

Disadvantaged Communities Community Solar Green Tariff 2022 RFO Workforce Development Plan Attestation

Mandatory:

- Participants Info.
- Workforce Plan
- Additional Resources
- Signed Attestation

Workforce Development and Job Training Plan Requirements

Requirements: Participants must follow all the Community Solar Green Tariff (CS-GT) workforce development and job training requirements described below.

As ordered in D. 18-06-027, the CPUC “direct[s] the utilities to require workforce development for all projects, including local hiring and targeted hiring, to ensure that job opportunities for low-income communities materialize.” (page 87)

The participant must have a plan in place, for each project, on how they will utilize local workforce development and job training, in the development and construction phase.

The workforce development can be completed on either the CS-GT solar installation at the project site, or in a support role on the project, including but not limited to direct work on:

Solar Installation

- Installing Electrical Components
- Installing Mechanical Components
- Completing System Installation
- Maintenance and Troubleshooting Activities

Project Design / Project Engineering

- Design Systems

Project Management / Coordination

- Managing the Project

Employees involved in the solar installation may be eligible to meet this requirement if they graduated from an eligible job training program within 12 months of installation on the project.

If the above requirements are not met in the project development and/or construction phase, your offer will not be considered in the solicitation. No exceptions will be made to these requirements.

Developer Job Training Responsibilities

Developers are responsible for adhering to the following requirements:

- The Developer is responsible for finding and hiring the job trainee(s) for each CS-GT installation in accordance with the number of job trainees required for the project described above.
- The Developer must pay job trainee(s) for time spent on each CS-GT installation, at a rate consistent with the contractor’s entry level or temporary worker wage.
- Developer’s insurance must cover the employment of the CS-GT workforce development hires, including temporary hires if the job training organization/ program does not provide liability coverage for its trainees.
- Developers must submit the Workforce Development **Trainee Log** to PG&E’s localgreensaver@pge.com prior to the COD stage. The **Trainee Log** identifies the names of the eligible job training program and job trainee(s) used for each CS-GT installation, types of jobs completed and hours worked. Both the Developer and CS-GT job trainee(s) must complete and sign this **log** after the installation is completed. See Appendix K for Workforce Development **Trainee Log**.
