the plan of subdivision approved under Applicable Law.

2. **Development Rights.** Except for Specified Required Actions provided in Section 7, the development rights associated with all or any portion of the Property may not be transferred to, or used or exercised in connection with, any property other than the Property, such rights of transfer, use and exercise being hereby terminated and extinguished in perpetuity. The phrase "development rights" means any and all rights, however designated, now or hereafter associated with the Property or any portion thereof that may be used pursuant to applicable zoning laws, land use laws or other governmental laws or regulations, to compute permitted size, height, bulk, or number of structures, development density, lot yield, or any similar development variable on or pertaining to the Property or any other property.

3. **Mining and Drilling.** There shall be no mining, drilling, removing, fracking, or exploring for or extracting of minerals, oil, gas, coal, or other hydrocarbons, soils, sands, gravel, loam, rocks or any other material on, under, or at the Property. Notwithstanding the foregoing, the following shall not be Prohibited Uses:

   (a) Specified Required Actions provided in Section 7;

   (b) Drilling, removal and extraction of soils, sands, gravel, loam, rocks or any other material on, under, or at the Property in connection with studies and testing to the extent related to Grantor’s exercise of the Hydro Reserved Rights;

   (c) Testing, drilling and operating groundwater wells; and Construction or placement of any structures or improvements within the Hydro Operating Zone to the extent related to Grantor’s exercise of the Hydro Reserved Rights; and

   (d) The use of soil, sand, gravel and other similar material located on the Property as appropriate for road maintenance, erosion control and in connection
with a Required Action subject to the following limitations: (i) such disturbance shall be kept to the minimum necessary to exercise such rights, (ii) any such soils, sands, and other materials shall not be removed from the Property, and (iii) all such utilization activities shall be conducted in a manner that minimizes to the greatest extent practicable impacts to the Beneficial Public Values.

4. Construction and Placement of Structures and Improvements. There shall be no construction or placement of any structures or improvements on the Property, including (but not limited to) residential, industrial, office, or other buildings, underground or aboveground tanks. Notwithstanding the foregoing, the following shall not be Prohibited Uses:

   (a) Required Actions provided in Section 7;

   (b) Permitted Uses under Exhibit I;

   (c) Construction or placement of any structures or improvements within the Hydro Operating Zone which Grantor has determined relate to Grantor’s exercise of the Hydro Reserved Rights; and

   (d) Structures and improvements made in the course of prudent and customary land management activities and/or to protect, preserve, or enhance the Beneficial Public Values (including, for example, garbage enclosures, benches, interpretive kiosks, and appropriately located and sized caretaker structure).

5. Vehicles. Except for Required Actions provided in Section 7, or in the case of an emergency or other occurrence affecting the safety of persons and/or property, there shall be no use of any motorized vehicles off of existing roadways on the Property except vehicles used as necessary to carry out prudent and customary land management activities and/or to protect, preserve, or enhance the Beneficial Public Values. Motorized off-road recreational use shall not constitute an activity "related to the protection or preservation of the Beneficial Public Values" as provided in the preceding sentence.

6. Dumping or Salvage. Except for Required Actions provided in Section 7, there shall be no dumping, storage or other disposal on the Property of soil, trash or garbage except for (a) refuse generated on the Property which may be disposed of on the Property on a temporary basis prior to its removal from the Property in areas where the Beneficial Public Values of the Property are not significantly impaired, or (b) compostable refuse generated on the Property which may be disposed of on the Property in a responsible manner which does not significantly impair the Beneficial Public Values of the Property. Except for Required Actions provided in Section 7, there shall be no dumping, storage (other than on a temporary basis) or other disposal of ashes, sludge, Hazardous Substances, or other unsightly or dangerous materials outside of the Hydro Operating Zone. Except for Required Actions provided in Section 7, there shall be no storage or disassembly of inoperable automobiles, trucks, or other
vehicles or equipment for purposes of sale, or rental of space for that purpose outside of the Hydro Operating Zone.

7. Non-Native Animal Species. Except for Required Actions provided in Section 7, there shall be no release anywhere on the Property of non-native animal species other than livestock without Grantee’s prior written approval in accordance with Section 7, as required.

8. Vegetation. Except for Required Actions provided in Section 7, there shall be no removal, cutting or destruction on the Property of native vegetation except (a) in an emergency and/or for purposes of disease or insect control or (b) to prevent property damage, personal injury, or flooding or (c) as permitted in Exhibit I, Sections 4 and 9, or (d) with Grantee’s prior written approval in accordance with Section 7, as required.

9. Roads and Trails. Except for Required Actions provided in Section 7 or as required to implement a Required Action, or in the case of an emergency or other occurrence affecting the safety of persons and/or property, there shall be no construction of any new roads or trails on the Property; provided, however, the construction of new roads and trails (or the relocation of existing road and trails) on the Property to protect, preserve or enhance the Beneficial Public Values shall be permitted with Grantee’s prior written approval in accordance with Section 7, as required. As used herein, the term "construction" shall not include the creation of roads or trails through repeated use, although such activities shall be governed by this Easement.

10. Commercial Uses. There shall be no office, industrial, or other commercial use on the Property that is likely to significantly impair Beneficial Public Values. Notwithstanding the foregoing, the following shall not be Prohibited Uses:

   (a) Required Actions provided in Section 7;

   (b) Uses permitted by Third Party Use Agreements; and

   (c) Office, industrial, or other commercial uses within the Hydro Operating Zone which Grantor has determined relate to Grantor’s exercise of the Hydro Reserved Rights.

11. Alteration of Land or Excavation. Except for Required Actions provided in Section 7 or as otherwise explicitly permitted by the terms of this Easement, there shall be no filling, excavating, grading, draining or dredging outside of the Hydro Operating Zone, nor any change in the general topography of the Property; provided, however, such activities shall be permitted outside of the Hydro Operating Zone in the course of prudent and customary land management activities and/or to protect, preserve, or enhance the Beneficial Public Values.

12. Billboards. Except for Required Actions provided in Section 7 or permitted uses under Exhibit I or Grantee’s signs permitted under Section 5.3, there shall be no placement of billboards or advertising facilities. The use of Grantor’s logo and/or trade
style on a sign will not in and of itself constitute a billboard or advertising facility under this provision.
EXHIBIT H

Express Third Party Uses and Third Party Use Agreements

1. **Express Third Party Uses**

Express Third Party Uses on the Property are all uses permitted by and pursuant to the Third Party Use Agreements.

2. **Third Party Use Agreements**

Third Party Use Agreements on the Property are:

(a) Those agreements and rights disclosed by the Preliminary Report following Exhibit H and incorporated herein by this reference;

(b) Unrecorded Bear River Lake Resort Lease Agreement effective November 3, 1999, between Grantor and Jon Frazier and Katherine J. Frazier;

(c) Unrecorded Amended and Restated Recreational Camp Ground Lease (Camp Ritchie LDS Camp) dated August 1, 2012 between Grantor and the Corporation of the Presiding Bishop of the Church of Jesus Christ of the Latter Day Saints; and

EXHIBIT I

Permitted Uses

The following are Permitted Uses:

1. The Express Third Party Uses.

2. The uses and activities expressly permitted under Exhibit F.

3. Except as otherwise limited by this Easement, the right to sell, encumber, or otherwise transfer the Property, portions thereof, or interests therein, to anyone Grantor chooses.

4. The right to trim and cut down and clear away any and all trees, brush and vegetation (a) which constitute a hazard to persons or property, and/or (b) for purposes of fire management, disease or insect control or otherwise as necessary or appropriate for prudent land management (i.e., not motivated by commercial benefit), and/or (c) for other vegetation management operations, including but not limited to fuel reduction projects, thinning of tree stands and meadow restoration projects. The foregoing may include pesticide use to control vegetation (brush, grass, weeds, etc.) and/or insects.

5. Consistent with Section 9.2, the right to install, maintain, repair, replace and maintain gates and fences.

6. The right to perform all activities required to comply with any and all Applicable Laws.

7. The right to maintain, repair, restore, replace and reconstruct all structures and improvements now or hereafter located on the Property, provided any replacement structures or improvements shall be located in substantially the same location and within the same footprint as the structure or improvement being replaced, and shall be substantially the same height as the structure or improvement being replaced.

8. The right to install minor, temporary structures necessary or appropriate in connection with the performance of prudent and customary land management activities, Hydro Project Activities, or the protection, preservation, or enhancement of the Beneficial Public Values.

9. (a) The right to undertake commercial and/or non-commercial forest management activities on the Property for any of the following purposes: (1) to promote the health and sustainability of the Property’s natural resources; (2) to protect and enhance the Property’s riparian resources; (3) to maintain an ecologically appropriate species mix of overstory and understory vegetation; (4) to protect and enhance wildlife habitat for native species historically present on the Property; (5) to protect cultural resources on the Property; (6) to control invasive and non-native vegetation; and (7) to
prevent, mitigate, and/or respond to any natural disaster (such as wildfire, significant insect and disease outbreak, or significant wind damage).

(b) Forest management activities for the purposes outlined in Paragraph (a) may include, but shall not be limited to, timber harvesting; salvage logging; conversion of vegetation types; prescribed fire; pre-commercial and commercial thinning of conifer and hardwood trees; fuels management; tree planting; control of undesirable vegetation and pests; habitat maintenance and enhancement; and road and watercourse crossing construction, maintenance, repair, and enhancement. Grantor shall carry out all such forest management activities in compliance with Applicable Law.

(c) Grantor shall provide to Grantee any existing or future forest management plan as part of the Annual Work Plan review process pursuant to Section 7.3 of this Easement. Grantor and Grantee shall review and discuss such plan (along with any proposals Grantee may have regarding this Permitted Use by Grantor pursuant to Section 7.3.4(b) of this Easement) periodically as part of such Annual Work Plan review process. Said forest management plan shall be updated periodically, as appropriate.

10. The right to maintain, repair, improve, replace and reconstruct, the existing resort facilities, cabins and associated infrastructure and improvements on the Property associated with the Third Party Uses in their existing location, within their existing footprints and without a substantial increase in height. In addition, the expansion of the existing resort facilities, cabins and associated infrastructure and improvements on the Property beyond their existing footprints and/or with an increase in height shall be a Permitted Use if such expansion is approved by Grantor under the applicable Third Party Use Agreement, does not constitute a Required Action, and is subject to Grantee’s approval in the manner provided for Discretionary Actions.

11. The right to construct, reconstruct, replace, remove, maintain and use the types of facilities and improvements described in paragraph (7) of Exhibit C that are unrelated to Hydro Project Activities and do not constitute a Required Action provided that such facilities shall be subject to Grantee’s approval in the manner provided for Discretionary Actions.

12. The right to control predatory and problem animals, including, but not limited to, wild boars, coyotes, beavers and ground squirrels and the right to control or eliminate noxious weeds and non-native plant species on the Property, all in accordance with Applicable Laws.

13. The right to erect reasonably sized signs (illuminated and non-illuminated) to support and manage safety and permitted uses of the Property, including signs regarding authorized and unauthorized entry and uses or other appropriate markers in prominent locations on the Property, such as boundary fences, trails, and access roads.
Conservation Easement Funding Agreement
Lower Bear Area Planning Unit

This Conservation Easement Funding Agreement (“Agreement”) is entered into as of the Effective Date (defined below) by and between the Pacific Forest and Watershed Lands Stewardship Council, a California nonprofit public benefit corporation (the “Stewardship Council”) and the Mother Lode Land Trust, a California nonprofit public benefit corporation (“Grantee”) with reference to the following facts:

A. The Stewardship Council was created to oversee the “Land Conservation Commitment” described in (1) that certain Settlement Agreement among Pacific Gas and Electric Company (“PG&E”), PG&E Corporation, and the California Public Utilities Commission (the “Commission”) as modified and approved by the Commission in its Opinion and Order of December 18, 2003 (Decision 03-12-035) (the “Settlement Agreement”); and (2) that certain Stipulation Resolving Issues Regarding the Land Conservation Commitment dated September 25, 2003 (the “Stipulation”).

B. Pursuant to the Settlement Agreement and Stipulation, certain lands owned by PG&E at the time of the Settlement (the “PG&E Watershed Lands”) are to be conserved for a broad range of beneficial public values, including the protection of the natural habitat of fish, wildlife and plants; the preservation of open space; outdoor recreation by the general public; sustainable forestry; agricultural uses; and historic values. The Stewardship Council is charged with developing a Land Conservation Plan for the protection and enhancement of the PG&E Watershed Lands.

C. Grantee is a publicly-supported, tax exempt nonprofit organization, qualified under Section 501 (c)(3) of the Internal Revenue Code (“IRC”), whose primary purpose is to preserve, protect or enhance, land in its natural scenic, historical agricultural, forested or open space condition or use and conserve natural areas for aesthetic, scientific, charitable and educational purposes. Grantee is eligible to hold a conservation easement pursuant to California Civil Code Section 815.3.

D. In connection with the Land Conservation Commitment, Grantee has agreed to accept a perpetual conservation easement created pursuant to California Civil Code Section 815 et seq. (the “Conservation Easement”) over Watershed Lands that are being retained by PG&E consisting of approximately 899 acres of real property located in the County of Amador, State of California, as more particularly described in Exhibit A attached hereto and incorporated herein by reference (the “Property”).

E. In consideration of Grantee’s agreement to accept the Conservation Easement and assume the duties and obligations of the easement holder, the Stewardship Council has agreed to provide funding to Grantee in the amounts and subject to the terms and conditions described below.

NOW, THEREFORE, the Stewardship Council and Grantee agree as follows:
1. **Effective Date.** This Agreement shall become effective upon the recording of the Conservation Easement in favor of Grantee in the Official Records of Amador County (the “Effective Date”). It is understood and agreed that if for any reason whatsoever the recording of the Conservation Easement does not occur on or before December 31, 2015, this Agreement shall be of no further force or effect and the parties shall thereupon be released from any obligations under this Agreement.

2. **Grant.** Effective upon the Effective Date, the Stewardship Council grants NINETY NINE THOUSAND SEVEN HUNDRED DOLLARS ($99,700) (the “Grant Funds”) to Grantee to be used solely for the following purposes:

   a. Eighty Nine Thousand Seven Hundred Dollars ($89,700) of the Grant Funds shall be used to implement conservation easement monitoring as described in Sections 3 and 4 below (the “Monitoring Funds”).

   b. Ten Thousand Dollars ($10,000) of the Grant Funds shall be used for conservation easement defense and enforcement costs as described in Section 5 below (the “Defense and Enforcement Funds”).

3. **Use of Grant Funds.** The Grant Funds shall be payable to Grantee within thirty (30) days of the Effective Date. Grantee will use the Grant Funds for the purposes described in this Agreement and for no other purpose without the prior written consent of the Stewardship Council. The Stewardship Council reserves the right to require the total or partial return of Grant Funds in the event Grantee fails to comply with the terms and conditions of this Agreement.

   a. Grantee may “pool” the Monitoring Funds with other funds Grantee uses for monitoring of other conservation easements held by Grantee and Grantee may use the Monitoring Funds to monitor any of its conservation easements as long as Grantee meets its obligations as described in Section 4 below.

   b. Within thirty (30) days of receipt of funds, Grantee will provide the Stewardship Council with evidence of deposit of (1) the Monitoring Funds into an account which shall be restricted to the stewardship and monitoring of conservation easements held by the Grantee, including but not limited to the Conservation Easement on the Property; and (2) the Defense and Enforcement Funds into an account which shall be restricted to the legal defense or enforcement of conservation easements held by the Grantee, including but not limited to the Conservation Easement on the Property. The requirement to provide evidence of deposit will be satisfied when Grantee submits to the Stewardship Council the form attached as Exhibit B.

4. **Conservation Easement Monitoring.** From and after the Effective Date, Grantee agrees to conduct regular monitoring of the Property to ensure compliance with the terms of the Conservation Easement. Grantee shall conduct on-site monitoring of the Property not less than annually to assess compliance with the terms and conditions of the Conservation Easement and
note any material changes to the Property compared to the baseline documentation report and prior monitoring reports. Upon written request, the Stewardship Council or its designee shall be permitted to accompany the Grantee on its monitoring visits and to receive a copy of any monitoring report prepared by Grantee. Permissible uses of Monitoring Funds shall include:

a. Regular on-site inspection and monitoring to ensure that the terms of Conservation Easement are being met;

b. Recordkeeping and preparation of reports, notices of violation, any written consent to be submitted to the fee title owner of the property which is subject to the easement, and other documentation related to the Conservation Easement and the Property;

c. Communications with the fee title owner of the property which is subject to the easement regarding the provisions of the Conservation Easement and planned or completed activities on the lands to be performed or allowed by the fee title owner or a licensee/lessee;

d. Responding to any inquiries or concerns raised by entities that have leases or licenses on the Property or other stakeholders who have an interest in ensuring the beneficial public values are protected.

5. Defense and Enforcement Funds. Grantee shall be permitted to use the Defense and Enforcement Funds for the following purposes:

a. To make direct expenditures of attorneys’ fees, costs and disbursements incurred in connection with proceedings to enforce and/or defend the provisions of the Conservation Easement against legal challenge, including any claims by third parties;

b. To “pool” funds for legal expenses to enforce and/or defend against legal challenge conservation easements held by the Grantee, including without limitation the Conservation Easement on the Property;

c. To pay premiums into a Conservation Defense Insurance Program offered through the Land Trust Alliance, or other nationally-recognized conservation organization of which Grantee is a member for the enforcement and defense of conservation easements held by member organizations, or to cover deductibles related to such insurance.

6. Grant Report. Grantee agrees to submit to the Stewardship Council and/or its designee the following grant Status Reports pursuant to this Agreement. The initial Status Report shall be submitted to the Stewardship Council by the fourth quarter of the 2016 calendar year and include data up to the date of the initial Status Report. The final Status Report shall be submitted to the Stewardship Council or its designee on or before December 31, 2023. The due dates of the initial and final Status Reports can be changed by the Stewardship Council or its
designee with at least 60 days written notice to Grantee. The Stewardship Council or its designee shall notify Grantee in a timely manner of the form and content of each Status Report, which shall include, at a minimum:

a. Copies of annual monitoring reports pertaining to the Conservation Easement for years selected by the Stewardship Council or its designee;

b. A statement as to whether any violations of the Conservation Easement were observed during the reporting period, and the outcome of any action taken to correct such violation;

c. A statement as to whether any amendments to the Conservation Easement were approved during the reporting period, with copies of any such amendments included in the Status Reports;

d. A statement as to whether fee title of the property was conveyed, the date of such conveyance, and the identity of the transferee; and

e. A report providing an accounting of how the Grant Funds have been invested or expended in furtherance of the purposes of this Agreement.

7. Records. Grantee will indicate the Grant Funds separately on its books of account, and maintain such records in accordance with generally accepted accounting principles. Grantee shall additionally maintain written records including the baseline documentation report, the Deed of Conservation Easement, any amendments to the Conservation Easement, other transaction documents, and copies of monitoring reports, notices to the landowner, and other communications pursuant to the Conservation Easement in accordance with the practices generally accepted in the land trust community.

8. Inspection. The Stewardship Council or its designee shall have the right to inspect the books and records of Grantee and evaluate Grantee’s use of Grant Funds, so long as (i) such inspection or evaluation occurs during regular business hours; (ii) such inspection or evaluation does not unreasonably interfere with Grantee’s regular operations; and (iii) the Stewardship Council or its designee provides at least three (3) days prior notice of any such inspection or evaluation.

9. Assignment and Transfer of Funds. Grantee shall not assign its interest under the Conservation Easement except in accordance with the provisions of the Conservation Easement relating to permitted assignments. In the event that Grantee assigns its interest under the Conservation Easement to a successor conservation easement holder, Grantee shall transfer the remaining balance of the Grant Funds to the successor conservation easement holder. Assignee’s receipt of any funds from Grantee shall be conditioned upon the assignee’s agreement in writing to assume all of Grantee’s obligations under this Agreement.
10. **Publicity.** The Stewardship Council may include information regarding this Agreement and Grantee in its periodic public reports, press releases, or other public communications.

11. **Representations and Warranties.** Grantee warrants and represents that it is a tax exempt organization under Section 501(c)(3) of the IRC, and is not a private foundation as defined in section 509(a) of the IRC or is an exempt operating foundation described in Section 4940(d)(2) of the IRC. Grantee further represents and warrants that it shall not use the Grant Funds to attempt to influence legislation or otherwise carry out lobbying activities within the meaning of Sections 501(h), 4911, 4945(d)(1) or 4945(e) of the IRC. No part of the Grant Funds may be used to attempt to influence the outcome of any specific public election, or to carry on, directly or indirectly, any voter registration drive. No part of the Grant Funds may be used for purposes other than charitable, scientific, literary, or educational purposes within the meaning of IRC Section 170(c)(2)(B).

Grantee does not knowingly employ individuals or contribute funds to organizations found on any terrorist-related list prepared by the U.S. Government, the United Nations, or the European Union, including the Department of Treasury’s Office of Foreign Assets Control Specially Designated Nationals List, the Department of Justice's Terrorist Exclusion List, or the list attached to Executive Order 13224. Should any change occur with respect to the preceding sentence, Grantee will notify the Stewardship Council within 7 days of such change.

12. **Indemnification.** Grantee hereby agrees to indemnify, defend, and hold harmless the Stewardship Council, and the Stewardship Council’s past, present and future officers, directors, and employees, from and against any and all claims, demands, losses, costs, expenses, obligations, liabilities, damages, recoveries, and deficiencies, including interest, penalties, and reasonable attorney fees and costs, that they may incur or suffer and that result from, or are related to, the receipt and use of the Grant Funds by Grantee.

13. **Limit of Stewardship Council Obligations.** The Stewardship Council’s obligations under this Agreement shall under no circumstances exceed the Grant Funds amount set forth in Section 2 above.

14. **Assignment.** This Agreement may not be assigned by the Grantee in whole or in part except as provided in Section 9 above. The Stewardship Council may assign its rights and delegate its obligations under this Agreement to a third party at the Stewardship Council’s sole discretion. Subject to the foregoing, this Agreement shall be binding upon and inure to the benefit and burden of the parties and their respective heirs, successors and assigns.

15. **Amendment; Entire Agreement.** This Agreement may not be amended or modified except by written instrument signed by both parties. This Agreement constitutes the entire understanding of the parties concerning the subject matter hereof, and supersedes any and all previous negotiations, agreements, or understandings, if any, regarding the matters contained herein.
16. **Governing Law.** This Agreement shall be governed by the laws of the State of California.

17. **Counterparts.** This Agreement may be executed in counterparts which together shall constitute a single agreement.

APPENDIX E

LAND CONSERVATION COMMITMENT

STATEMENT OF PURPOSE

PG&E shall ensure that the Watershed Lands it owns and Carizzo Plains are conserved for a broad range of beneficial public values, including the protection of the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values. PG&E will protect these beneficial public values associated with the Watershed Lands and Carizzo Plains from uses that would conflict with their conservation. PG&E recognizes that such lands are important to maintaining the quality of life of local communities and all the people of California in many ways, and it is PG&E’s intention to protect and preserve the beneficial public values of these lands under the terms of any agreements concerning their future ownership or management.

PG&E Environmental Enhancement Corporation will develop a plan for protection of these lands for the benefit of the citizens of California. Protecting such lands will be accomplished through either (1) PG&E’s donation of conservation easements to one or more public agencies or qualified conservation organizations consistent with these objectives, or (2) PG&E’s donation of lands in fee to one or more public entities or qualified conservation organizations, whose ownership would be consistent with these conservation objectives.

COMMITMENTS

1. **PG&E Shall Place Permanent Conservation Easements on or Donate Watershed Lands**: The Watershed Lands and Carizzo Plains shall (1) be subject to permanent conservation easements restricting development of the lands so as to protect and preserve their beneficial public values, and/or (2) be donated in fee simple to one or more public entities or qualified non-profit conservation organizations, whose ownership will ensure the protection of these beneficial public values. PG&E will not be expected to make fee simple donations of Watershed Lands that contain PG&E’s or a joint licensee’s hydroelectric project features. In instances where PG&E has donated land in fee, some may be sold to private entities subject to conservation easements and others, without significant public interest value, may be sold to private entities with few or no restrictions.

   The conservation easements shall provide for the preservation of land areas for the protection of the natural habitat of fish, wildlife and plants, the preservation of open space, outdoor recreation by the general public, sustainable forestry, agricultural uses, and historic values and, shall prevent any other uses that will significantly impair or interfere with those values. Conservation easements on the Watershed Lands will include an express reservation of a right for continued operation and maintenance of hydroelectric facilities and associated water delivery facilities, including project replacements and improvements required to meet existing and
future water delivery requirements for power generation and consumptive water use by existing users, compliance with any FERC license, FERC license renewal or other regulatory requirements. In addition, easements will honor existing agreements for economic uses, including consumptive water deliveries. The conservation easements shall be donated to and managed by one or more non-profit conservation trustees, qualified conservation organizations or public agencies with the experience and expertise to fully and strictly implement the conservation easements.

2. **Process For Development of the Conservation Easements and Land Donation Plan:** PG&E will work with PG&E Environmental Enhancement Corporation and the Commission in the development and implementation of the conservation easements and land donation plan. PG&E Environmental Enhancement Corporation will recommend to PG&E (1) conservation objectives for the properties, including identification of conservation values, (2) criteria for ultimate disposition of the properties, (3) conservation easements guidelines, and (4) land disposition plans.

3. **Reporting Responsibilities:** PG&E Environmental Enhancement Corporation will prepare a report to the Commission within 18 months of the Effective Date describing the status of the conservation easement and land disposition plan. PG&E Environmental Enhancement Corporation will make the report available to the public upon request. Every two years following the first report, PG&E Environmental Enhancement Corporation will prepare a report to the Commission on the implementation of the conservation easement and land disposition plan.
Attachment B

State Board of Equalization Statement of No Tax Benefit
January 29, 2015

Ms. Becky Zhu
Supervisor, State and Local Tax
Pacific Gas and Electric Company  SBE #0135
Tax Department, Mail Code B12G
PO Box 7054
San Francisco, CA 94120-7054

Re: Lower Bear Conservation Easement Valuation

Dear Ms. Zhu:

In your email dated January 28, 2015, you requested written guidance from the State Board of Equalization (SBE) State-Assessed Properties Division as to the SBE’s valuation method and assessment, in dollar value, associated with Pacific Gas and Electric Company’s (PG&E) conveyance of a conservation easement to the Bear Yuba Land Trust. You specified the subject property is located in Amador County and described by SBE parcel numbers:

135-3-1B Par. 1  135-3-1B Par. 3  135-3-1B Par. 5  135-3-1B Par. 7
135-3-1B Par. 2  135-3-1B Par. 4  135-3-1B Par. 6

As background, under Article XIII, Section 19, the State Constitution provides the SBE the authority to annually assess properties owned or used by companies transmitting or selling gas and electricity.

Our records show the SBE parcels listed above are considered part of PG&E’s unitary operations. The SBE’s assessment of the conservation easement on the subject parcels will be included in the full fee assessment to PG&E as they will continue to own the property in fee. There will be no separate valuation assessment of the conservation easement. Therefore, no change in assessed value is anticipated for future lien dates as a result of the conveyance of the conservation easement.

Sincerely,

Jack McCool
Supervising Property Appraiser
State-Assessed Properties Division
