Add a Backup Admin

Your first task as a CORE Admin is to add a backup Admin for vacation coverage or anytime you cannot perform the Admin duties.

Caution: Admin access enables the user to add and delete users. Please limit two Admins per company.

### Adding Users to Groups – Admin Task

**Effective: 01/20**

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
</table>
| 3.   | **Enter the **Admin email address.**  
  Note: The email that you enter becomes the User ID during the login process. If you have a choice of multiple email addresses, always select the shortest email with the fewest keystrokes. See example below.  
  - GeorgeMcCarthy@SCBConstruction.com  
  - GeorgeMc@SCBConstruction.com  
  - GM@SCB.com  |
| 4.   | **Select Group Admin** from the dropdown.  |
| 5.   | **Click Add.**  |

The new Admin is added. This user will now have access to perform all Admin tasks.
Adding Users to Groups – Admin Task
Effective: 01/20

Add Users to Groups
Similar to the Admin step, the email address becomes the login User ID. When possible, select the shortest email address.

To add users to groups, follow the same steps as above, except select Group Member from the dropdown and click Add.

Adding Multiple Users
If you have a list of user email addresses, separated by commas, you can copy (CTRL+C) and paste (CTRL+V) the list to add multiple users at once.

1. Select the email addresses.
2. Copy (CTRL + C).
3. Access the CORE Company screen.
4. Click in the User field.
5. Paste (CTRL + V).
6. Click Add.

The users are added. CORE will email them a link to sign up for a CORE account. Refer the new users to the Sign up for a CORE Account job aid for instructions.
