SAFETY UPDATE

The difference between Watch and Warning notifications

We understand how disruptive it is to be without power. We have improved Public Safety Power Shutoff (PSPS) notifications to help you plan for outages. We will send **Watch** notifications two days before and one day before a potential event in your area. When forecasted conditions show a safety shutoff is needed and will happen in the next several hours, a **Watch** will be upgraded to a **Warning**. We use the contact information provided in your account to send notifications via **phone, email and text**.

REMINDER

Business time-of-use rate plan changes are coming

Starting in March 2021, peak hours will shift to later in the day for time-of-use rate plans. Review your rate plan options via your online account. Opt-in early, if it's right for your business.

ADVANCED PUMP EFFICIENCY PROGRAM (APEP)

Don't miss out on pump overhaul incentives

Irrigation pumping can account for most of a farm's energy consumption. Take advantage of valuable incentives and rebates while they last.

[Start saving »](#)
**A new financing option is available**

Administered by the state, the **Small Business Financing Program** offers a flexible way to upgrade equipment at your business and save.

[Learn more »](#)

REBATES

New rebates are available for variable frequency drives (VFDs)

Adding a VFD to your irrigation pumps may help improve operations and save money. Rebates are available for well pumps and booster pumps at \$40, \$60 and \$80 per unit.
