

Pacific Gas and Electric Company Potrero Site Cleanup Project Weekly Activity Report 10/27/17

This report provides an update on the status of cleanup work in the Northeast Area of the former power plant located at 1201 Illinois Street. Cleanup work is being performed as part of a company-wide program to address sites that have been impacted by historic operations. Project oversight is provided by the San Francisco Bay Region Water Quality Control Board and the city/county of San Francisco.

Work Completed 10/23/17 to 10/27/17

- Completed driving steel sheeting for new seawall
- Started to construct an additional soil stockpile area
- Continued removing wood pile remnants found in soil below ground and removing buried utilities in the soil treatment area
- Continued excavating debris and soil, and transported them to a licensed off-site disposal facility

Work Planned for Upcoming Week

- Continue removing wood pile remnants found in soil below ground
- Continue constructing an additional soil stockpile area
- Continue excavating and transporting debris and soil to a licensed off-site disposal facility

Air Monitoring

- Air monitoring confirmed that air quality remained at levels protective of the health of the surrounding community

Work Hours

- 7 A.M. to 8 P.M., Monday through Friday

Anticipated Impacts

- Deliveries of construction materials and other trucking activities may cause minor traffic impacts

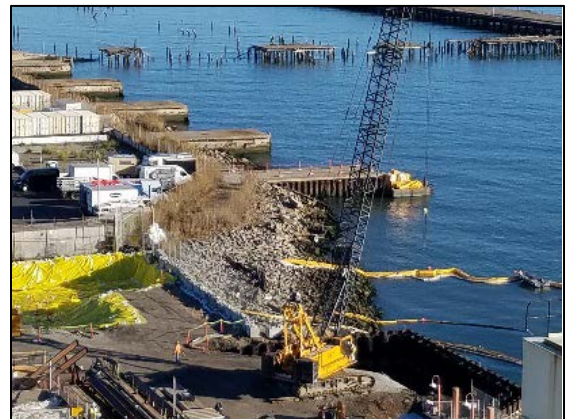

Site Security

- On-site security is present at the site after hours and the access gates are closed to the public at all times
