

# Senior Telecommunications Technician Entrance Exam

## Preparation Guide

### **Phone Creation:**

Add IP phone

### **VoIP Architecture:**

Voip Overview

### **Trunking:**

Technician Guide To Trunking

### **TDM PBX knowledge (most information can be found from the telephony fundamentals course):**

- Types of Signaling
- VF Patch panels (know each position and which position is used for)
- Know the electrical states for the various forms of voice circuits used in voice PBX communications

### **VoIP (all information is taught in the VoIP tech training course, see the attached VoIP Overview PPT for some info)**

- Understand VoIP architecture and how each component relates to their PBX counterparts
- Phone creation process
