

Pacific Gas and Electric Company Potrero Site Cleanup Project Weekly Activity Report 9/8/17

This report provides an update on the status of cleanup work in the Northeast Area of the former power plant located at 1201 Illinois Street. Cleanup work is being performed as part of a company-wide program to address sites that have been impacted by historic operations. Project oversight is provided by the San Francisco Bay Region Water Quality Control Board and the city/county of San Francisco.

Work Completed 9/4/17 to 9/8/17

- Continued to remove underground utility lines no longer in use
- Continued to relocate underground utilities in the area where soil will be treated below ground
- Began installing steel sheeting along the shoreline
- Continued excavating soil in the northern and southern areas of the project site and transporting soil to a licensed off-site disposal facility

Work Planned for Upcoming Week

- Continue removing underground utility lines no longer in use
- Continue relocating underground utilities in the area where soil will be treated below ground
- Continue installing steel sheeting along the shoreline
- Continue excavating soil in the northern and southern areas of the project site and transporting soil to a licensed off-site disposal facility

Air Monitoring

- On September 1, regional air quality was poor due to high heat and emissions from wild fires in the air, which was detected by our air monitors; as a precautionary measure we adapted operations by adding more dust control measures
- Air monitoring confirmed that air quality remained at levels protective of the health of the surrounding community
- Workers may wear respirators per safety requirements when starting work in a new area until air data confirms they are not required

Work Hours

- 7 A.M. to 8 P.M., Monday through Friday

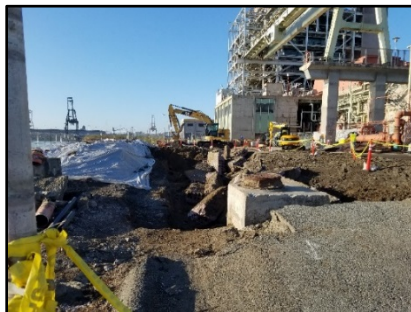

Anticipated Impacts

- Material deliveries and trucking activities may cause minor traffic impacts
- Vibrations may be felt by nearby neighbors next week while the steel sheet piles are being installed to build a new seawall

Site Security

- Site security is provided at the site and the access gates are closed to the public at all times
