# Bakersfield Power Connect

Join Us for a Community Open House  
January 13-15

## Ensuring Electric Reliability in Bakersfield and Surrounding Communities

The proposed Bakersfield Power Connect project will help ensure future electric reliability and efficiency for our customers in Bakersfield and the surrounding rural communities of Kern County. This project will include the construction of a new substation, enhancements to existing substations, and upgrades to existing transmission lines that serve about 100,000 PG&E customers in the area. These investments will strengthen the grid and help us continue to provide a highly reliable and stable electricity source for residents, farms and businesses.

## Upcoming Open Houses

PG&E is dedicated to engaging the community in the planning process, helping ensure the community's feedback shapes the final project. You're invited to attend an open house to learn more about the proposed Bakersfield Power Connect project. Members of our team will be available at each open house to discuss the project, including potential substation locations and site design options; answer questions; and gather your feedback and input.

**January 13, 2016** 5:30–7:30 p.m.

**Tevis Junior High School, Multi-Purpose Room**  
3901 Pin Oak Park Blvd., Bakersfield, CA 93311
