Definitions

Generation Rate is the cost of creating electricity to power your home or business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your home or business. The PG&E delivery rate depends on your electricity usage but is charged equally to both PCE and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's costs for generation resources that are currently above the market rate. These resources were committed prior to a customer's switch to a third-party electric generation provider. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers

Where Do I Find My Electric Rate Schedule?

Need some help finding your electric rate? Go to the "Electric Delivery Charges" section of your energy statement - you'll find your electric rate in the upper left.

The screenshot displays a PG&E Energy Statement. At the top, it includes the PG&E logo, the text "ENERGY STATEMENT", and the website "www.pge.com/MyEnergy". To the right, it lists "Account No: 1023456789-0", "Statement Date: MM/DD/YYYY", and "Due Date: MM/DD/YYYY".

The main section is titled "Details of PG&E Electric Delivery Charges" and shows a billing period of "MM/DD/YYYY - MM/DD/YYYY (29 billing days)". Below this, it specifies "Service For: 1234 Main Street" and "Rate Schedule: E1 S Residential Service", which is highlighted with a yellow box. A yellow line connects this box to the explanatory text below.
