

Business and Agricultural Time-of-Use Rate Plans

Overview of Business Rate Plans

Business Low Use

B-1

Small businesses with low energy use

- **Less than 75 kilowatts (kW)*** of demand
- Lower peak and higher off-peak rates than the Business Alternative Use (B-6) rate plan
- No demand charge**
- Additional option:
 - **B1-ST**: Option for customers with storage

Business Alternative Use

B-6

Small businesses with low energy use

- Benefits customers who have flexibility to adjust energy use throughout the day
- **Less than 75 kilowatts (kW)** of demand
- Higher peak and off-peak rates than the Business Medium Use (B-10) rate plan because B-10 has a demand charge that allows lower B-10 energy charges.**
- No demand charge

Business Medium Use

B-10

Medium businesses with moderate energy use

- **Between 75 and 499 kilowatts (kW)** of demand
- Voluntary option for customers **below 75kW**
- Demand charge

Business Medium High Use

B-19

Large and medium businesses with moderate to high energy use

- Four options:
 - **B-19**: **Between 500 and 999 kilowatts (kW)** of demand
 - **B-19V**: Voluntary option for customers **up to 499kW**
 - **B-19R**: Option for solar customers
 - **B-19S**: Option for customers with storage
- Demand charge
- Lower energy rates but a higher demand charge than the Business Medium Use (B-10) rate plan

Business High Use

B-20

Large businesses with high energy use

- Three options:
 - **B-20**: **1,000 kilowatts (kW)** or more
 - **B-20R**: Option for solar customers
 - **B-20S**: Option for customers with storage
- Lower energy rates but higher demand charge than the Business Medium High Use (B-19) rate plan

* Kilowatt (kW) is the measure of how much power electric equipment consumes.

** Some time-of-use rate plans include a demand charge to encourage businesses to spread their electricity use throughout the day. This demand charge is calculated by using the 15-minute interval during each billing month when your business uses its maximum amount of electricity. Regular electricity usage charges are lower than for a comparable rate plan without a demand charge.

Are you on the best rate plan for your business?

Overview of Agricultural Rate Plans

Ag<35

AG-A1

Small agriculture businesses with lower demand and lower load factor

**Less than 35 kilowatts (kW) of demand
< 1,300 Annual Operating Hours***

- On-Peak and Off-Peak Energy Charges
- Compared to Ag<35 kW High Use (AG-A2)
 - Lower demand charges
 - Higher energy charges with wider time-of-use differentiation

Ag<35 kW High Use

AG-A2

Small agriculture businesses with lower demand and higher load factor

**Less than 35 kilowatts (kW) of demand
> 1,300 Annual Operating Hours***

- On-Peak and Off-Peak Energy Charges
- Compared to Ag<35 kW Low Use (AG-A1)
 - Higher demand charges
 - Lower energy charges with less time-of-use differentiation

Ag35+ kW Medium Use

AG-B

Medium agriculture businesses with higher demand and lower load factor

**Greater than 35 kilowatts (kW) of demand
< 1,500 Annual Operating Hours***

- On-Peak and Off-Peak Energy Charges
- Compared to Ag35+ kW High Use (AG-C)
 - Lower demand charges
 - Higher energy charges with wider time-of-use differentiation

Ag35+ kW High Use

AG-C

Large agriculture businesses with higher demand and higher load factor

**Greater than 35 kilowatts (kW) of demand
> 1,500 Annual Operating Hours***

- Summer On-Peak Demand On-Peak and Off-Peak Energy Demand Charge Rate Limiter
- Compared to Ag35+ kW Medium Use (AG-B)
 - Higher demand charges
 - Lower energy charges with less time-of-use differentiation

*General guideline. Results may vary.

Are you on the best rate plan for your agricultural business?

Three pre-defined flex rate options are available if you can limit your operating hours to certain days of the week. Off-peak options are Wednesday and Thursday, Saturday and Sunday, and Monday and Friday. See details at pge.com/rateanalysis.

Or call your agriculture advisor with questions at **1-877-311-3276**, Monday-Friday, 7:00 a.m.-6:00 p.m.
