SUBJECT: Implement Portions of D.14-06-037 (PG&E's 2012 Rate Design Window Proceeding) Related to PG&E's SmartRate and Peak Day Pricing Programs

Dear Ms. Allen:

Advice Letter 4627-E is effective as of May 1, 2015.

Sincerely,

Edward Randolph  
Director, Energy Division
April 30, 2015

Advice 4627-E
(Pacific Gas and Electric Company ID U 39 E)

Subject: Implement Portions of Decision 14-06-037 (PG&E’s 2012 Rate Design Window Proceeding) Related to PG&E’s SmartRate and Peak Day Pricing Programs

Purpose

The purpose of this advice letter is to submit a follow-up Tier 1 compliance advice letter and final tariffs for PG&E’s SmartRate and Peak Day Pricing Programs, effective May 1, 2015. This advice letter implements changes to PG&E’s electric tariff sheets on Schedules A-1, A-6, A-10, AG-4, AG-5, E-19, E-20, and E-RSMART to comply with Decision (D.) 14-06-037\(^1\) and the Energy Division’s September 2, 2014 disposition letter approving Advice Letter 4472-E.

The Energy Division approved the pro forma tariffs submitted in Advice 4472-E, along with PG&E’s request to file final tariffs in a Tier 1 advice letter closer to the effective date of May 1, 2015. The enclosed final tariff changes are identical to the Peak Day Pricing and SmartRate tariff revisions approved in Advice 4472-E, except for a minor change to the SmartRate credit, as noted below.

Background

D.14-06-037 approves a number of proposals made by PG&E in its 2012 RDW application, including changes to Peak Day Pricing and Smart Rate tariffs. In Advice letter 4472-E, filed August 5, 2014, PG&E proposed, and the Energy Division approved, pro forma tariff changes to implement these revisions. This Tier 1 advice letter provides the final changes to tariffs already authorized by the Energy Division’s approval of Advice 4472-E, with an effective date of May 1, 2015.

\(^1\) D.14-06-037 was issued by the Commission on June 30, 2014 in PG&E’s 2012 Rate Design Window (RDW) proceeding (Application 12-02-020).
**Tariff Revisions**

The attached tariff sheets implement changes to the Peak Day Pricing (PDP) and SmartRate tariff terms and conditions of service approved by D.14-06-037 and Advice 4472-E, specifically:

- Eliminating the extended 12:00 noon – 6:00 p.m. pricing period option for non-residential PDP tariffs;\(^2\)
- Changing the operating season for SmartRate from summer to year-round;\(^3\)
- Changing the design basis, and event limits for SmartRate from 15 events per year to 9-15 events per year with a design basis of 12 events, to conform with those for PDP;\(^4\)
- Modifying the event triggers, temperature adjustments, and temperature-related triggers on SmartRate and PDP per PG&E’s proposals, so that temperature adjustments can be made twice per month and that the forecast weekday and weekend maximum temperatures triggering SmartRate events are consistent with those triggering PDP events;\(^5\)
- Modifying the day-ahead notice time on SmartRate from 3:00 p.m. to 2:00 p.m.;\(^6\)
- Reducing the SmartRate credits by 20 percent (from $0.02992 to $0.02394\(^7\) per kWh for all applicable usage during the period between June 1 and September 30 each summer) to preserve revenue neutrality due to the reduced number of events from 15 to 12.\(^8\)

As approved in Advice 4472-E, PG&E requests that the effective date for these SmartRate and PDP tariff modifications be May 1, 2015, at the start of the summer operating season. D.14-06-037 at page 8 directs that, “Given the actual timing of the

---

\(^3\) See Ordering Paragraph 5. The approved changes to SmartRate affect Schedule E-RSMART.

\(^4\) See Ordering Paragraph 6.

\(^5\) See Ordering Paragraph 7.

\(^6\) See Ordering Paragraph 8.

\(^7\) Please note that PG&E has discovered that, due to a prior inadvertent calculation error, the new SmartRate credit figure of $0.02396 provided in Advice 4472-E was incorrect. This has been corrected herein on Sheet 2 of the E-RSMART tariff page to instead be a very slightly different figure, $0.02394 (as $0.02394 is in fact 80 percent of the current SmartRate credit of $0.02992 per kWh).

\(^8\) See Ordering Paragraph 11. In Ordering Paragraph 12, D.14-06-037 also approved a revenue-neutral reduction in the PDP event period adders (from $1.20 to $0.96) to reflect the increase in the length of the standard operating period from four to five hours. However, since the change to the operating period was deferred in Ordering Paragraph 2, there is no need to modify the adders at this time.
issuance of this decision, it is now most appropriate for these changes to be implemented by PG&E no later than May, 2015.”

The filing would not increase any current rate or charge, cause the withdrawal of service, or conflict with any rate schedule or rule.

Protests

Anyone wishing to protest this filing may do so by letter sent via U.S. mail, facsimile or E-mail, no later than May 20, 2015, which is 20 days after the date of this filing. Protests must be submitted to:

CPUC Energy Division  
ED Tariff Unit  
505 Van Ness Avenue, 4th Floor  
San Francisco, California 94102

Facsimile: (415) 703-2200  
E-mail: EDTariffUnit@cpuc.ca.gov

Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest shall also be sent to PG&E either via E-mail or U.S. mail (and by facsimile, if possible) at the address shown below on the same date it is mailed or delivered to the Commission:

Meredith Allen  
Senior Director, Regulatory Relations  
Pacific Gas and Electric Company  
77 Beale Street, Mail Code B10C  
P.O. Box 770000  
San Francisco, California 94177

Facsimile: (415) 973-7226  
E-mail: PGETariffs@pge.com

Any person (including individuals, groups, or organizations) may protest or respond to an advice letter (General Order 96-B, Section 7.4). The protest shall contain the following information: specification of the advice letter protested; grounds for the protest; supporting factual information or legal argument; name, telephone number, postal address, and (where appropriate) e-mail address of the protestant; and statement that the protest was sent to the utility no later than the day on which the protest was submitted to the reviewing Industry Division (General Order 96-B, Section 3.11).
**Effective Date**

PG&E requests that this Tier 1 advice filing become effective on May 1, 2015.

**Notice**

In accordance with General Order 96-B, Section IV, a copy of this advice letter is being sent electronically and via U.S. mail to parties shown on the attached list and the parties on the service list for A.12-02-020. Address changes to the General Order 96-B service list should be directed to PG&E at email address PGETariffs@pge.com. For changes to any other service list, please contact the Commission’s Process Office at (415) 703-2021 or at Process_Office@cpuc.ca.gov. Send all electronic approvals to PGETariffs@pge.com. Advice letter filings can also be accessed electronically at: http://www.pge.com/tariffs/.

ELECTRIC SCHEDULE A-1
SMALL GENERAL SERVICE

PEAK DAY PRICING DETAILS (CONT'D):

| g. Program Options: Customers may customize their PDP participation by choosing either a) no limit on the number of consecutive PDP events or b) every other PDP event. Customers electing every other PDP event will be divided into two groups and only be subject to a maximum of one-half of the PDP events called and the corresponding PDP rate credits will be reduced by 50%. Customers that do not elect an option will be defaulted to the no limit on the number of consecutive PDP events. The duration of PDP Event Operations for both options will be from 2:00 p.m. to 6:00 p.m. (four-hour window). |
| h. Event Trigger: PG&E will trigger a PDP event when the day-ahead temperature forecast trigger is reached. The trigger will be the average of the day-ahead maximum temperature forecasts for San Jose, Concord, Red Bluff, Sacramento and Fresno. Beginning May 1 of each summer season, the PDP events on non-holiday weekdays will be triggered at 98 degrees Fahrenheit (°F), and will be triggered at 105° F on holidays and weekends. If needed, PG&E will adjust the non-holiday weekday trigger up or down over the course of the summer to achieve the range of 9 to 15 PDP events in any calendar year. Such adjustments would be made no more than twice per month and would be posted on PG&E’s PDP Website. PDP events may also be initiated as warranted on a day-ahead basis by 1) extreme system conditions such as special alerts issued by the California Independent System Operator, 2) under conditions of high forecasted California spot market power prices, 3) to meet annual PDP event limits for a calendar year, or 4) for testing/evaluation purposes. |
| i. Program Terms: A customer may opt-out anytime during its initial 12 months on a PDP rate. After the initial 12 months, customer’s participation will be in accordance with Electric Rule 12. Customers may opt-out of a PDP rate at anytime to enroll in another demand response program beginning May 1, 2011. |
| j. Interaction with Other PG&E Demand Response Programs: Customers on a PDP rate may participate in a day-of dispatchable program as established in D.09-08-027. |
PEAK DAY PRICING DETAILS (continued)

d. PG&E Website: The customer’s actual energy usage is available at PG&E’s “My Account” website. This data may not match billing quality data, and the customer understands and agrees that the data posted to PG&E’s “My Account” website may be different from the actual bill.

e. Program Operations: A maximum of fifteen (15) PDP events and a minimum of nine (9) PDP events may be called in any calendar year. PG&E will notify customers by 2:00 p.m. on a day-ahead basis when a PDP event will occur the next day. The PDP program will operate year-round and PDP events may be called for any day of the week.

f. Event Cancellation: PG&E may initiate the cancellation of a PDP event before 4:00 p.m. the day-ahead of a noticed PDP event. If PG&E cancels an event, it will count the cancelled event toward the PDP limits.

g. Program Options: Customers may customize their PDP participation by choosing either a) no limit on the number of consecutive PDP events or b) every other PDP event. Customers electing every other PDP event will be divided into two groups and only be subject to a maximum of one-half of the PDP events called and the corresponding PDP rate credits will be reduced by 50%. Customers that do not elect an option will be defaulted to the no limit on the number of consecutive PDP events. The duration of PDP Event Operations for both options will be from 2:00 p.m. to 6:00 p.m. (four-hour window).

PEAK DAY PRICING DETAILS (continued)

h. Event Trigger: PG&E will trigger a PDP event when the day-ahead temperature forecast trigger is reached. The trigger will be the average of the day-ahead maximum temperature forecasts for San Jose, Concord, Red Bluff, Sacramento and Fresno.

Beginning May 1 of each summer season, the PDP events on non-holiday weekdays will be triggered at 98 degrees Fahrenheit (°F), and will be triggered at 105°F on holidays and weekends. If needed, PG&E will adjust the non-holiday weekday trigger up or down by 2°F over the course of the summer to achieve the range of 9 to 15 PDP events in any calendar year. Such adjustments would be made no more than twice per month and would be posted on PG&E’s PDP website.

PDP events may also be initiated as warranted on a day-ahead basis by 1) extreme system conditions such as special alerts issued by the California Independent System Operator, 2) under conditions of high forecasted California spot market power prices, 3) to meet annual PDP event limits for a calendar year, or 4) for testing/evaluation purposes.

i. Program Terms: A customer may opt-out anytime during their initial 12 months on a PDP rate. After the initial 12 months, customer’s participation will be in accordance with Electric Rule 12.

Customers may opt-out of a PDP rate at anytime to enroll in another demand response program beginning May 1, 2011.

j. Interaction with Other PG&E Demand Response Programs: Customers on a PDP rate may participate in a day-of dispatchable demand response program as established in D.09-08-027.
d. Demand Response Operations Website: Customers with demands of 200 kW or greater for three consecutive months can use PG&E’s demand response operations website located at https://inter-act.pge.com for load curtailment event notifications and communications.

The customer’s actual energy usage is available at PG&E’s demand response operations website or on “My Account”. This data may not match billing quality data, and the customer understands and agrees that the data posted to PG&E’s demand response operations website or “My Account” may be different from the actual bill.

e. Program Operations: A maximum of fifteen (15) PDP events and a minimum of nine (9) PDP events may be called in any calendar year. PG&E will notify customers by 2:00 p.m. on a day-ahead basis when a PDP event will occur the next day. The PDP program will operate year-round and PDP events may be called for any day of the week.

f. Event Cancellation: PG&E may initiate the cancellation of a PDP event before 4:00 p.m. the day-ahead of a noticed PDP event. If PG&E cancels an event, it will count the cancelled event toward the PDP limits.

g. Program Options: Customers may customize their PDP participation by choosing either a) no limit on the number of consecutive PDP events or b) every other PDP event. Customers electing every other PDP event will be divided into two groups and only be subject to a maximum of one-half of the PDP events called and the corresponding PDP rate credits will be reduced by 50%. Customers that do not elect an option will be defaulted to the no limit on the number of consecutive PDP events. The duration of PDP Event Operations for both options will be from 2:00 p.m. to 6:00 p.m. (four-hour window).

17. PEAK DAY PRICING DETAILS (continued):

d. Notification Equipment: Customers, at their expense, must have access to the Internet and an e-mail address or a phone number to receive notification of a PDP event. In addition, all customers can have, at their expense, an alphanumeric pager or cellular telephone that is capable of receiving a text message sent via the Internet, and/or a facsimile machine to receive notification messages.

If a PDP event occurs, customers will be notified using one or more of the above-mentioned systems. Receipt of such notice is the responsibility of the participating customer. PG&E will make reasonable efforts to notify customers; however it is the customer’s responsibility to maintain accurate notification contact information, receive such notice and to check the PG&E website to see if an event is activated. PG&E does not guarantee the reliability of the phone, text messaging, e-mail system or Internet site by which the customer receives notification.

PG&E may conduct notification test events once a month to ensure a customer’s contact information is up to date. These are not actual PDP events and no load reduction is required.

e. Demand Response Operations Website: Customers can use PG&E’s demand response operations website located at https://inter-act.pge.com for load curtailment event notifications and communications.

The customer’s actual energy usage is available at PG&E’s demand response operations website. This data may not match billing quality data, and the customer understands and agrees that the data posted to PG&E’s demand response operations website may be different from the actual bill.

f. Program Operations: A maximum of fifteen (15) PDP events and a minimum of nine (9) PDP events may be called in any calendar year. PG&E will notify customers by 2:00 p.m. on a day-ahead basis when a PDP event will occur the next day. The PDP program will operate year-round and PDP events may be called for any day of the week. PDP events will be called from 2:00 p.m. to 6:00 p.m.

g. Event Cancellation: PG&E may initiate the cancellation of a PDP event before 4:00 p.m. the day-ahead of a noticed PDP event. If PG&E cancels an event, it will count the cancelled event toward the PDP limits.

h. Event Trigger: PG&E will trigger a PDP event when the day-ahead temperature forecast trigger is reached. The trigger will be the average of the day-ahead maximum temperature forecasts for San Jose, Concord, Red Bluff, Sacramento and Fresno.

Beginning May 1 of each summer season, the PDP events on non-holiday weekdays will be triggered at 98 degrees Fahrenheit (°F), and will be triggered at 105°F on holidays and weekends. If needed, PG&E will adjust the non-holiday weekday trigger up or down over the course of the summer to achieve the range of 9 to 15 PDP events in any calendar year. Such adjustments would be made no more than twice per month and would be posted to the demand response operations website.

(Continued)
APPLICABILITY: The residential SmartRate program is a voluntary rate supplement to the customer's otherwise applicable rate schedule (OAS). Schedule E-RSMART is available to a PG&E Bundled-Service customer served on a single family residential electric rate schedule. Each customer must continue to take service under the provisions of their OAS. A customer is not eligible to participate in the residential SmartRate program if the customer is taking service in the following manner: 1) through a residential master-metered rate schedule, 2) in conjunction with a net metering or standby rate schedule, 3) in conjunction with direct access or community choice aggregation service, or 4) as a Transitional Bundled Service under electric Rule 22.1. The residential SmartRate program operates year-round on any day of the week, but most events are expected to occur on summer weekdays.

Customers will receive a bill protection transitional incentive to participate in the residential SmartRate program subject to meeting the qualification criteria (see Bill Protection section below).

The customer must have a SmartMeter™ system to participate in the residential SmartRate program. Upon the customer's request to participate and verification of eligibility by PG&E, the customer will be placed on the residential SmartRate program on the first day of the next Billing Cycle where the Billing Cycle start date occurs at least five business days after the date of the customer's request. A customer request that is received within five business days of the customer's next Billing Cycle will be placed on the residential SmartRate program in the following Billing Cycle.

TERRITORY: This schedule is available to customers in PG&E's electric service territory.

RATES: The customer will be billed for all regular charges applicable under the customer's OAS. Additional charges (based on usage during SmartDay High-Price Periods) and SmartRate credits will be determined according to the rates specified in this schedule. See "Definition of Time Periods" section below for specific SmartRate program time periods. The SmartRate program time periods may differ from traditional Time-Of-Use (TOU) periods on the customer's OAS. The additional energy charges applicable during SmartDay High-Price Periods and SmartRate Credits will be determined as follows:

**SmartDay High-Price Period Charge:** The total effective energy charge on this schedule for usage during SmartDay High-Price Period will be the SmartDay High-Price Period Charge multiplied by the actual energy usage during the SmartDay High-Price Period.

**SmartRate Credits:** The customer taking service under Schedule E-RSMART will pay reduced total effective energy rates, through (1) SmartRate Non-High-Price Period credits for usage outside the SmartDay High-Price Period on SmartDays and usage on those days that are not declared as SmartDays during the period from June 1 through September 30, and (2) SmartRate Participation credit for all usage in tiers 3, 4 and 5 during the customer’s Billing Cycle that includes any days from June 1 through September 30.

* Applicable on SmartDays.
** Applicable to SmartRate non High-Price Period usage from June 1 through September 30.
*** Applicable to all usage in tiers 3 and above, during the customer’s Billing Cycle that includes any days from June 1 through September 30.
DEFINITION OF TIME PERIODS:

SmartDay Event Days May be called year-round on any day of the week (although most events are expected to occur on summer weekdays).

SmartDay High-Price Period: 2:00 p.m. to 7:00 p.m.

Please refer to the sections of this schedule labeled “Program Operations” and “Notification and Trigger” for a complete description of how SmartDays will be determined, and how customers will be notified of those days when SmartDay High-Price Period charges will be in effect.

METERING EQUIPMENT:

Each participating customer account must have a SmartMeter™ system installed that can be remotely read by PG&E. Metering equipment (including remote communication device) must be in operation prior to participating in the program to ensure proper operation of the metering and communication equipment.

NOTIFICATION EQUIPMENT:

At the customer’s option and expense, it is recommended, but not required that the customer provide a telephone number or an e-mail address to receive automated notification messages of a SmartDay event from PG&E. In addition, customers can have, at their expense, a cellular telephone that is capable of receiving an SMS text message to receive notification messages of a SmartDay event from PG&E.

If a SmartDay event occurs, the customer will be notified by using one or more of the above-mentioned systems. Receipt of notice is the responsibility of the participating customer. PG&E will make best efforts to notify the customer, however it is the customer’s responsibility to receive notice and to check the PG&E website to see if a SmartDay event has been activated and that their SmartRate notification information is accurate and current. PG&E does not guarantee the receipt of notification by the notification system, the e-mail system, or Internet site by which the customer receives notification.
CONTRACTS: Customer’s participation in this schedule will be in accordance with Electric Rule 12.

Customers may terminate their participation in the SmartRate program by providing notice to PG&E. Cancellation of the customer’s participation in the SmartRate program will become effective on the next business day. PG&E reserves the right to terminate the SmartRate program upon thirty (30) days written notice and approval by the CPUC.

PROGRAM OPERATIONS: A maximum of fifteen (15) SmartDay Event Days and a minimum of nine (9) SmartDay Event Days may be called in any calendar year. PG&E will notify customers by 2:00 p.m. on a day-ahead basis when a SmartDay Event Day will occur the next day.

NOTIFICATION AND TRIGGER: PG&E will activate a SmartDay event when the day-ahead temperature forecast trigger is reached. The trigger will be the average of the day-ahead maximum temperature forecasts for San Jose, Concord, Red Bluff, Sacramento and Fresno.

Beginning May 1 of each summer season, the SmartDay Event Days on non-holiday weekdays will be triggered at 98 degrees Fahrenheit (°F), and will be triggered at 105°F on holidays and weekends. If needed, PG&E will adjust the non-holiday weekday trigger up or down over the course of the summer to achieve the range of 9 to 15 SmartDay Event Days in any calendar year. Such adjustments would be made no more than twice per month and would be posted on PG&E’s website.

SmartDay events may also be initiated as warranted on a day-ahead basis by 1) extreme system conditions such as special alerts issued by the California Independent System Operator, 2) under conditions of high forecasted California spot market power prices, 3) to meet annual SmartDay Event Day limits for a calendar year, or 4) for testing/evaluation purposes.

PG&E will retain the sole discretion NOT to call a SmartDay event even if one or more of the above criteria are met.
