Watch Example

Warning Example

SAFETY UPDATE

The difference between Watch and Warning notifications

We understand how disruptive it is to be without power. We have improved Public Safety Power Shutoff (PSPS) notifications to help you plan for outages. We will send **Watch** notifications two days before and one day before a potential event in your area. When forecasted conditions show a safety shutoff is needed and will happen in the next several hours, a **Watch** will be upgraded to a **Warning**. We use the contact information provided in your account to send notifications via **phone, email and text**.
