* As reported to the California Energy Commission’s Power Source Disclosure Program excluding voluntary unbundled renewable energy credits. PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2018. RCEA’s generation data is a forecast for 2018 and may be subject to change. Actual 2018 generation data will be reported to the California Energy Commission in 2019. The figures above may not sum up to 100 percent due to rounding.

**Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
